Journal of Experimental Political Science

The ***Journal of Experimental Political Science*** (JEPS) features research – be it theoretical, empirical, methodological, or some combination thereof – that utilizes experimental methods or experimental reasoning based on naturally occurring data. We define experimental methods broadly: research featuring random (or quasi-random) assignment of subjects to different treatments in an effort to isolate causal relationships between variables of interest. JEPS embraces all of the different types of experiments carried out as part of political science research, including survey experiments, laboratory experiments, field experiments, lab experiments in the field, natural and neurological experiments.

Manuscript submission

All submissions to JEPS should be made online through Editorial Manager at <www.editorialmanager.com/xps>. For complete instructions and submissions guidelines please visit <cambridge.org/xps/ifc>.
