The Dictionary contains nearly one thousand words, personal names, and geographical terms, and includes pronunciation, definitions, and etymologies. 8 pp. of photos, 1 map $7.50

THE ASTONISHMENT OF WORDS

By Victor Proetz

Foreword by Alastair Reid

Afterword by Charles Nagel

The late Victor Proetz explored the possibilities (and impossibilities) of words, especially in the translation of familiar and not-so-familiar English works into French and German. This book contains many of his answers, both in the texts and translations and in his wry, curious, sometimes hilarious commentaries, which are not scholarly in any formal sense but are rich in eccentric scholarship. His astonishments will delight everyone who shares his special interest in language. To be excerpted in *The New Yorker*. $6.75

VOCABULARIO ESPAÑOL DE TEXAS (reprint)

Announcing a Major Event in the Study of Language —

THE ORIGIN AND DIVERSIFICATION OF LANGUAGE

by Morris Swadesh, edited by Joel F. Sherzer, with an introduction by Dell H. Hymes

"There is no doubt in my mind that The Origin and Diversification of Language **will eventually become one of the classics in both linguistic and anthropological theory. Swadesh's ideas will be used as a starting point for what I think will be one of the most exciting decades of our time—a decade that will ultimately indicate conclusively that language is subject to the same kinds of general evolutionary principles that have been found to be operative in other areas of science."—Brent Berlin, University of California, Berkeley.**

This book is the last major work of one of the twentieth century's foremost scientific investigators of language. Morris Swadesh dedicated much of his life to the study of the origin and evolution of language, a subject neglected by most scholars in recent years. With an unusually wide knowledge of languages and of the scientific techniques for discovering their past, Swadesh found evidence to clarify a number of problems and point out paths worth exploring in linguistics. This volume, left nearly complete at his death and edited posthumously by Joel F. Sherzer, is the final statement of a man who envisioned what prehistoric linguistic work might accomplish and diligently went about the business of making his vision reality.

In this book, Professor Swadesh undertook to delineate the simple qualities of human speech also present in animal language and to uncover distinctively human techniques of expression by comparing the common features in modern and ancient languages. He treats the diversification of language not only by isolating root words in different languages, but also by dealing with sound systems, with forms of composition, and with sentence structure. He demonstrates the evidence for the expansion of all language from a single central area. His hypothesis is supported by "exhibits" that conveniently present the evidence in tabular form. Further clarity is provided by the avoidance of strange symbols for exotic phonetic sounds and by use of a suggestive practical phonetic system, intelligible to the student as well as the professional.

Morris Swadesh initiated or was associated with the introduction of many new approaches in scientific linguistics, including phonemics and the pattern analysis of linguistic structure, glotto-chronology, compact analytic dictionaries, and new concepts of language evolution. He wrote more than 130 articles and 22 books. At the time of his death, he was Research Professor at the National Autonomous University of Mexico.

Approx. 336 pp. $8.95.

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 through 1969, may also be purchased separately.

A list of publications in print is available from the Secretary of the Society. Current prices for LANGUAGE are as follows: Complete volume 43, $8.00; volume 45 onward, $16.00; single numbers currently in print from volumes 39–44, $3.00; volume 45 onward, $6.00. Reprint editions of volumes 1–38 of LANGUAGE, Monographs 1–21, and Dissertations 1–52 are available from Kraus Reprint Corporation, 16 East 46th Street, New York, N.Y. 10017, and a price list can be obtained from that address.
