GLOBAL GOVERNANCE BY DATA

We are living through an era of unprecedented data-driven regulatory transformation where artificial intelligence (AI) systems and other advanced digital technologies are rapidly altering how global problems are governed. Artificial intelligence and algorithmic governance are radically reconfiguring how people, places, and things are drawn into lawful relation across diverse fields of practice, such as transnational finance, environmental protection, international development, security, defence, and migration. These changes are enabling new forms of power, inequality, and violence to emerge, and posing urgent conceptual and methodological challenges for law and technology research. *Global Governance by Data: Infrastructures of Algorithmic Rule* brings together leading interdisciplinary scholars working at the forefront of creative thinking and research practice in this area. It offers fresh takes on the prospects for working collectively to critique and renew those legal and technological infrastructures that order, divide, empower, and immiserate across our data-driven world. This title is also available as open access on Cambridge Core.

FLEUR JOHNS is Dean and Head of School of Sydney Law School at the University of Sydney.

GAVIN SULLIVAN is a Reader at Edinburgh Law School, The University of Edinburgh where he leads the UKRI Future Leaders Fellowship project, *Infra-Legalities: Global Security Infrastructures, AI and International Law*.

DIMITRI VAN DEN MEERSSCHE is Senior Lecturer and IHSS Fellow at Queen Mary University of London.

GLOBAL LAW SERIES

The series provides unique perspectives on the way globalization is radically altering the study, discipline, and practice of law. Featuring innovative books in this growing field, the series explores those bodies of law which are becoming global in their application, and the newly emerging interdependency and interaction of different legal systems. It covers all major branches of the law and includes work on legal theory, history, and the methodology of legal practice and jurisprudence under conditions of globalization. Offering a major platform on global law, these books provide essential reading for students and scholars of comparative, international, and transnational law.
