STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at http://journals.cambridge.org/sla. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

ANNOUNCEMENTS

Announcing the 2025 Susan Gass Award for Impact in SLA 1–1

The 2024 Albert Valdman Award 2–2

RESEARCH ARTICLES

Why are some articles highly cited in applied linguistics? A bibliometric study
Sai Zhang and Vahid Aryadoust 3–25

Individual differences in L2 listening proficiency revisited: Roles of form, meaning, and use aspects of phonological vocabulary knowledge
Kazuya Saito, Takumi Uchihara, Kotaro Takizawa, and Yui Suzukida 26–52

Modulating motion event categorization through brief training: Meaning-focused versus form-focused instructional conditions
Yuyan Xue and John N. Williams 53–79

Do they like me? Exploring the role of metaperception in L1–L2 speaker interaction
Chaoqun Zheng, Pavel Trofimovich, Rachael Lindberg, Kim McDonough, and Masatoshi Sato 80–103

Different variables hold varying significance from childhood to adolescence: Exploring individual differences in grammar development of Japanese heritage speakers
Maki Kubota, Yuka Goto, Satsuki Kurokawa, Yuko Matsuoka, Masashi Otani, and Jason Rothman 104–135

The role of processing goals in second language predictive processing: A visual–world eye–tracking study of Korean honorific agreement
Hyunwoo Kim, Kitaek Kim, and Joonhee Kim 136–156

Contextual learning and retention of phrasal verbs: The effects of definition placement and typographic enhancement
Mojtaba Tadayonifar, Irina Elgort, and Anna Siyanova-Chanturia 157–180

Embarrassment in English language classrooms: Conceptualization, antecedents, and consequences
Gholam Hassan Khajavy, Dávid Smid, Sarah Mercer, and Carlos Murillo-Miranda 181–204

The light side of darkness? The dark triad of personality as positive and negative predictors of L2 language learning
Faramarz Ebn-Abbasi, Nazila Fattahi, Jean-Marc Dewaele, and Elouise Botes 205–229

Assessing accent anxiety: A measure of foreign English speakers' concerns about their accents
Qingyao Xue and Kimberly Noels 230–256

Cross-language interactions of phonetic and phonological processes: Intervocalic plosive lenition in Afrikaans-Spanish bilinguals
Andries W. Coetzee, Nicholas Henriksen, and Lorenzo García-Amaya 257–281

The relationships among L2 fluency, intelligibility, comprehensibility, and accentedness: A meta-analysis
Tuc Chau and Amanda Huensch 282–307

Challenges in inflected word processing for L2 speakers: The role of stem allomorphy
Rosa Salmela, Minna Lehtonen, Seppo Vainio, and Raymond Bertram 308–335

The impact of collocational proficiency features on expert ratings of L2 English learners' writing
Ben Naismith and Alan Juffs 336–360

STATE OF THE SCHOLARSHIP

Phonological processing and the L2 mental lexicon: Looking back and moving forward
Isabelle Darcy, Miquel Llompart, Rachel Hayes-Harb, Joan C. Mora, Miren Adrian, Svetlana Cook, and Mirjam Ernestus 361–387

A meta-analysis of the reliability of second language reading comprehension assessment tools
Huijun Zhao and Vahid Aryadoust 388–416

REPLICATION STUDY

Optimizing distributed practice online: A conceptual replication of Cepeda et al. (2009)
John Rogers, Tatsuya Nakata, and Ming Ming Chiu 417–439

RESEARCH REPORT

Effects of phonetic training and cognitive aptitude on the perception and production of non-native speech contrasts
Susana Correia, Anabela Rato, Yuxin Ge, João Dinis Fernandes, Magdalena Kachlicka, Kazuya Saito, and Patrick Rebuschat 440–457

RETRACTION

Effects of retrieval schedules on the acquisition of explicit, automatized-explicit, and implicit knowledge of L2 collocations – CORRIGENDUM – RETRACTION
Nan Fang, Irina Elgort, and Zhuo Chen 458–458

CORRIGENDUM

Effects of retrieval schedules on the acquisition of explicit, automatized-explicit, and implicit knowledge of L2 collocations – CORRIGENDUM
Nan Fang, Irina Elgort, and Zhuo Chen 459–460
