Subject Index

Volume 13, Pages 1–598

A

acute pulmonary oedema, percutaneous balloon pulmonary valvoplasty, in children 576
acute rheumatic fever
  advanced atrioventricular conduction block 506
  in Pakistan, clinical profile 28
amiodarone-induced 2 to 1 atrioventricular block, QT interval, prolongation 305
Amplatzer device, predictors of residual defects, echocardiography recapitulates morphometry 352
Amplatzer Duct Occluder, comparisons with the Rashkind, buttoned devices 413
anomalous left coronary artery
  arising from the pulmonary trunk, cardiac features, presymptomatic period in a neonate 579
  non-adjacent sinus of the pulmonary trunk 95
anomalous systemic venous return, unusual variant of 563
aortic coarctation, intravascular ultrasonic assessment, repaired by use of a subclavian flap 53
aortic dissection, in children and young adults 341
aortic root in adults, bicuspid aortic valve, progressive dilation 526
aortic stenosis, uncomplicated surgical repair, tetralogy of Fallot 300
aortopulmonary window, critical pulmonary stenosis 484
assessing pulmonary vascular resistance, in patients with a bidirectional Glenn anastomosis 137
Association for European Paediatric Cardiology, recommendations, paediatric cardiac catheterisation 582
atrial natriuretic peptides, palliative operation, bidirectional Glenn anastomosis, functionally univentricular hearts 268
atrial appendages, a model for left juxtaposition, chick 152
atrial septal defects
  echocardiographic considerations, deployment of the Helex Septal Occluder 290
  midaxillary lateral thoracotomy, pre-pubescent female children, reappraisal of an "old technique" 565
  multiperforated, transcatheter closure 200
  three-dimensional echocardiography, transthoracic 58
atrioventricular block
  amiodarone-induced 2 to 1, QT interval, prolongation 305
  conduction, in acute rheumatic fever 506
  fetal hydrops, successful management of, congenitally complete 380
atrioventricular conduction block, advanced, in acute rheumatic fever 506
arterial switch operation, replacement, aortic valve 191
arteriovenous fistula, internal thoracic artery 299

B

balloon occlusion, prognostic value of, cavo-pulmonary anastomosis 323
balloon pulmonary valvoplasty, in children, acute pulmonary oedema 576
balloon valvoplasty, percutaneous, pulmonary regurgitation, isolated pulmonary valvar stenosis 444
bicuspid aortic valve, progressive dilation, aortic root in adults 526
bidirectional cavopulmonary anastomosis, ratio of flow, superior and inferior caval veins after construction 123
bidirectional Glenn anastomosis
  atrial natriuretic peptides, after the first palliative operation, functionally univentricular hearts 268
  measured versus assumed uptake of oxygen, assessing pulmonary vascular resistance 137
Blalock-Taussig shunts, modified, method of treating seromas 479
blood volumes, circulating, in pulmonary hypertension, associated with erythrocytosis 544
brachiocephalic trunk, congenital cardiovascular defects, management 537
bundle branch block, exercise-induced, young female athlete 367

C

cardiac catheterisation
  in children as outpatients 275
  in infants, weighing less than 2500 grams 117
  potential, eligibility, safety and costs 275
cardiac features, presymptomatic period in a neonate, anomalous left coronary artery, arising from the pulmonary trunk 579
cardiac-gated, computerised tomographic angiography, preoperative evaluation 466
cardiac operations in children, systemic inflammatory reaction related to, clinical implications 228
cardiac remodelling, in congenital cardiac disease, effects of therapeutic beta blockade 36
cardiac rhabdomyoma
  rapid disappearance, infant 173
  tuberous sclerosis, electrocardiographic changes 258
cardiac transplantation in children, current state of, future prospects for 64
cardiac troponin-I, serum of infants, of diabetic mothers 248
cardiomyopathy
  congenital disorders, of glycosylation 345
  restrictive, idiopathic, fatal case of 469
cardiopulmonary-bypass in children, kinetics of procalcitonin, interleukin 6 and C-reactive protein 161

https://doi.org/10.1017/S104795110300129X Published online by Cambridge University Press

cardiovascular defects, congenital, management 537
cardiovascular findings, and clinical course, patients with Williams syndrome 532
cardiovascular risk factors, patients and their families, do paediatric cardiologists discuss? 551
caval, hepatic and pulmonary veins, normal patterns of flow, Doppler echocardiography during childhood 143
caval vein draining, coronary sinus, Turner's syndrome 364
cavo-pulmonary anastomosis, types of, prognostic value of balloon occlusion 323
central aorto-pulmonary shunt, histopathological follow-up, bailout stenting, postoperative stenosis 197
cerebral infarction, Kawasaki disease 103
chick, atrial appendages, model for left juxtaposition 152
chronic aortic incompetence, management of, optimal timing of the Ross procedure 253
clinical implications, cardiac operations in children, systemic inflammatory reaction 228
clinical profile, acute rheumatic fever, in Pakistan 28
clinical pathway, minimally invasive cardiac surgery, fast track recovery 44
clonal translocation, cardiac fibroma, presenting with incessant ventricular tachycardia in childhood 101
closure of defects, in the oval fossa, Amplatzer device, predictors of residual defects 352
combined surgical and interventional approach, haemoptysis, patient with tetralogy of Fallot 571
computerised tomographic angiography, preoperative evaluation, tetralogy of Fallot and pulmonary atresia 466
congenital cardiac anomalies, magnetic resonance imaging, three-dimensional 461
congenital cardiac disease
  acute recoil of stents, relief of stenotic great vessels 519
  complex, manipulating parallel circuits, perioperative management 316
  palivizumab as prophylaxis, respiratory syncytial virus in infants 420
  partial trisomy, chromosomes 11 and 22, long arms 481
  right ventricular function, noninvasive quantitative parameters, clinical follow-up 397
  views of parents, concerning the planning of services, rehabilitation of families 20
  views of young people, designing the services 11
congenital cardiac defects, surgical management of, in neonates and young infants, low weight 328
congenital cardiovascular defects, management, common brachiocephalic trunk 537
congenital heart disease
  oral health and dental prevention of children, experiences with 439
  parental preference, one-stage versus two-stage surgical repair, for children 7
  thoracic sequels, after thoracotomies in children 264
congenitally malformed hearts, visualization of morphological details in, magnetic resonance imaging 451
congenital mitral regurgitation, rare cause of, mitral perforation 472
coronary arterial bypass grafting, in Kawasaki disease, coronary angioplasty for anastomotic stenosis 284
coronary arterial compression, treated by stenting, replacement of the mitral valve 475
coronary stenting, muscular bridge, hypertrophic obstructive cardiomyopathy 377

D

deficiency, atrial septal component, derived from the vestibular spine 184
deployment of the Helex Septal Occluder, closure of atrial septal defects, echocardiographic considerations 290
diabetic mothers, serum of infants of, cardiac troponin-I 248
diagnosis, aortic dissection in children and young adults 341
diaphragmatic hernia, right-sided, ventricular septal defect 109
diffuse varices, right pulmonary veins 312
Doppler echocardiography during childhood, normal patterns of flow 143
Down's syndrome, setting of, Ebstein's malformation 370
duplication, tension apparatus, tricuspid valve 106

E

Ebstein's malformation, Down's syndrome, setting of 370
effects of therapeutic beta blockade, myocardial function 36
effects of therapeutic hemodilution, associated with erythrocytosis 544
echocardiographic presentations of endocarditis, risk factors, sinus of Valsalva in childhood 168
echocardiographic considerations, deployment of the Helex Septal Occluder, closure of atrial septal defects 290
echocardiographic study, of tetralogy of Fallot, fetus and infant 240
echocardiography recapitulates morphometry, predictors of residual defects, Amplatzer device 352
electrocardiographic changes, patients with cardiac rhabdomyomas, tuberous sclerosis 258
European Paediatric Cardiology, forty years 387
erythrocytosis, circulating blood volumes, in pulmonary hypertension 544
exercise-induced left bundle branch block, young female athlete 367
experiences with, children with congenital heart disease, oral health and dental prevention 439
exteriorisation, the heart in two siblings 98

F

fast track recovery, school activities in children, minimally invasive cardiac surgery 44
fatal case of, idiopathic, restrictive cardiomyopathy 469
female athlete, young, exercise-induced left bundle branch block 367
fetal hydrops, successful management of, congenitally complete atrioventricular block 380
fetus and infant, echocardiographic study, tetralogy of Fallot 240
fistula, left coronary artery, left atrium, prenatal diagnosis 194
Fontan operation, systemic venous to pulmonary venous collaterals, characterization and treatment 424
future prospects for, current state of, cardiac transplantation in children 64

G

Glenn anastomosis, bidirectional
  assessing pulmonary vascular resistance 137
  atrial natriuretic peptides, palliative operation, functionally univentricular hearts 268

https://doi.org/10.1017/S104795110300129X Published online by Cambridge University Press

H
haemoptysis, patient with tetralogy of Fallot, combined surgical and interventional approach 571
Hall of Fame, paediatric cardiology, Yasunaru Kawashima 84
heart failure with carvedilol, modulation of neurohormonal activity, children 333
Helex Septal Occluder, closure of atrial septal defects, echocardiographic considerations 290
hemodilution, the effects of therapeutic, associated with erythrocytosis 544
histopathological follow-up, bailout stenting, postoperative stenosis, central aorto-pulmonary shunt 197
hoarseness, after pulmonary arterial stenting, occlusion of the arterial duct 302
human immunodeficiency virus, reversible cardiomyopathy, subsequent to perinatal infection 373
hypertrophic obstructive cardiomyopathy, coronary stenting, muscular bridge 377
hypertrophy in neonates, isolated right ventricular 384

I
idiopathic, restrictive cardiomyopathy, fatal case of 469
iloprost, persistent pulmonary hypertension, newborn 361
intravascular ultrasonic assessment, post-operative remodelling 53
infancy and childhood, pulmonary hypertension 219
infants, weighing less than 2500 grams, cardiac catheterisation 117
interatrial communication, vestibular defect, atrial septal component, derived from the vestibular spine 184
ischemia, due to peripartum cardiomyopathy, threatening loss of a leg 209
isolated pulmonary valvar stenosis, in childhood, percutaneous balloon valvoplasty 444

K
Kawasaki disease
  cerebral infarction 103
  percutaneous transluminal coronary angioplasty, for anastomotic stenosis, after coronary arterial bypass grafting 284
kinetics of procalcitonin, interleukin 6 and C-reactive protein, after cardiopulmonary-bypass, in children 161

L
left ventricular preparation, arterial switch, late referral 49
long-term follow-up, subclinical rheumatic valvitis 431

M
magnetic resonance imaging, three-dimensional
  congenital cardiac anomalies 461
  reconstruction from, congenitally malformed hearts 451
making of the heart, the quintessence 175
manipulating parallel circuits, perioperative management, patients with complex congenital cardiac disease 316
methotrexate, recurrent postpericardiotomy syndrome 206
minimally invasive cardiac surgery, clinical pathway, fast track recovery of school activities 44
mitral perforation, rare cause, congenital mitral regurgitation 472
mitral valvar disease in childhood, surgery for, choose reconstruction or repair? 337
mitral valve, replacement in a child, coronary arterial compression, treated by stenting 475
multiperforated atrial septal defect, transcatheter closure 200
murmur, persistently patent arterial duct, "The colonel is going to a dance" 559
myocardial function, effects of therapeutic beta blockade 36
muscular bridge, patient with hypertrophic obstructive cardiomyopathy, coronary stenting 377

N
neonates and young infants, born with extremely low weight, surgical management of congenital cardiac defects 328
neurohormonal activity, modulation of, treatment of children, heart failure with carvedilol 333
newborn, iloprost in, persistent pulmonary hypertension of 361
non-adjacent sinus of the pulmonary trunk, anomalous left coronary artery 95
noninvasive quantitative parameters, clinical follow-up, right ventricular function in congenital cardiac disease 397
normal patterns of flow, superior caval, hepatic and pulmonary veins, measured using Doppler echocardiography during childhood 143

O
occlusion of the arterial duct, pulmonary arterial stenting, hoarseness 302
one-stage versus two-stage surgical repair, children with congenital heart disease, parental preference 7
optimal timing of, Ross procedure, chronic aortic incompetence in the young 253
outcomes, aortic dissection in children and young adults 341
oval fossa, closure of defects, using the Amplatzer device, echocardiography recapitulates morphometry 352
oral health and dental prevention, children with congenital heart disease 439

P
paediatric cardiac catheterisation, Association for European Paediatric Cardiology, recommendations 582
palivizumab, as prophylaxis, against respiratory syncytial virus 420
palliative operation, brain and atrial natriuretic peptides, functionally univentricular hearts 268
parachute-like mitral valve, secondary to, Turner's syndrome 364
parental preference for one-stage versus two-stage surgical repair for children, congenital heart disease 7
partial trisomy, long arms of chromosomes 11 and 22, complex congenital cardiac disease 481
patients at risk, aortic dissection in children and young adults 341
patient-centred services 3
percutaneous balloon valvoplasty, pulmonary regurgitation, isolated pulmonary valvar stenosis, in childhood 444
percutaneous transluminal coronary angioplasty, anastomotic stenosis, coronary arterial bypass grafting 284
pericardial effusions, large, inflammatory origin in childhood 131
perinatal infection, human immunodeficiency virus, reversible cardiomyopathy 373
perioperative management, complex congenital cardiac disease, patients with, manipulating parallel circuits 316
peripartum cardiomyopathy, ischemia, threatening loss of a leg 209

https://doi.org/10.1017/S104795110300129X Published online by Cambridge University Press

persistently patent arterial duct, murmur, "The colonel is going to a dance" 559
peritoneal drainage, home, terminal right heart failure, complex congenital cardiac 568
pharmacological treatment, of young children, permanent junctional reciprocating tachycardia 408
post-operative remodelling, aortic coarctation, intravascular ultrasonic assessment 53
postoperative stenosis, central aorto-pulmonary shunt, histopathological follow-up, bailout stenting 197
postpericardiotomy syndrome, recurrent, methotrexate 206
prenatal diagnosis, tetralogy of Fallot, left coronary artery, left atrium 194
pre-pubescent female children, midaxillary lateral thoracotomy, closure of atrial septal defects 565
presymptomatic period, cardiac features, neonate with anomalous left coronary artery 579
prophylaxis against respiratory syncytial virus, palivizumab, in infants with congenital cardiac disease 420
prolongation, QT interval, amiodarone-induced 2 to 1 atrioventricular block 305
pulmonary arterial stenting, occlusion of the arterial duct 302
pulmonary atresia, computerised tomographic angiography, preoperative evaluation of an infant, tetralogy of Fallot 466
pulmonary hypertension
  circulating blood volumes, associated with erythrocytosis, effects of therapeutic hemodilution 544
  iloprost, persistent 361
  infancy and childhood 219
  parachute-like mitral valve, Turner's syndrome 364
pulmonary regurgitation, after percutaneous balloon valvoplasty, isolated pulmonary valvar stenosis, in childhood 444
pulmonary stenosis, critical, aortopulmonary window 484
pulmonary trunk, anomalous left coronary artery, in a neonate with, cardiac features in the presymptomatic period 579
pulmonary veins, right, diffuse varices 312
pulmonary vascular resistance, assessing, bidirectional Glenn anastomosis 137

Q

QT interval, prolongation of, amiodarone-induced 2 to 1 atrioventricular block 305

R

rapid disappearance, cardiac rhabdomyoma, infant 173
Rashkind, buttoned devices, transcatheter occlusion, moderate to large patent arterial ducts 413
replacement of the aortic valve, arterial switch operation 191
reciprocating tachycardia, pharmacological treatment, of young children 408
reconstruction or repair? mitral valvar disease, surgery 337
reconstruction for hypoplasia, staged, of the left heart, experience of 12 years 509
recurrent, postpericardiotomy syndrome, methotrexate 206
residual defects, predictors of, Amplatzer device, echocardiography recapitulates morphometry 352
respiratory syncytial virus, infants with congenital cardiac disease, palivizumab as prophylaxis against 420
restrictive cardiomyopathy, idiopathic, fatal case of 469
reversible cardiomyopathy, subsequent to perinatal infection, human immunodeficiency virus 373
rheumatic fever
  in the 21st century 491
  subclinical valvar disease, evaluation of 495
right heart, transcatheter reconstruction 308
right ventricular
  function, in congenital cardiac disease, clinical follow-up 397
  hypertrophy, in neonates, transient severe isolated 384
Ross procedure, optimal timing of, chronic aortic incompetence, in the young 253

S

school activities in children, minimally invasive cardiac surgery, clinical pathway, fast track recovery of 44
serum, of infants of, diabetic mothers, cardiac troponin-I 248
sinus of Valsalva in childhood, risk factors, echocardiographic presentations of endocarditis 168
subclinical rheumatic valvitis
  judging the improvement, criteria for 500
  long-term follow-up 431
subclinical valvar disease, evaluation of, patients with rheumatic fever 495
superior and inferior caval veins after construction, ratio of flow, bidirectional cavopulmonary anastomosis 123
surgical ligation, residually patent arterial duct, using transcatheter coils 574
surgical management, congenital cardiac defects, in neonates and young infants, low weight 328
surgical repair, tetralogy of Fallot, aortic stenosis 300
systemic inflammatory reaction, clinical implications, cardiac operations in children 228
systemic venous to pulmonary venous collaterals, characterization and treatment of, Fontan operation 424

T

tachycardia, permanent junctional reciprocating, pharmacological treatment 408
tension apparatus, duplication, tricuspid valve 106
terminal right heart failure, complex congenital cardiac disease, managed by home peritoneal drainage 568
tetralogy of Fallot
  aortic stenosis, uncomplicated surgical repair 300
  echocardiographic study, fetus and infant 240
  haemoptysis, combined surgical and interventional approach 571
  prenatal diagnosis, left coronary artery, left atrium 194
  pulmonary atresia, preoperative evaluation 466
  unusual interventional management 203
therapeutic hemodilution, the effects of, circulating blood volumes, in pulmonary hypertension 544
thoracic artery, internal, arteriovenous fistula 299
thoracic sequels after thoracotomies, children with congenital cardiac disease 264
threatening loss of a leg, peripartum cardiomyopathy, ischemia 209
three-dimensional, magnetic resonance imaging congenital cardiac anomalies 461
three-dimensional reconstruction, from magnetic resonance imaging, visualization of morphological details, congenitally malformed hearts 451

https://doi.org/10.1017/S104795110300129X Published online by Cambridge University Press

transcatheter closure, multiperforated atrial septal defect 200
transcatheter coils, surgical ligation, residually patent arterial duct 574
transcatheter occlusion, moderate to large patent arterial ducts, Amplatzer Duct Occluder 413
transcatheter reconstruction, right heart 308
transluminal coronary angioplasty, for anastomotic stenosis, after coronary arterial bypass grafting 284
transthoracic, three-dimensional echocardiography, prior to closure of atrial septal defects, children 58
treating seromas, simple method, modified Blalock-Taussig shunts 479
tuberous sclerosis, associated with, electrocardiographic changes, cardiac rhabdomyomas 258
Turner's syndrome, pulmonary hypertension, parachute-like mitral valve 364

U

unusual interventional management, tetralogy of Fallot 203
unusual variant, of anomalous systemic venous return 563

V

ventricular septal defect, right-sided diaphragmatic hernia 109
ventricular tachycardia in childhood, clonal translocation, cardiac fibroma 101
vestibular defect, interatrial communication, deficiency in atrial septal component, vestibular spine 184
views of parents concerning the planning of services, rehabilitation of families, children with congenital cardiac disease 20
views of young people with congenital cardiac disease, designing the services 11

W

Williams syndrome, cardiovascular findings, and clinical course 532

Y

Yasunaru Kawashima, *Hall of Fame*, paediatric cardiology 84
young female athlete, exercise-induced left bundle branch block 367

https://doi.org/10.1017/S104795110300129X Published online by Cambridge University Press
