CONFLICT AND CHANGE

Social and developmental psychology are often viewed as distinct subdisciplines, each with its own theories and methodologies. This book seeks to bridge that divide by proposing an integrative framework that considers various levels of analysis, from the individual to the societal. It emphasises the interplay of fundamental concepts such as intra- and intergroup conflict and change across these levels. By revisiting and renewing foundational theories of development, the book introduces the concept of 'genetic social psychology'. This approach is applied to the complex case of the Cyprus conflict, as well as other conflict and post-conflict scenarios, uncovering transformative possibilities for both theory and practice. Ultimately, this work advocates for a broader, more cohesive understanding of psychological processes in social contexts, addressing contemporary challenges and enhancing our grasp of human behaviour. This title is also available as open access on Cambridge Core.

CHARIS PSALTIS is Professor of Social and Developmental Psychology at the University of Cyprus. His books include *Social Relations in Human and Societal Development* (with Alex Gillespie and Anne-Nelly Perret-Clermont), *Interaction, Communication and Development* (with Anna Zapiti) and *History Education and Conflict Transformation* (with Mario Carretero and Sabina Čehajić-Clancy). In 2024 he received the International Society of Political Psychology (ISPP) Nevitt Sanford Award for his professional contributions to the field of political psychology.

BRADY WAGONER is Professor of Psychology at the University of Copenhagen, Aalborg University and Oslo New University College. His books include *The Constructive Mind: Bartlett's Psychology in Reconstruction*, *The Psychological of Radical Social Change* (with Fathali M. Moghaddam and Jaan Valsiner) and *Handbook of Culture and Memory*. He has received the Alexander von Humboldt Award in 2021 for his lifetime contributions to research.

The Progressive Psychology Book Series

This book is part of the Cambridge University Press book series, Progressive Psychology, edited by Fathali M. Moghaddam. As the science of human behavior, psychology is uniquely positioned and equipped to try to help us make more progress toward peaceful, fair, and constructive human relationships. However, the enormous resources of psychology have not been adequately or effectively harnessed for this task. The goal of this book series is to engage psychological science in the service of achieving more democratic societies, toward providing equal opportunities for all. The volumes in the series contribute in new and unique ways to highlight how psychological science can contribute to making justice a more central theme in health care, education, the legal system, and business, combatting the psychological consequences of poverty, ending discrimination and prejudice, better understanding the failure of revolutions and limits on political plasticity, and moving societies to more openness. Of course, these topics have been discussed before in scattered and ad hoc ways by psychologists, but now they are addressed as part of a systematic and cohesive series on Progressive Psychology.
