IT'S COMMUNICABLE

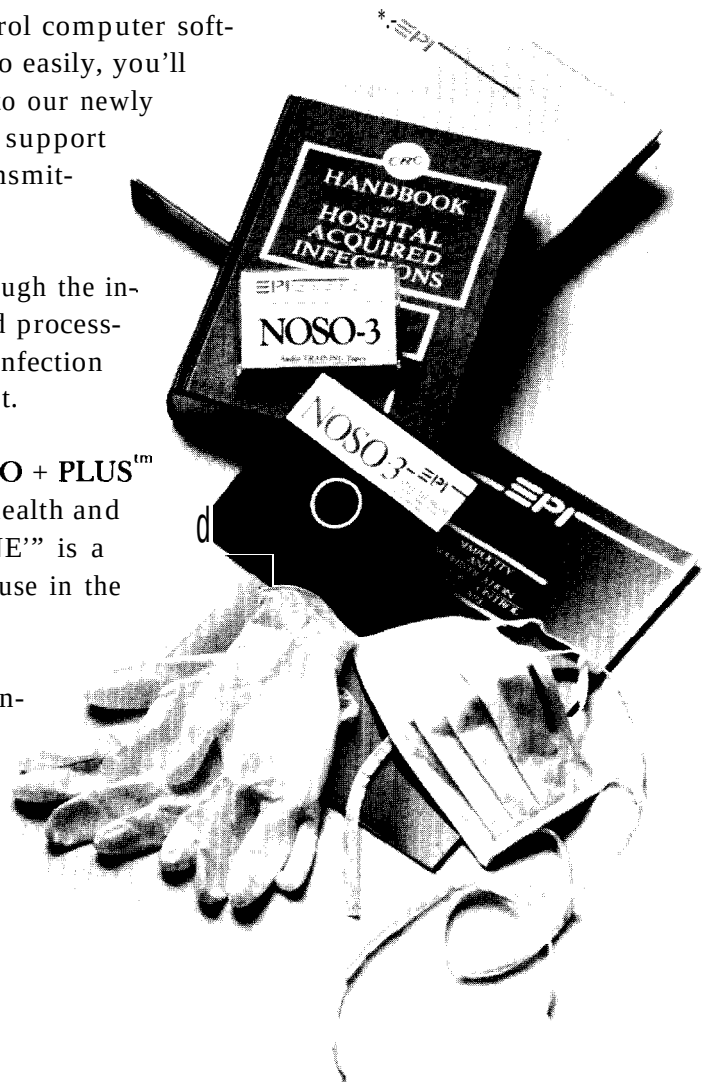

Don't be afraid of catching this one. It's painless; and once you've caught it, you'll wonder how you ever got along without it.

NOSO-3™, the first fully integrated infection control computer software package, will get into your system, so fast, so easily, you'll marvel at its simplicity. And with a little exposure to our newly developed audio cassette training tapes and visual support manual, computerized infection control will be transmitted to you in record time.

Ease of use, however, is where simplicity ends. Through the integration of data management, graphics, and word processing, **NOSO-3™** is the most powerful, most versatile infection control software for microcomputers on the market.

And for even more versatility, there are the **NOSO + PLUS™** applications for AIDS patient tracking, employee health and antibiotic utilization. In addition, **NOSO** ON-LINE'" is a complete policies and procedures manual, ready to use in the **NOSO-3™** Word Processor.

Contact us at EPI Systems, Inc. for a no-cost demonstration diskette and let us show you just how communicable **NOSO-3™** really is.

NOSO-3™ FEATURES

- Completely menu-driven
- Customized data entry screens
- On-screen help windows
- Kirby-Bauer or MIC susceptibility reporting
- User-defined line listings as well as 1-, 2-and 3-way cross tabulations
- Bar, line and pie charts
- Statistics including Fisher's exact and chi-square
- Word processing
- Database archiving
- Typeset user's manual

YOUR JOB CAN BE LESS OF A THREAT

"HANDS-OFF"

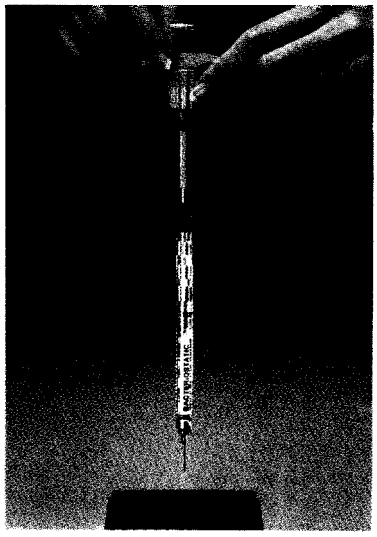

INJECTOR Tubex®

(closed injection system) Ayerst

TUBEX,® the unique, *safer,* hands-off injector that puts you farther from the needle and cartridge than any other injection system.

There's no touching.. .shaking. . . manipulation of cartridge or needle. Just twist and drop.

Nurses preferred TUBEX almost 3:1 for the prevention of accidental needle stick injuries in a study comparing TUBEX Injector and Carpuject.®*[1] Which is one more reason to

adopt TUBEX- the injection system designed as if your life depended on it.

FARTHER FROM THE POINT OF DANGER
