AGRAMMATIC APHASIA

A CROSS-LANGUAGE NARRATIVE SOURCEBOOK

Edited by

LISE MENN and LORAINE K. OBLER

Associate editor: GABRIELE MICELI

Editorial associate: Michael O'Connor

This major reference work fills a need long recognized but unmet in neurolinguistics: a source for analyzable speech transcripts from agrammatic aphasic patients that provides detailed grammatical descriptions and distributional analyses. Like nothing previously available, this three volume set presents narrative speech from carefully selected clinically-comparable patients — speakers of fourteen different languages — and parallel narratives by normal speakers.

The data have been collected according to a uniform protocol and analyzed by internationally recognized linguists, neurolinguists, speech pathologists, and psycholinguists — all of this coordinated by the editors at the Aphasic Research Center of the Boston University School of Medicine under the director, Harold Goodglass, and in consultation with the neurologist Gabriele Miceli.

COGNITIVE LINGUISTICS

This new journal presents a forum for all kinds of linguistic research on the interaction between language and cognition. Cognitive linguistics focusses on language as an instrument for organizing, processing, and conveying information, and the journal is devoted to high-quality research on topics such as:

- the structural characteristics of natural language categorization (such as prototypicality, cognitive models, metaphor, and imagery);
- the functional principles of linguistic organization (such as iconicity);
- the conceptual interface between syntax and semantics;
- the relationship between language and thought, including matters of universality and language specificity;
- the experiential background of language-in-use, including the cultural background, the discourse context, and the psychological environment of linguistic performance.

The journal has an explicitly interdisciplinary orientation, not only in the sense that cognitive linguistics tries to incorporate relevant research from other cognitive disciplines, but also because the journal will highlight the contribution of linguistics to Cognitive Science.

Markedness in Synchrony and Diachrony

1989. 15.5 x 23 cm. X, 412 pages. With 2 illustrations.
Cloth US $ 108.00 ISBN 0-89925-504-3
(Trends in Linguistics. Studies and Monographs 39)

This collection of 19 papers deals with markedness, which refers to opposition in language units of any kind: sounds, words, sentences, or structural parts of sentences. Originally the theory dealt primarily with phonology, but syntactic issues now prevail.

The collection presents a synthesis of current, for the most part European, work on markedness. The development is traced, and the basic pertinent notions are redefined in the light of current trends in linguistics.

Foundations of Axiomatic Linguistics

1989. 15.5 x 23 cm. XII, 475 pages.
Cloth. US $ 120.00 ISBN 0-89925-323-7
(Trends in Linguistics. Studies and Monographs 40)

This work presents a new theoretical approach to the study of languages, and differs from other approaches in three major respects.

The methodology of the theory, a variant of Popper's hypothetico-deductive method, could be termed "negativist", in order to differentiate it from the "positivist" tradition the author sees as prevalent in European and American linguistics. The theory is axiomatically based, closely reasoned, and simple in relation to its adequacy, thus making it a powerful theory. Finally, the theory, in close conjunction with the methodology, is the sole instrument in the description of languages.

Illustrated by examples from European and Oriental languages, the work gives a comprehensive introduction to the theory, deals with phonology and morphology (in chapter V), and discusses syntax in general, as well as presenting a detailed description of English syntax (chapters VI and VII). The "sentential level" is also covered (chapter VI) while chapter VIII presents the axioms and definitions, i. e., the whole of the theory in compact form.

Language Change

Contributions to the Study of Its Causes

1989. 15.5 x 23 cm. VIII, 281 pages.
Cloth. US $ 77.00 ISBN 0-89925-564-7
(Trends in Linguistics. Studies and Monographs 43)

This collection of 11 papers reflects the recent upsurge of interest in historical linguistics, delving into the complex causes not only of phonological change, but of language change in general.

This work draws on the developments and expansion of disciplines such as sociolinguistics, language contact research, communication theory, child language and creole studies, together with innovations in the study of language-internal developments as well as in the study of language universals and linguistic typology.

Data are drawn from a variety of languages and language types but all focus on the causes of language change.

The New Sound of Indo-European

Essays in Phonological Reconstruction

1989. 15.5 x 23 cm. XVI, 300 pages.
Cloth. US $ 84.00 ISBN 0-89925-521-3
(Trends in Linguistics. Studies and Monographs 41)

The 30 articles and discussion papers in this volume address two of the most influential theories in the field of Indo-European phonology, the Laryngeal Theory and the Glottalic Theory.

Most papers analyze and support versions of these theories, but there are also some which defend more traditional reconstructions or alternative views. Since both theories will remain major research areas in the future, many discussions in Indo-European phonology will start from the contributions to this volume. The stimulus for this collection was provided by the international workshop "Reconstructions of the Proto-Indo-European sound system and their consequences" which took place in connection with the Seventh International Conference for Historical Linguistics in Pavia in 1985.

Discourse Pragmatics and Semantic Categorization

The Case of Negation and Tense-Aspect with Special Reference to Swahili

1989. 15.5 x 23 cm. XII, 205 pages. With 2 illustrations.
Cloth. US $ 59.50 ISBN 0-89925-436-5
(Discourse Perspectives on Grammar 1)

This research monograph deals with a widespread but neglected phenomenon, the affirmative-negative tense-aspect asymmetry. This neglect may stem from the assumption that negative sentences, like negative logical propositions, merely assert that the corresponding affirmatives are false.

A semantic analysis of discourse shows that several factors, including pragmatic differences between affirmative and negative utterances in discourse, differences of value, or number and type of oppositions within a particular semantic domain, all affect this relationship in natural languages.

The phenomenon of affirmative-negative asymmetry is characteristic of the Niger-Congo languages of sub-Saharan Africa, with Swahili an "extreme case" in that it has distinct verbal paradigms for affirmative and negative.

Interlinguistics

Aspects of the Science of Planned Languages

1989. 15.5 x 23 cm. X, 348 pages.
Cloth. US $ 90.00 ISBN 0-89925-548-5
(Trends in Linguistics. Studies and Monographs 42)

Interlinguistics is the branch of language science that deals with planned languages. About a thousand projects of constructed languages are known. Some of them have grown into communicative use, Esperanto being by now the best known and most widely spread planned language.

This volume is addressed both to those who know nothing about interlinguistics and to those who are looking for an up-to-date overview of this branch of science. It contains contributions on interlinguistics in Europe, Asia, and America and covers a wide range of specific approaches to planned languages.

Athapaskan Linguistics

Current Perspectives on a Language Family

1989. 15.5 x 23 cm. VIII, 645 pages. With 1 map.
Cloth. US $ 132.00 ISBN 0-89925-282-6
(Trends in Linguistics. State-of-the-Art Reports 16)

This volume represents an attempt to show the present state of the art in the study of this group of Native American languages spoken in a large part of Alaska, as well as on the California coast and the American Southwest (including such languages as Navajo, Apache, and Hupa). These languages are characterized by a particularly complex verb morphology.

The lengthy introduction by the editors gives a general overview of areas that have been important in the field of Athapaskan studies in the past 25 years, and provides the reader with the context in which the following contributions can be seen. The papers themselves deal with diachronic linguistics, phonology and morphology, syntax, discourse and ethnolinguistics, and have been prepared by leading scholars in the field.

1989. 23 x 15.5 cm. XVI, 502 pages.
Cloth US $ 120.00 ISBN 0-89925-519-1
(Contributions to the Sociology of Language 55)

This collection of 39 contributions by 37 authors was prepared in memory of the late Stanley Newman. Work by Newman himself is also included.

The work of Stanley Newman (1905–1984) spanned six decades of this century, beginning with his early work with Edward Sapir up to his terms as Vice-President and President-elect of the Linguistic Society of America. During his career he worked on many languages and language families of North America and Mexico.

This volume represents a segment of the history of the unfolding of linguistics in the United States, covering a wide range of linguistic topics, from phonology and grammar to oral traditions and ethnological studies.

Cloth. US $ 108.00 ISBN 0-89925-513-2
(Contributions to the Sociology of Language 53)

This collection of articles sets out to examine verbal and written exchanges in English when they occur in the context of conflicting community norms. Complex sociolinguistic situations arise when the use of English by non-native speakers leads to a false sense of mutual intelligibility.

The papers, prepared by scholars from all over the world, are grouped into four sections according to the type of sociolinguistic situation that creates the communicative interference, and contain work from the areas of pragmatics, sociology of language, dialectology and sociolinguistic variation, and social psychology. Both micro-studies of intercultural communication and studies of the macro-processes that affect intercultural communication are included.

Working with Language

A Multidisciplinary Consideration of Language Use in Work Contexts

1989. 15.5 x 23 cm. XII, 617 pages. With 20 illustrations.
Cloth. US $ 132.00 ISBN 0-89925-466-7
(Contributions to the Sociology of Language 52)

This collection of 19 papers presents new insights into various aspects of language use in work contexts which are wide ranging methodologically, geographically and in occupational terms. Thus, evidence presented comes not only from North America and Western Europe, but also from countries from Peru to Japan. A wide range of occupations is considered, ranging from airline pilots and medical researchers to teachers, civil servants and even ragpickers. This collection appears at a time when the nature of work as full-time paid employment is being questioned, both in industrialized and agricultural societies, and shows the necessity of reconsidering the relationship between language and work by those concerned with language use in work contexts.

The Politics of Language Purism

1989. 15.5 x 23 cm. VI, 250 pages. With 1 illustration.
Cloth. US $ 71.50 ISBN 0-89925-483-7
(Contributions to the Sociology of Langua[illegible] · 54)

In this collection of invited papers, linguistic, sociolinguistic, literary and political approaches have been brought together to describe and analyze language purism and its purposes. In the 13 contributions these approaches are combined with observations and case studies from different countries.

Purism is present in all cultural activities to a degree, since it asserts a society's sense of uniqueness and authenticates tradition. Purism of language identifies and differentiates users of one language from those of another, and it provides not only the ideology but also the idiom and the basis of evaluation for language correction in discourse to constitute "pure" language and to demarcate it from "impure" language.

Symbolic Values of Foreign Language Use

From the Japanese Case to a General Sociolinguistic Perspective

1989. 15.5 x 23 cm. XIV, 291 pages. With 52 illustrations.
Cloth. US $ 77.00 ISBN 0-89925-485-3
(Contributions to the Sociology of Language 51)

This research monograph describes the role of world languages in symbolic functions in societies where these languages are non-native. Because of the cultural contrasts, the role of English in Japan is of particular interest.

The symbolic value of English, for example, is its use as a symbol of modernity, whereas French expresses elegance, femininity and refined taste and German has the connotation of "Gemütlichkeit". These phenomena are viewed within a sociolinguistic framework of language attitudes and cultural stereotypes.

The symbolic functions of foreign languages in communities of non-native speakers can be understood as a reflection of a worldwide trend towards internationalization. This work provides a model for the analysis of such functions.

MULTILINGUA

Journal of cross-cultural and interlanguage communication

Editor-in-Chief: **Richard J. Watts,** University of Berne, Switzerland

MULTILINGUA was first published in 1981. As of 1987, Volume 6, the journal has been reconstituted under a new editorial board redirecting its scope to cross-cultural and interlanguage communication.

MULTILINGUA is an international, interdisciplinary journal aimed at the enhancement of cross-cultural understanding through the study of interlanguage communication. To this end it publishes articles and short notes in fields as diverse as cross-cultural differences in linguistic politeness phenomena, variety in what is traditionally regarded as one culture, conversational styles and the linguistic description of nonstandard, oral varieties of language, strategies for the organization of verbal interaction, intracultural linguistic variety, communication breakdown, translation, information technology, and modern methods for managing and using multilingual tools.

MULTILINGUA considers contributions in the form of empirical observational studies, theoretical studies, theoretical discussions, presentations of research, short notes, reactions to recent articles, book reviews, and letters to the editor.

MULTILINGUA is published in four issues per volume (approx. 448 pages).

Language Awareness

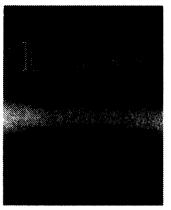

Fifth Edition

Edited by PAUL ESCHHOLZ, ALFRED ROSA, and VIRGINIA CLARK, all of the University of Vermont

A freshman composition reader that brings together 53 nontechnical essays exploring the subject of language. These lively, topically organized essays cover a broad range of practical language issues, including political propaganda, advertising, euphemisms, the "decline" of English, and racism and sexism. Headnotes, "Questions and Content," "Questions on Rhetoric," vocabulary lists, and "Writing Topics" accompany each reading; useful lists of writing topics are provided at the end of each thematic section; and a glossary of Rhetorical terms is included. The Fifth Edition features 26 new readings; a new section on media and language; and expanded coverage of advertising, sexism, and political propaganda.

Contemporary Linguistics

AN INTRODUCTION

WILLIAM O'GRADY and MICHAEL DOBROVOLSKY, both of the University of Calgary
MARK ARONOFF, State University of New York at Stony Brook

Comprehensive and up to date, *Contemporary Linguistics* introduces students to every area of linguistics and prepares them to go on to more advanced work in those areas. "Modular" arrangement of the material facilitates use of the book in courses at various levels and with differing emphases. Each chapter provides in-depth coverage of a *specific* area of linguistics. The full and carefully developed end-of-chapter apparatus includes summaries highlighting important terms and concepts, additional source information, recommended readings, and questions designed to test and reinforce material presented in the chapter.

The Origins of Writing

Edited by Wayne M. Senner

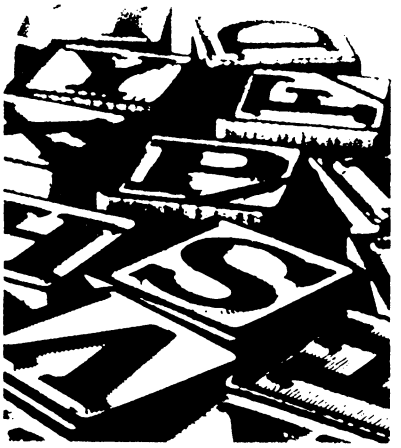

"A splendid overview of the state of the art. This lively topic continues to challenge new generations of professionals and amateurs alike." – Gregory Nagy, Harvard University. Long shrouded in myth and speculation, the origins of writing have only recently been freed from racial and national bias to become a subject of careful objective study. Historians, linguists, and archaeologists have accumulated abundant new information about the development and spread of writing systems, but until now no single book has attempted to survey and compare the evidence, theories, and conclusions emerging from the various specialties. In *The Origins of Writing* leading American scholars present the essential story of how and why the world's major writing systems in the Middle East, the Far East, Europe, and Central America came into existence. It will be welcomed by all readers who seek to understand civilization's debt to writing. December. $35.00

SEARCHING FOR ABORIGINAL LANGUAGES

Memoirs of a Field Worker

R. M. W. Dixon

"It is a reminder that linguistics is a very human subject. . . . The book has the merits of an autobiography and a travelogue, in both cases fluently written; but its further dimension, its linguistic interest, makes it a travelogue of the mind richer insight into Aboriginal life than is usually available."

Theoretical Perspectives on Language Deficits
Yosef Grodzinsky

"Grodzinsky's study marks a significant advance ... showing how questions of major importance concerning language structure can be illuminated by carefully designed studies of deficit ... an important and promising contribution."—Noam Chomsky
208 pp. $25.00 (February)

Descriptions
Stephen Neale

Neale provides the first sustained defense and extension of Bertrand Russell's theory, placing it in the center of a theory of singular and nonsingular descriptive phrases and anaphoric pronouns.

He presents an illuminating discussion of the history of the Theory of Descriptions, of the central issues confronting it, of its place in a general theory of natural language quantification, and of its relevance to contemporary semantic theories.

From Reading to Neurons
edited by Albert M. Galaburda, M.D.

Contributions in this book apply recent advances in neurobiology, developmental neuropathology, behavioral neurology, psycholinguistics, and computational models of learning and cognition to outstanding questions about the acquisition of language in humans. Special emphasis is placed on dyslexia and related developmental disorders.
568 pp. $45.00 (January)

Learnability and Cognition
The Acquisition of Argument Structure
Steven Pinker

In tackling a learning paradox that has challenged scholars for more than a decade, Pinker synthesizes a vast literature in the fields of linguistics and psycholinguistics, outlining explicit theories of the mental representation, the learning, and the development of verb meaning and syntax.

"Pinker's book is a monumental piece of work."
—Ray Jackendoff, Brandeis University.
