# From the journals . . .

## Applied Artificial Intelligence

**Vol. 15 No. 6**
**Articles**
The virtual other: Aspects of social interaction with synthetic characters
*S Payr*
Conceptual modeling of multimedia objects for user-tailored information presentations
*G Vouros*
A stroke-based neuro-fuzzy system for handwritten Chinese character recognition
*JW Lin, SJ Lee and HT Yang*
Using statutes-based IR to drive legal CBR
*MT Elhadi*
**Vol. 15 No. 7**
**Articles**
A novel hybrid genetic algorithm using local optimizer based on heuristic pattern move
*YG Xu, GR Li and ZP Wu*
Cooling load prediction in a district heating and cooling system through simplified robust filter and multilayered neural network
*M Sakawa, K Kato and S Ushiro*
A new method for generating fuzzy rules from numerical data for handling classification problems
*SM Chen, SH Lee and CH Lee*
Personalized web-document filtering using reinforcement learning
*BT Zhang and YW Seo*
**Vol. 15 No. 8**
**Articles**
Machine learning in computer vision
*F Esposito and D Malerba*
Learning spatio-temporal relational structures
*WF Bischof and T Caelli*
A vision system for symbolic interpretation of dynamic scenes using ARSOM
*A Chella, D Guarino, I Infantino and R Pirrone*
A trainable system for grading fish from images
*F Odone, E Trucco and A Verri*
Improving the accuracy of decision tree induction by feature preselection
*P Perner*
A model of abstraction in visual perception
*L Saitta and JD Zucker*
Vision system development by machine learning: Mashing assessment in brewing
*A Song, V Ciesielski and P Rogers*

## Applied Intelligence

**Vol. 15 No. 3**
**Articles**
Simulated evolution and learning: An introduction
*X Yao and RI McKay*
Robust evolution strategies
*K Ohkura, Y Matsumura and K Ueda*
Adapting self-adaptive parameters in evolutionary algorithms
*KH Liang, X Yao and CS Newton*
Scaling up inductive logic programming: An evolutionary wrapper approach
*PGK Reiser and PJ Riddle*
A memetic approach to the nurse rostering problem
*E Burke, P Cowling, P De Causmaecker and GV Berghe*

## Artificial Intelligence

**Vol. 130 No. 2**
**Articles**
Influence-based model decomposition for reasoning about spatially distributed physical systems
*C Bailey-Kellogg and F Zhao*
Robust combinatorial auction protocol against false-name bids
*M Yokoo, Y Sakurai and S Matsubara*
The MIT encyclopedia of the cognitive sciences
*C Carr*
The MIT encyclopedia of the cognitive sciences
*BJ Dorr*
The MIT encyclopedia of the cognitive sciences
*P Husbands*
The MIT encyclopedia of the cognitive sciences
*G Lakoff*
The MIT encyclopedia of the cognitive sciences
*Y Okamoto*
The MIT encyclopedia of the cognitive sciences
*DM Peterson*
The scope of the cognitive sciences: Reply to 6 reviews of The MIT Encyclopedia of the Cognitive Sciences
*FC Keil*
The cognitive sciences: A comment on 6 reviews of The MIT Encyclopedia of the Cognitive Sciences
*RA Wilson*
**Vol. 131 Nos. 1–2**
**Articles**
The Qualification Problem: A solution to the problem of anomalous models
*M Thielscher*
Evaluating general purpose automated theorem proving systems
*G Sutcliffe, C Suttner*
Dynamic tunneling based regularization in feedforward neural networks
*YP Singh and P RoyChowdhury*
Planning the project management way: Efficient planning by effective integration of causal and resource reasoning in RealPlan
*B Srivastava, S Kambhampati and MB Do*

https://doi.org/10.1017/S0269888901000273 Published online by Cambridge University Press

A comparison of point-based approaches to qualitative temporal reasoning
*J Delgrande, A Gupta and T Van Allen*
On functional dependencies in q-Horn theories
*T Ibaraki, A Kogan and K Makino*
"Field Reviews": A new style of review article for Artificial Intelligence
*AG Cohn and D Perlis*
On the state of the art in machine learning: A personal review
*PA Flach*
Author's response to reviews of Machine Learning
*T Mitchell*

**Vol. 132 No. 1**
**Articles**
Artificial nonmonotonic neural networks
*B Boutsinas and MN Vrahatis*
Computer go: An AI oriented survey
*B Bouzy and T Cazenave*
Determining if conflict-directed backjumping visits a given node is NP-hard
*BSW Schroder*

## Artificial Intelligence in Engineering

**Vol. 15 No. 2**
**Articles**
Conceptual modeling in design
*M Rosenman and SJ Simoff*
Phenomenological foundations of conceptual product modelling in architecture, engineering and construction
*Z Turk*
Incremental modelling of ambiguous geometric ideas (I-MAGI): representation and maintenance of vague geometry
*SW Lim, BS Lee and AHB Duffy*
Some conceptual issues in component-assembly modelling
*M Rosenman and SJ Simoff*
Design ontology in context – a situated cognition approach to conceptual modelling
*D Richards and SJ Simoff*
Knowledge level model of an individual designer as an agent in collaborative distributed design
*FMT Brazier, LV Moshkina and NJE Wijngaards*
Knowledge modeling for design decisions
*F Mili, W Shen, I Martinez, P Noel, M Ram and E Zouras*
Conceptual modeling for configuration of mass-customizable products
*A Felfernig, G Friedrich and D Jannach*
Development of a maintenance management model based on IAI standards
*MA Hassanain, TM Froese and DJ Vanier*
A model-driven approach to the development of an architectural object model
*A Hendricx and H Neuckermans*
Conceptual modeling from natural language functional specifications
*A Gangopadhyay*
Generating code for engineering design systems using software patterns
*J Peckham and B MacKellar*

## Artificial Intelligence Review

**Vol. 16 No. 2**
**Articles**
Efficient case-based structure generation for design support
*K Borner*
Current directions in computational humour
*G Ritchie*
Conceptual spaces for computer vision representations
*A Chella, M Frixione and S Gaglio*
Scalable parallel genetic algorithms
*W Rivera*

**Vol. 16 No. 3**
**Articles**
Understanding the crucial role of attribute interaction in data mining
*AA Freitas*
Incremental evolution in ANNs: Neural nets which grow
*C MacLeod and GM Maxwell*
Goal-seeking behavior in a connectionist model
*TE Portegys*

## Expert Systems With Applications

**Vol. 21 No. 1**
**Articles**
Quasi-optimal case-selective neural network model for software effort estimation
*ES Jun and JK Lee*
GART: a tool for experimenting with approximate reasoning models
*P Baroni, G Guida and M Zanella*
Neural networks as a tool for developing and validating business heuristics
*S Walczak*
A study on time series pattern extraction and processing for competitive intelligence support
*ST Yuan and MZ Huang*

**Vol. 21 No. 2**
**Articles**
If you are a dog lover, build expert systems; if you are a cat lover, build neural networks
*J Liebowitz*
A knowledge-based system to assist university administrators in meeting disability act requirements
*EW Stein, MP Manco and SA Manco*
ALEES: an agricultural loan evaluation expert system
*K Bryant*
Knowledge based approach for productivity adjusted construction schedule
*AN Mohamed*
Knowledge-based parametric design of mechanical products based on configuration design method
*S Myung and SH Han*

https://doi.org/10.1017/S0269888901000273 Published online by Cambridge University Press

# IEEE Transactions on Knowledge and Data Engineering

**Vol. 13 No. 4**
**Articles**

A new approach to online generation of association rules
*CC Aggarwal and PS Yu*
Toward multidatabase mining: Identifying relevant databases
*H Liu, HJ Lu and J Yao*
A parametric approach to deductive databases with uncertainty
*LVS Lakshmanan and N Shiri*
Locating objects in mobile computing
*E Pitoura and G Samaras*
Segmented Information Dispersal (SID) data layouts for digital video servers
*A Cohen and WA Burkhard*
A spatio-temporal semantic model for multimedia database systems and multimedia information systems
*SC Chen and RL Kashyap*
Performance analysis of distributed deadlock detection algorithms
*S Lee and JL Kim*
Criss-cross hash joins: Design and analysis
*RD Gopal, R Ramesh and S Zionts*
SEE: A spatial exploration environment based on a direct-manipulation paradigm
*SR Kaushik and EA Rundensteiner*
SQL/SDA: A query language for supporting spatial data analysis and its Web-based implementation
*H Lin and B Huang*
Toward Web-based application management systems
*A Gal and J Mylopoulos*
DOLPHIN: Digital online library providing human-like interactive navigation
*Y Seki and T Hidaka*
A dynamic manifestation approach for providing universal access to digital library objects
*NR Adam, V Atluri, I Adiwijaya, S Banerjee and R Holowczak*

**Vol. 13 No. 5**
**Articles**

Introduction to the Special Section on the Fifth International Workshop on Multimedia Information Systems
*L Golubchik, SK Tripathi and VJ Tsotras*
Scheduling algorithms for the broadcast delivery of digital products
*JL Wolf, MS Squillante, JJ Turek, PS Yu and J Sethuraman*
Minimizing bandwidth requirements for on-demand data delivery
*D Eager, M Vernon and J Zahorjan*
Indexing animated objects using spatiotemporal access methods
*G Kollios, VJ Tsotras, D Gunopulos, A Delis and M Hadjieleftheriou*
Constructing communication subgraphs and deriving an optimal synchronization interval for distributed virtual environment systems
*JCS Lui*
Hierarchical case-based reasoning integrating case-based and decompositional problem-solving techniques for plant-control software design
*B Smyth, MT Keane and P Cunningham*
Nondeterministic, nonmonotonic logic databases
*F Giannotti, G Manco, M Nanni and D Pedreschi*
A query model to synthesize answer intervals from indexed video units
*S Pradhan, K Tajima and K Tanaka*
A graph-based approach for discovering various types of association rules
*SJ Yen and ALP Chen*
Learning similarity matching in multimedia content-based retrieval
*JH Lim, JK Wu, S Singh and D Narasimhalu*
Scalable color image indexing and retrieval using vector wavelets
*E Albuz, E Kocalar and AA Khokhar*
Integrating security and real-time requirements using covert channel capacity (vol 12, pg 865, 2000)
*SH Son, R Mukkamala and R David*

# IEEE Transactions on Neural Networks

**Vol. 12 No. 4**
**Articles**

Introduction to the special issue on neural networks in financial engineering
*YS Abu-Mostafa, AF Atiya, M Magdon-Ismail and H White*
Statistical inference, the bootstrap, and neural-network modeling with application to foreign exchange rates
*H White and J Racine*
Semiparametric ARX neural-network models with an application to forecasting inflation
*XH Chen, J Racine and NR Swanson*
The equivalent martingale measure: An introduction to pricing using expectations
*M Magdon-Ismail*
Regression methods for pricing complex American-Style options
*JN Tsitsiklis and B Van Roy*
Evolutionary computation and the vega risk of American put options
*C Keber and MG Schuster*
Risk-neutral density extraction from option prices: Improved pricing with mixture density networks
*C Schittenkopf and G Dorffner*
Pricing and hedging derivative securities with neural networks: Bayesian regularization, early stopping, and bagging
*R Gencay and M Qi*
Multiagent modeling of multiple FX-markets by neural networks
*HG Zimmermann, R Neuneier and R Grothmann*
Computational learning techniques for intraday FX trading using popular technical indicators
*MAH Dempster, TW Payne, Y Romahi and GWP Thompson*
Modeling exchange rates: Smooth transitions, neural networks, and linear models
*MC Medeiros, A Veiga and CE Pedreira*
Multiresolution forecasting for futures trading using wavelet decompositions
*BL Zhang, R Coggins, MA Jabri, D Dersch and B Flower*
Optimization of trading physics models of markets
*L Ingber and RP Mondescu*
Financial model calibration using consistency hints
*YS Abu-Mostafa*

https://doi.org/10.1017/S0269888901000273 Published online by Cambridge University Press

Financial time series prediction using least squares support vector machines within the evidence framework
*T Van Gestel, JAK Suykens, DE Baestaens, A Lambrechts, G Lanckriet, B Vandaele, B De Moor and J Vandewalle*
BYY harmony learning, independent state space, and generalized APT financial analyses
*L Xu*
Forecasting volatility with neural regression: A contribution to model adequacy
*APN Refenes and WT Holt*
Financial volatility trading using recurrent neural networks
*P Tino, C Schittenkopf and G Dorffner*
Learning to trade via direct reinforcement
*J Moody and M Saffell*
Cost functions and model combination for VaR-based asset allocation using neural networks
*N Chapados and Y Bengio*
A comparison of nonlinear methods for predicting earnings surprises and returns
*V Dhar and DS Chou*
A comparison of linear and nonlinear statistical techniques in performance attribution
*NH Chan and CR Genovese*
Bankruptcy prediction for credit risk using neural networks: A survey and new results
*AF Atiya*
Bankruptcy analysis with self-organizing maps in learning metrics
*S Kaski, J Sinkkonen and J Peltonen*

**Vol. 12 No. 5**
**Articles**

Theoretical properties of recursive neural networks with linear neurons
*M Bianchini, M Gori and F Scarselli*
Geometric neural computing
*EJ Bayro-Corrochano*
Shared kernel models for class conditional density estimation
*MK Titsias and AC Likas*
Aitken-based acceleration methods for assessing convergence of multilayer neural networks
*RS Pilla, SV Kamarthi and BG Lindsay*
Nonlinear system modeling via knot-optimizing B-Spline networks
*KFC Yiu, S Wang, KL Teo and AC Tsoi*
Classification of noisy signals using fuzzy ARTMAP neural networks
*D Charalampidis, T Kasparis and M Georgiopoulos*
Using localizing learning to improve supervised learning algorithms
*S Weaver, L Baird and M Polycarpou*
Weighted least squares training of support vector classifiers leading to compact and adaptive schemes
*A Navia-Vazquez, F Perez-Cruz, A Artes-Rodriguez and AR Figueiras-Vidal*
Multiwavelet neural network and its approximation properties
*LC Jiao, J Pan and YW Fang*
A neural network for shortest path computation
*F Araujo, B Ribeiro and L Rodrigues*
A new gradient-based neural network for solving linear and quadratic programming problems
*Y Leung, KZ Chen, YC Jiao, XB Gao and KS Leung*
Perceiving geometric patterns: From spirals to inside-outside relations
*K Chen and DL Wang*
Adaptive observer backstepping control using neural networks
*JY Choi and JA Farrell*
Control of a class of nonlinear discrete-time systems using multilayer neural networks
*S Jagannathan*
Neural-network control of mobile manipulators
*S Lin and AA Goldenberg*
Weighted centroid neural network for edge preserving image compression
*DC Park and YJ Woo*
Vector quantization of images using modified adaptive resonance algorithm for hierarchical clustering
*N Vlajic and HC Card*
Prediction of noisy chaotic time series using an optimal radial basis function neural network
*H Leung, T Lo and SC Wang*
Classification of freeway traffic patterns for incident detection using constructive probabilistic neural networks
*X Jin, D Srinivasan and RL Cheu*
Adaptive pattern recognition in the analysis of cardiotocographic records
*O Fontenla-Romero, A Alonso-Betanzos and B Guijarro-Berdinas*
Temporal updating scheme for probabilistic neural network with application to satellite cloud classification – Further results
*MR Azimi-Sadjadi, WF Gao, TH Vonder Haar and D Reinke*
Neural computation approach for developing a 3-D shape reconstruction model
*SY Cho and TWS Chow*
A cross-associative neural network for SVD of nonsquared data matrix in signal processing
*DZ Feng, Z Bao and XD Zhang*
Improving Leung's bidirectional learning rule for associative memories
*B Lenze*
An improved Voronoi-diagram-based neural net for pattern classification
*C Gentile and M Sznaier*
Efficient training of RBF neural networks for pattern recognition
*F Lampariello and M Sciandrone*
Cooperative updating in the Hopfield model
*T Munehisa, M Kobayashi and H Yamazaki*
A neural network with asymmetric basis functions for feature extraction of ECG P waves
*ED Botter, CL Nascimento and T Yoneyama*
The generalization error of the symmetric and scaled support vector machines
*JF Feng and P Williams*
Relaxation of the stability condition of the complex-valued neural networks
*DL Lee*
Some queries on "Comments on 'Approximation capability in C((R)over-bar(n)) by multilayer feedforward networks and related problems' "
*TP Chen*

# IEEE Transactions on Pattern Analysis and Machine Intelligence

**Vol. 23 No. 8**
**Articles**

Hybrid evolutionary search method based on clusters
*M Li and HY Tam*
Unsupervised segmentation of color-texture regions in images and video
*YN Deng and BS Manjunath*
The trace transform and its applications
*A Kadyrov and M Petrou*
N-dimensional tensor voting and application to epipolar geometry estimation
*CK Tang, G Medioni and MS Lee*
Using association rules as texture features
*JA Rushing, HS Ranganath, TH Hinke and SJ Graves*

https://doi.org/10.1017/S0269888901000273 Published online by Cambridge University Press

A combined latent class and trait model for the analysis and visualization of discrete data
*A Kaban and M Girolami*
Event detection and analysis from video streams
*G Medioni, I Cohen, F Bremond, S Hongeng and R Nevatia*
Genetic algorithm wavelet design for signal classification
*E Jones, P Runkle, N Dasgupta, L Couchman and L Carin*
On active camera control and camera motion recovery with foveate wavelet transform
*J Wei and ZN Li*
On fusers that perform better than best sensor
*NSV Rao*
Minimum-entropy data partitioning using reversible jump Markov chain Monte Carlo
*SJ Roberts, C Holmes and D Denison*
Multiple illuminant direction detection with application to image synthesis
*YF Zhang and YH Yang*
Q-warping: Direct computation of quadratic reference surfaces
*A Shashua and Y Wexler*

**Vol. 23 No. 9**
**Articles**

On the pattern recognition of noisy subsequence trees
*BJ Oommen and RKS Loke*
SIMPLIcity: Semantics-sensitive integrated matching for picture libraries
*JZ Wang, J Li and G Wiederhold*
A fast nearest-neighbor algorithm based on a principal axis search tree
*J McNames*
Multispace KL for pattern representation and classification
*R Cappelli, D Maio and D Maltoni*
Hidden Markov models with patterns to learn Boolean vector sequences and application to the built-in self-test for integrated circuits
*L Brehelin, O Gascuel and G Caraux*
Offline general handwritten word recognition using an approximate BEAM matching algorithm
*JT Favata*
A simple strategy for calibrating the geometry of light sources
*MW Powell, S Sarkar and D Goldgof*
Sectored snakes: Evaluating learned-energy segmentations
*SD Fenster and JR Kender*
Curvature estimation in oriented patterns using curvilinear models applied to gradient vector fields
*J van de Weijer, LJ van Vliet, PW Verbeek and M van Ginkel*
Laminae-based feature recognition
*T Lim, J Corney and DER Clark*

**Vol. 23 No. 10**
**Articles**

Introduction to the special section on graph algorithms in computer vision
*S Dickinson, M Pelillo and R Zabih*
Self-organization in vision: Stochastic clustering for image segmentation, perceptual grouping, and image database organization
*Y Gdalyahu, D Weinshall and M Werman*
Globally optimal regions and boundaries as minimum ratio weight cycles
*IH Jermyn and H Ishikawa*
Efficient matching and indexing of graph models in content-based retrieval
*S Berretti, A Del Bimbo and E Vicario*
A graph-based method for face identification from a single 2D line drawing
*JZ Liu and YT Lee*
Structural graph matching using the EM algorithm and singular value decomposition
*B Luo and ER Hancock*
Symbol recognition by error-tolerant subgraph matching between region adjacency graphs
*J Llados, E Marti and JJ Villanueva*
On median graphs: Properties, algorithms, and applications
*XY Jiang, A Munger and H Bunke*
A dyadic wavelet affine invariant function for 2D shape recognition
*MI Khalil and MM Bayoumi*
A combination fingerprint classifier
*A Senior*
Toward machine emotional intelligence: Analysis of affective physiological state
*RW Picard, E Vyzas and J Healey*
Font recognition based on global texture analysis
*Y Zhu, TN Tan and YH Wang*
Snakes on the watershed
*J Park and JM Keller*

---

# IEEE Transactions on Robotics and Automation

**Vol. 17 No. 3**
**Articles**

A solution to the simultaneous localization and map building (SLAM) problem
*MWMG Dissanayake, P Newman, S Clark, HF Durrant-Whyte and M Csorba*
Optimization of the simultaneous localization and map-building algorithm for real-time implementation
*JE Guivant and EM Nebot*
Computing the sensory uncertainty field of a vision-based localization sensor
*A Adam, E Rivlin and I Shimshoni*
Automatic data segmentation for geometric feature extraction from unorganized 3-D coordinate points
*JB Huang and CH Menq*
Planning walking patterns for a biped robot
*Q Huang, K Yokoi, S Kajita, K Kaneko, H Arai, N Koyachi and K Tanie*
Double active universal joint (DAUJ): Robotic joint mechanism for humanlike motions
*S Ryew and H Choi*
Singularity analysis of a class of composite serial in-parallel robots
*N Simaan and M Shoham*
Optimizing fixture layout in a point-set domain
*MY Wang and DM Pelinescu*
Scheduling in dual gripper robotic cells for productivity gains
*SP Sethi, JB Sidney and C Sriskandarajah*
Deadlock detection, prevention, and avoidance for automated tool sharing systems
*NZ Gebraeel and MA Lawley*
Positioning of toleranced parts in a 2-D polygonal assembly and its use in tolerance analysis
*B Li and U Roy*
Analytical time optimal control solution for a two-link planar acrobot with initial angular momentum
*T Mita, SH Hyon and TK Nam*
Design of steering mechanism and control of nonholonomic trailer systems
*Y Nakamura, H Ezaki, Y Tan and W Chung*

**Vol. 17 No. 4**
**Articles**

Cobot architecture
*MA Peshkin, JE Colgate, W Wannasuphoprasit, CA Moore, RB Gillespie and P Akella*
A general framework for cobot control
*RB Gillespie, JE Colgate and MA Peshkin*

https://doi.org/10.1017/S0269888901000273 Published online by Cambridge University Press

Kinematic controllability for decoupled trajectory planning in underactuated mechanical systems
*F Bullo and KM Lynch*
Singularity analysis of three-legged parallel robots based on passive-joint velocities
*GL Yang, IM Chen, W Lin and J Angeles*
Design and analysis of a redundantly actuated parallel mechanism for rapid machining
*J Kim, FC Park, SJ Ryu, J Kim, JC Hwang, C Park and CC Iurascu*
Sensor-based construction of a retract-like structure for a planar rod robot
*H Choset and JY Lee*
Set membership localization of mobile robots via angle measurements
*A Garulli and A Vicino*
Development of an ultrasonic motor as a fine-orienting stage
*E Purwanto and S Toyama*
Customer demand satisfaction in production systems: A due-time performance approach
*JS Li and SM Meerkov*
Design criteria for developing an automated live-bird transfer system
*KM Lee*
Autonomous vehicle navigation utilizing electrostatic potential fields and fuzzy logic
*NC Tsourveloudis, KP Valavanis and T Hebert*
Smooth motion planning for car-like vehicles
*F Lamiraux and JP Laumond*
Automatic camera calibration for a multiple-sensor integrated coordinate measurement system
*TS Shen and CH Menq*
A new partitioned approach to image-based visual servo control
*PI Corke and SA Hutchinson*
Computation of 3-D form-closure grasps
*D Ding, YH Liu and SG Wang*
A closed-form forward kinematics solution for the 6–6(p) Stewart platform
*P Ji and HT Wu*
Forward/inverse force transmission capability analyses of fully parallel manipulators
*HS Kim and YJ Choi*
Fast versions of the Gilbert-Johnson-Keerthi distance algorithm: Additional results and comparisons
*CJ Ong and EG Gilbert*

## International Journal of Computer Vision

**Vol. 43 No. 3**
**Articles**
Untitled – Introduction
*JJ Clark*
Active shape-from-shadows with controlled illuminant trajectories
*JJ Clark and L Wang*
Face recognition using the discrete cosine transform
*ZM Hafed and MD Levine*
Active object recognition: Looking for differences
*FG Callari and FP Ferrie*
On the sequential accumulation of evidence
*T Arbel and FP Ferrie*
**Vol. 44 No. 1**
**Articles**
Recognition, resolution, and complexity of objects subject to affine transformations
*M Betke and NC Makris*
Implementing a multi-model estimation method
*T Vieville, D Lingrand and F Gaspard*
Catadioptric stereo using planar mirrors
*J Gluckman and SK Nayar*

## International Journal of Intelligent Systems

**Vol. 16 No. 8**
**Articles**
Processing of domain experts' knowledge for development of a KBS for risk analysis
*D Janjanam*
Integrating WordNet knowledge to supplement training data in semi-supervised agglomerative hierarchical clustering for text categorization
*M Benkhalifa, A Mouradi and H Bouyakhf*
Discover dependency pattern among attributes by using a new type of nonlinear multiregression
*KB Xu, ZY Wang, ML Wong and KS Leung*
Comparison of the performances of decision aimed algorithms with Bayesian and beliefs basis
*F Delmotte*
Systematic design method of stabilization fuzzy controllers for pendulum systems
*JQ Yi, N Yubazaki and K Hirota*
Product category description for web-shopping in e-commerce
*RR Yager and G Pasi*
**Vol. 16 No. 9**
**Articles**
Knowledge discovery in a direct marketing case using least squares support vector machines
*S Viaene, B Baesens, T Van Gestel, JAK Suykens, D Van den Poel, J Vanthienen, B De Moor and G Dedene*
A neural network approach to tiling problems
*T Tambouratzis*
Computational verb systems: The paradox of the liar
*T Yang*
A comparison of active set method and genetic algorithm approaches for learning weighting vectors in some aggregation operators
*D Nettleton and V Torra*
Financial laws as algebraic automata
*SC Rambaud and JG Perez*
**Vol. 16 No. 10**
**Articles**
Fusion: General concepts and characteristics
*A Appriou, A Ayoun, S Benferhat, P Besnard, L Cholvy, R Cooke, F Cuppens, D Dubois, H Fargier, M Grabisch, R Kruse, J Lang, S Moral, H Prade, A Saffiotti, R Smets and C Sossai*
Situation assessment based on spatially ambiguous multisensor measurements
*A Appriou*
Data association in multi-target detection using the transferable belief model
*A Ayoun and P Smets*
Conference paper assignment
*S Benferhat and J Lang*
Merging databases: Problems and examples

**Articles**
Untitled
*A Dolgui and P Lacomme*
A two phase optimization method for Petri net models of manufacturing systems
*A Zimmermann, D Rodriguez and M Silva*
A simulation optimization approach in production planning of failure prone manufacturing systems
*JP Kenne and A Gharbi*
A Web-based tool and a heuristic method for cooperation of manufacturing supply chain decisions
*D Li, A Mckay, A De Pennington and C Barnes*
High performing evolutionary techniques for solving complex location problems in industrial system design
*BK Cheung, A Langevin and B Villeneuve*
A multiple objective grouping genetic algorithm for assembly line design
*B Rekiek, P De Lit, F Pellichero, T L'Eglise, P Fouda, E Falkenauer and A Delchambre*
A hospital facility layout problem finally solved
*PM Hahn and J Krarup*
A tabu search heuristic for the single vehicle pickup and delivery problem with time windows
*A Landrieu, Y Mati and Z Binder*
A Hybrid approach for integer programming combining genetic algorithms, linear programming and ordinal optimization
*YC Luo, M Guignard and CH Chen*
An optimization methodology for intermodal terminal management
*LM Gambardella, M Mastrolilli, AE Rizzoli and M Zaffalon*
A taboo search approach for deadlock-free scheduling of automated manufacturing systems
*Y Mati, N Rezg and XL Xie*

# Journal of Symbolic Computation

**Vol. 32 Nos. 1–2**
**Special issue on computer algebra and mechanized reasoning: Selected St. Andrews' ISSAC/Calculemus 2000 contributions**
Foreword
*T Recio and M Kerber*
Electronic communication of mathematics and the interaction of computer algebra systems and proof assistants
*H Barendregt and AM Cohen*
Algorithms for finite near-rings and their N-groups
*F Binder and P Mayr*
Two computational techniques for singularity resolution
*G Bodnar and J Schicho*
Formal and efficient primality proofs by use of computer algebra oracles
*O Caprotti and M Oostdijk*
On efficient sparse integer matrix Smith normal form computations
*JG Dumas, BD Saunders and G Villard*
Constructing homomorphism spaces and endomorphism rings
*EL Green, LS Heath and CA Struble*
The parametrization of canal surfaces and the decomposition of polynomials into a sum of two squares
*G Landsmann, J Schicho and F Winkler*
Computing isomorphisms of association schemes and its application
*I Miyamoto*
Commutative algebra in the Mizar system
*P Rudnicki, C Schwarzweller and A Trybulec*
**Vol. 32 No. 3**
**Articles**
Counting points on curves and Abelian varieties over finite fields
*LM Adleman and MD Huang*
Squarefree decomposition of univariate polynomials depending on a parameter. Application to the integration of parametric rational functions
*GM Diaz-Toca and L Gonzalez-Vega*
Computing local integral closures
*E Hallouin*
Symbolic reachability computation for families of linear vector fields
*G Lafferriere, GJ Pappas and S Yovine*
Constructing irreducible representations of finitely presented algebras
*ES Letzter*
Computing the radical of an ideal in positive characteristic
*R Matsumoto*
Condensation of symmetrized tensor powers
*AJE Ryba*

https://doi.org/10.1017/S0269888901000273 Published online by Cambridge University Press

Solving the word problem for two classes of non-associative rings by rewriting
*A Widiger*
**Vol. 32 No. 4**
**Special Issue on Calculemus-99: Integrating Computation and Deduction**
Foreword of the guest editors
*A Armando, T Jebelean*
The control layer in open mechanized reasoning systems: Annotations and tactics
*A Armando, A Coglio, F Giunchiglia and S Ranise*
Automatic derivation of the irrationality of e
*M Beeson*
On the role of OpenMath in interactive mathematical documents
*O Caprotti and AM Cohen*
MBASE: Representing knowledge and context for the integration of mathematical software systems
*M Kohlhase and A Franke*
A general framework to build contextual cover set induction provers
*S Stratulat*

## Knowledge-Based Systems

**Vol. 14 Nos. 5–6**
**Special issue: knowledge-based systems in China**
Editorial
*S Feng, HZ Li and LD Xu*
An object-oriented intelligent design tool to aid the design of manufacturing systems
*S Feng, LX Li and Cen L*
An agent-based geographical information system
*C Tang, LD Xu and S Feng*
A new type of recurrent fuzzy neural network for modeling dynamic systems
*SM Zhou and LD Xu*
Feature space theory – a mathematical foundation for data mining
*HX Li and LD Xu*
Information visualization for intelligent decision support systems
*T Li, S Feng and LX Li*
An object-oriented intelligent CAD system for ceramic kiln
*ZB Chen and LD Xu*
An integrated knowledge-based system for grasslands ecosystems
*LD Xu, N Liang and Q Gao*
Dynamic modelling with an integrated ecological knowledge-based system
*Q Gao, LD Xu and N Liang*
Scheduling railway freight cars
*GY Geng and LX Li*
Development of a KBS for managing bank loan risk
*BA Yang, LX Li, QH Xie and J Xu*
An early warning system for loan risk assessment using artificial neural networks
*BA Yang, LX Li and J Xu*

## Kybernetes

**Vol. 30 Nos. 5–6**
**Articles**
Gordon Pask, remembered and celebrated: Part I – Preface
*BH Rudall*
Gordon Pask, remembered and celebrated: Part I – Introduction
*B Scott and R Glanville*
A message from Elizabeth Pask
*E Pask*
About Gordon Pask
*R Glanville and B Scott*
The poet of cybernetics
*A Andrew*
Voices of sanity in the conversation of psychotherapy
*G Barnes*
A filigree friendship
*S Beer*
Reflections on the conversation theory of Gordon Pask
*G Boyd*
The extraordinary Gordon Pask
*P Cook*
Consensus measurement in multi-participant conversations
*A Dirkzwager*
Working with Gordon Pask: some personal impressions
*M Elstob*
Styles of learning and approaches to studying in higher education
*N Entwistle*
The increasing relevance of Pask's work to modern information seeking and use
*N Ford*
On Gordon Pask
*H von Foerster*
Fond memories of Gordon Pask
*K Forsythe*
The cybernetics of architecture: a tribute to the contribution of Gordon Pask
*JH Frazer*
And he was magic
*R Glanville*
On Gordon Pask
*N Green*
A letter from Dik Gregory
*D Gregory*
Memories of Gordon
*RL Gregory*
Gordon Pask at the Open University
*D Hawkridge*
Bootstrapping knowledge representations – From entailment meshes via semantic nets to learning webs
*F Heylighen*
My Paskalia and the genesis of the Christman IntelligenTree
*Y Hayut-Man*
The Robbins problem: computer proofs and human proofs
*LH Kauffman*
For Gordon: some comments on architecture and its context
*R Landau*
Gordon Pask memorial speech: contributions to educational technology
*D Laurillard*
Gordon Pask
*J Littlewood*
Learning and teaching machines and conversation theory – Some contemporary implications and ideas for research
*AJ Mayne*
Some memories of Gordon
*H Moore*
The limits of social conversation – A sociological approach to Gordon Pask's conversation theory
*P Navarro*
Gordon Pask: an appreciation
*T O'Shea*

https://doi.org/10.1017/S0269888901000273 Published online by Cambridge University Press

Thoughtsticker 1986 – A personal history of conversation theory in software, and its progenitor, Gordon Pask
*P Pangaro*
Intelligent tutoring: from SAKI to Byzantium
*A Patel, B Scott and Kinshuk*
Gordon Pask
*C Price*
Adaptive recommendation and open-ended semiosis
*LM Rocha*

## Machine Learning

**Vol. 45 No. 1**
**Articles**
Random forests
*L Breiman*
On the VC dimension of bounded margin classifiers
*D Hush and C Scovel*
Iterated phantom induction: A knowledge-based approach to learning control
*M Brodie and G DeJong*
Optimizing epochal evolutionary search: Population-size dependent theory
*E Van Nimwegen and JP Crutchfield*
**Vol. 45 No. 2**
**Articles**
Learning with maximum-entropy distributions
*Y Mansour and M Schain*
Robust learning with missing data
*M Ramoni and P Sebastiani*
A simple generalisation of the area under the ROC curve for multiple class classification problems
*DJ Hand and RJ Till*
Predicting the future of discrete sequences from fractal representations of the past
*P Tino and G Dorffner*
Reinterpreting the category utility function
*B Mirkin*
**Vol. 45 No. 3**
**Articles**
Efficient construction of regression trees with range and region splitting
*Y Morimoto, H Ishii and S Morishita*
Using iterated bagging to debias regressions
*L Breiman*
Accelerating EM for large databases
*B Thiesson, C Meek and D Heckerman*
Relative loss bounds for multidimensional regression problems
*J Kivinen and MK Warmuth*
**Vol. 46 Nos. 1–3**
**Articles**
Kernel methods: Current research and future directions
*N Cristianini, C Campbell and C Burges*
On a connection between kernel PCA and metric multidimensional scaling
*CKI Williams*
Bayesian methods for support vector machines: Evidence and predictive class probabilities
*P Sollich*
Hierarchical learning in polynomial support vector machines
*S Risau-Gusman and MB Gordon*
A probabilistic framework for SVM regression and error bar estimation
*JB Gao, SR Gunn, CJ Harris and M Brown*
On the dual formulation of regularized linear systems with convex risks
*T Zhang*
Choosing multiple parameters for support vector machines
*O Chapelle, V Vapnik, O Bousquet and S Mukherjee*
Training invariant support vector machines
*D Decoste and B Scholkopf*
Support vector machines for classification in nonstandard situations
*Y Lin, Y Lee and G Wahba*
An analytic center machine
*TB Trafalis and AM Malyscheff*
Linear programming boosting via column generation
*A Demiriz, KP Bennett and J Shawe-Taylor*
Large scale kernel regression via linear programming
*OL Mangasarian and DR Musicant*
Efficient SVM regression training with SMO
*GW Flake and S Lawrence*
A simple decomposition method for support vector machines
*CW Hsu and CJ Lin*
Feasible direction decomposition algorithms for training support vector machines
*P Laskov*
Convergence of a generalized SMO algorithm for SVM classifier design
*SS Keerthi and EG Gilbert*
The relaxed online maximum margin algorithm
*Y Li and PM Long*
Gene selection for cancer classification using support vector machines
*I Guyon, J Weston, S Barnhill and V Vapnik*
Text categorization with support vector machines. How to represent texts in input space?
*E Leopold and J Kindermann*

## New Generation Computing

**Vol. 19 No. 4**
**Articles**
Biomolecular realizations of a parallel architecture for solving combinatorial problems
*T Head*
Logic-based genetic programming with definite clause translation grammars
*BJ Ross*
From eager to lazy constrained data acquisition: A general framework
*P Mello, M Milano, M Gavanelli, E Lamma, M Piccardi and R Cucchiara*
Trends of internet auctions and agent-mediated Web commerce
*M Yokoo and S Fujita*
