Creativity at the metalevel – AAAI-2000 presidential address
BG Buchanan
A gamut of games
J Schaeffer
AIPS'00 Planning Competition – The Fifth International Conference on Artificial Intelligence Planning and Scheduling Systems
F Bacchus
FF – The fast-forward planning system
J Hoffmann
The GRT planner
I Refanidis and I Vlahavas
MIPS – The model-checking integrated planning system
S Edelkamp and M Helmert
A planner called R
FZ Lin
Heuristic search planner 2.0
B Bonet and H Geffner
STAN4 – A hybrid planning strategy based on subproblem abstraction
M Fox and D Long
TOKENPLAN – A planner for both satisfaction and optimization problems
Y Meiller and P Fabiani
ALTALT – Combining graphplan and heuristic state search
B Srivastava, X Nguyen, S Kambhampati, MB Do, U Nambiar, ZQ Nie, R Nigenda and T Zimmerman
The SHOP planning system
D Nau, Y Cao, A Lotem and H Munoz-Avila
TALPLANNER – A temporal logic-based planner
P Doherty and J Kvarnstrom
Planning in the fluent calculus using binary decision diagrams
HP Storr
RIACS workshop on the verification and validation of autonomous and adaptive systems
C Pecheur, W Visser and R Simmons
AAAI 2000 fall symposium series reports
CP Rose, R Freedman, M Bauer, C Rich, I Horswill, A Schultz, M Freed, A Vera and K Dautenhahn
AAAI 2001 Spring Symposium Series reports
L Fesq, E Atkins, L Khatib, C Pecheu, PR Cohen, LA Stein, M van Lent, J Laird, A Provetti and ST Cao
Vol. 22 No. 4
Special issue on intelligent user interfaces
Introduction
J Lester
Collagen – Applying collaborative discourse theory to human-computer interaction
C Rich, CL Sidner and N Lesh
Toward conversational human-computer interaction
JF Allen, DK Byron, M Dzikovska, G Ferguson, L Galescu and A Stent
Intelligent tutoring systems with conversational dialogue
AC Graesser, K VanLehn, CP Rose, PW Jordan and D Harter
Controlling the behavior of animated presentation agents in the interface – Scripting versus instructing
E Andre and T Rist
Embodied conversational agents – Representation and intelligence in user interfaces
J Cassell
Pedagogical agent research at CARTE
WL Johnson
Interface agents in model world environments
RS Amant and RM Young
Agent-centered search
S Koenig
On the origin of environments by means of natural selection
M Sipper
Vol. 23 No. 1

Articles
Editorial
D Leake
Specifying rules for electronic auctions
PR Wurman, MP Wellman and WE Walsh
AI and agents – State of the art
E Alonso
Support vector machines and kernel methods – The new generation of learning machines
N Cristianini and B Scholkopf
AI and music – From composition to expressive performance
RL de Mantaras and JL Arcos
An AI-based approach to destination control in elevators
J Koehler and D Ottiger
The timing of bids in Internet auctions – Market design, bidder behavior, and artificial agents
A Ockenfels and AE Roth
Leveled-commitment contracting – A backtracking instrument for multiagent systems
T Sandholm and V Lesser
Strategic design of mobile agents
N Vulkan
Vol. 23 No. 4
Articles
The promise of immaculate AI
CH Smith
MiTAP for biosecurity – A case study
L Damianos, J Ponte, S Wohlever, F Reeder, D Day, G Wilson and L Hirschman
Staff scheduling for inbound call centers and customer contact centers
A Fukunaga, E Hamilton, J Fama, D Andre, O Matan and I Nourbakhsh
Information self-service with a knowledge base that learns
SD Durbin, D Warner, HN Richter and Z Gedeon
Training and using DISCIPLE agents – A case study in the military center of gravity analysis domain
G Tecuci, M Boicu, D Marcu, B Stanescu, C Boicu and J Comello
Applying perceptually driven cognitive mapping to virtual urban environments
RW Hill, CH Han and M van Lent
Computational vulnerability analysis for information survivability
H Shrobe
In memory of Ray Reiter (1939–2002)
F Pirri, G Hinton and H Levesque
Intelligent integration of information and services on the web
E Stroulia

Applied Artificial Intelligence

Vol. 16 Nos. 9–10
Articles
Engineering agent systems: Best of "from agent theory to agent implementation (AT2AI)–3"
P Petta and JP Muller
What agent middleware can (and should) do for you
A Poggi, G Rimassa and P Turci
Multi-agent corporate memory management system
F Gandon, A Poggi, G Rimassa and P Turci
Coordination tools for MAS development and deployment
E Denti, A Omicini and A Ricci
The design of Communicative Act Libraries: A linguistic perspective
JM Serrano and S Ossowski
An observation approach to the semantics of agent communication languages
M Viroli and A Omicini
The role of reflection in simulating and testing agents: An exploration based on the simulation system James
AM Uhrmacher, M Rohl and B Kullick
Interfacing INDIGOLOG and OAA: A toolkit for advanced multiagent applications
A Lapouchnian and Y Lesperance
Heterogeneous agents situated in heterogeneous spaces
S Bandini, S Manzoni and C Simone
Multi-dimensional matchmaking for electronic markets
DJ Veit, C Weinhardt and JP Muller
Vol. 17 No. 1
Articles
The virtual university's faculty: An overview of educational agents
S Payr
An adaptive social network for information access: Theoretical and experimental results
B Yu, M Venkatraman and MP Singh
Emergent computation using a new model of cellular automata
Y Hassan and E Tazaki
What does AI contribute to hydrology? Aerial photos and flood levels
D Raclot and C Puech

Applied Intelligence

Vol. 18 No. 1
Articles
Incorporating ancestors' influence in Genetic Algorithms
S Ghosh, A Ghosh and SK Pal
A novel self-organizing neural network for motion segmentation
G Cirrincione and M Cirrincione
Fast learning algorithms for feedforward neural networks
MH Jiang, G Gielen, B Zhang and ZS Luo
EDEN: An intelligent software environment for diagnosis of discrete-event systems
G Lamperti and M Zanella
Mining fuzzy multiple-level association rules from quantitative data
TP Hong, KY Lin and BC Chien
Identifying approximate itemsets of interest in large databases
CQ Zhang, SH Zhang and GI Webb
Ant colony optimization with global pheromone evaluation for scheduling a single machine
D Merkle and M Middendorf
Vol. 18 No. 2
Articles
Scoring the data using association rules
B Liu, YM Ma and CK Wong
Embedding branch and bound within evolutionary algorithms
C Cotta and JM Troya
Fuzzy control of HVAC systems optimized by genetic algorithms
R Alcala, JM Benitez, J Casillas, O Cordon and R Perez

https://doi.org/10.1017/S0269888903000663 Published online by Cambridge University Press

Fuzzy inductive learning strategies
CH Wang, CR Tsai, TP Hong and SS Tseng
Image processing using RBF like neural networks: A ZISC-036-based fully parallel implementation solving real world and real complexity industrial problems
K Madani, G De Tremiolles and P Tannhof
Change detection in overhead imagery using neural networks
C Clifton

Artificial Intelligence

Vol. 142 No 1
Articles
An information-based neural approach to generic constraint satisfaction
H Jonsson and B Soderberg
Process algebras for systems diagnosis
L Console, C Picardi and M Ribaudo
Complexity results for structure-based causality
T Eiter and T Lukasiewicz
Vol. 142 No. 2
Special issue on the International Conference on MultiAgent systems 2000 July 2000, Boston, MA, USA
Untitled
E Durfee, S Kraus, H Nakashima and M Tambe
Multiagent control of self-reconfigurable robots
F Bojinov, A Casal and T Hogg
Plan coordination by revision in collective agent-based systems
H Tonino, A Bos, M de Weerdt and C Witteveen
The influence of social norms and social consciousness on intention reconciliation
BJ Grosz, S Kraus, DG Sullivan and S Das
Believing others: Pros and cons
S Sen
Using similarity criteria to make issue trade-offs in automated negotiations
P Faratin, C Sierra and NR Jennings
Surplus equivalence of leveled commitment contracts
T Sandholm and YH Zhou
Defection-free exchange mechanisms based on an entry fee imposition
S Matsubara and M Yokoo
Vol. 143 No. 1
Articles
On the evaluation of agent behaviors
AD Mali
Approximate inference in Boltzmann machines
M Welling and YW Teh
Converting numerical classification into text classification
SA Macskassy, H Hirsh, A Banerjee and AA Dayanik
Uniform semantic treatment of default and autoepistemic logics
M Denecker, VW Marek and M Truszczynski
Maximum likelihood bounded tree-width Markov networks
N Srebro
Three perspectives of data mining
ZH Zhou

Artificial Intelligence Review

Vol. 18 Nos. 3–4
Articles
Editorial
P Cunningham and R Burke
Acquiring customers' requirements in electronic commerce
R Bergmann and P Cunningham
simVar: A similarity-influenced question selection criterion for E-sales dialogs
S Schmitt
ExpertClerk: A conversational case-based reasoning tool for developing salesclerk agents in E-commerce webshops
H Shimazu
Interactive critiquing for catalog navigation in E-commerce
R Burke
An expressive query language for Product Recommender Systems
D Bridge and A Ferguson
A generalised approach to similarity-based retrieval in recommender systems
D McSherry

Engineering Applications of Artificial Intelligence

Vol. 15 No. 2
Articles
Machine learning and data mining MLDM in pattern recognition – Editorial
P Perner and U Zscherpel
Concepts learning with fuzzy clustering and relevance feedback
B Bhanu and AL Dong
Towards self-exploring discriminating features for visual learning
Y Wu and TS Huang
Local learning framework for handwritten character recognition
JX Dong, A Krzyzak and CY Suen
Discovery of symmetry by voting method
A Imiya, T Ueno and I Fermin
An efficient statistical method for subpixel optical flow detection
A Imiya, K Iwawaki and K Kawamoto
Information-statistical approach for temporal-spatial data with application
BK Sy and AK Gupta
Are case-based reasoning and dissimilarity-based classification two sides of the same coin?
P Perner
Image mining: issues, framework, a generic tool and its application to medical-image diagnosis
P Perner
Vol. 15 Nos. 3–4
Articles
Driving situation recognition with uncertainty management and rule-based systems
JM Nigro, S Loriette-Rougegrez and M Rombaut
A neural network-based obstacle-navigation animat in a virtual environment
MJ Aiktenhead and AJS McDonald
Optimization techniques applied to multiple manipulators for path planning and torque minimization
DP Garg and M Kumar
Neural network-based EKG pattern recognition
SY Foo, G Stuart, B Harvey and A Meyer-Baese
Neural inverse modeling and control of a base-excited inverted pendulum
Q Wu, N Sepehri and S He

https://doi.org/10.1017/S0269888903000663 Published online by Cambridge University Press

Neural network classifiers applied to condition monitoring of a pneumatic process valve actuator
M Karpenko and N Sepehri
MRCD: a genetic algorithm for multiobjective robust control design
A Herreros, E Baeyens and JR Peran
Tool wear monitoring using genetically-generated fuzzy knowledge bases
S Achiche, M Balazinski, L Baron and K Jemielniak
Classification of turbulent flow patterns with fuzzy clustering
A Vernet and GA Kopp
Topology design of switched enterprise networks using a fuzzy simulated evolution algorithm
H Youssef, SM Sait and SA Khan
Communications structure for sensory data in mobile robots
JL Posadas, P Perez, JE Simo, G Benet and F Blanes
Dichromatic color perception: a fast alternative for machine vision systems
C Conklin, R Watkins, S Foo, G Brooks, R Roberts and R Perry
Tabu search-based circuit optimization
SM Sait and MM Zahra
A case-based reasoning system for conflict resolution: design and implementation
S Ross, LP Fang and KW Hipel

Expert Systems With Applications

Vol. 23 No. 4
Articles
Software engineering and knowledge engineering
N Juristo and ST Acuna
A formal framework for multi-agent systems analysis and design
P Gruer, V Hilaire, A Koukam and K Cetnarowicz
Ontologies for information management: balancing formality, stability, and sharing scope
L van Elst and A Abecker
Combining expert knowledge and data mining in a medical diagnosis domain
F Alonso, JP Caraca-Valente, AL Gonzalez and C Montes
Image mining by content
A Conci and EMMM Castro
Towards a flexible deployment of business rules
D Rosca and C Wild
Designing reusable rule-based architectures with design patterns
MAF de Souza and MAGV Ferreira
Supporting software development through declaratively codified programming patterns
K Mens, I Michiels and R Wuyts
Vol. 24 No. 1
Articles
A cognitive map simulation approach to adjusting the design factors of the electronic commerce web sites
KC Lee and S Lee
Mining stock price using fuzzy rough set system
YF Wang
GEDAS: an integrated geographical expert database system
IV Filis, M Sabrakos, CP Yialouris, AB Sideridis and B Mahaman
Explaining and justifying the advice of a decision support system: a natural language generation approach
KN Papamichail and S French
Automatic knowledge acquisition tool for irrigation and fertilization expert systems
A Rafea, H Hassen and M Hazman
Knowledge management-enabled health care management systems: capabilities, infrastructure, and decision-support
R Bose
Application of a hybrid genetic algorithm and neural network approach in activity-based costing
KJ Kim and I Han
The impact of problem domains and knowledge acquisition techniques: a content analysis of P/OM expert system case studies
WP Wagner, QB Chung and MK Najdawi
A hybrid expert system for finite element modeling of fuselage frames
SX Li and MG Qiao
An intelligent tutoring system for turbine startup training of electrical power plant operators
MAA Lopez, CH Flores and EG Garcia
Hypermedia modeling for linking knowledge to data warehousing system
J Kim, W Suh and H Lee
Impact of momentum bias on forecasting through knowledge discovery techniques in the foreign exchange market
SH Chun and SH Kim
A fuzzy expert system for site characterization
ZY Hu, CW Chan and GH Huang
MASSE: a relational expert system for industrial site selection
F Witlox

IEEE Transactions on Knowledge and Data Engineering

Vol. 14 No. 6
Articles
Causal maps: Theory, implementation, and practical applications in multiagent environments
B Chaib-draa
Differential A*
KI Trovato and L Dorst
Local reasoning and knowledge compilation for efficient temporal abduction
L Console, P Terenziani and DT Dupre
Specifying and enforcing association semantics via ORN in the presence of association cycles
BK Ehlmann, GA Riccardi, ND Rishe and JY Shi
Binary rule generation via hamming clustering
M Muselli and D Liberati
Algorithms for finding attribute value group for binary segmentation of categorical databases
Y Morimoto, T Fukuda and T Tokuyama
Efficient queries over Web views
G Mecca, AO Mendelzon and P Merialdo
Parallel Star Join plus DataIndexes: Efficient query processing in data warehouses and OLAP
A Datta, D VanderMeer and K Ramamritham
Coordinated placement and replacement for large-scale distributed caches
MR Korupolu and M Dahlin
Transaction processing in mobile, heterogeneous database systems
JB Lim and AR Hurson
A methodology to retrieve text documents from multiple databases
C Yu, KL Liu, Meng WY, ZH Wu and N Rishe
Applications of abduction: Testing very long qualitative simulations
T Menzies, RF Cohen, S Waugh and S Goss

https://doi.org/10.1017/S0269888903000663 Published online by Cambridge University Press

An approach of implementing general learning companions for problem solving
CY Chou, TW Chan and CJ Lin
Exploiting data mining techniques for broadcasting data in mobile computing environments
Y Saygin and O Ulusoy
Efficient join-index-based spatial-join processing: A clustering approach
S Shekhar, CT Lu, S Chawla and S Ravada
A statistical method for estimating the usefulness of text databases
KL Liu, C Yu, WY Meng, WS Wu and N Rishe
Vol. 15 No. 1
Articles
Effective scheduling of detached rules in active databases
S Ceri, C Gennaro, S Paraboschi and G Serazzi
Rough-fuzzy MLP: Modular evolution, rule generation, and evaluation
SK Pal, S Mitra and P Mitra
Supporting movement pattern queries in user-specified scales
YY Qu, CZ Wang, L Gao and XS Wang
Efficient mining of intertransaction association rules
AKH Tung, HJ Lu, JW Han and L Feng
Alternative interest measures for mining associations in databases
ER Omiecinski
Developing data allocation schemes by incremental mining of user moving patterns in a mobile computing system
WC Peng and MS Chen
Using fuzzy linguistic representations to provide explanatory semantics for data warehouses
L Feng and TS Dillon
Formalizing an engineering approach to cooperating knowledge-based systems
SM Deen and CA Johnson
Association and content-based retrieval
C Djeraba
Semantic abstractions in the multimedia domain
E Megalou and T Hadzilacos
Optimizing index allocation for sequential data broadcasting in wireless mobile computing
MS Chen, KL Wu and PS Yu
Query merging: Improving query subscription processing in a multicast environment
A Crespo, O Buyukkokten and H Garcia-Molina
Semantic caching and query processing
Q Ren, MH Dunham and V Kumar
Slot index spatial join
N Mamoulis and D Papadias
A scalable approach to integrating heterogeneous aggregate views of distributed databases
S McClean, B Scotney and K Greer
An information retrieval approach for approximate queries
PP Calado and B Ribeiro-Neto
Modeling completeness versus consistency tradeoffs in information decision contexts
DP Ballou and HL Pazer
Conflict resolution using logic programming
J Chomicki, J Lobo and S Naqvi

IEEE Transactions on Neural Networks

Vol. 13 No. 6
Articles
Learning in the multiple class random neural network
E Gelenbe and KF Hussain
Deterministic nonmonotone strategies for effective training of multilayer perceptrons
VP Plagianakos, GD Magoulas and MN Vrahatis
Fully automatic clustering system
G Patane and M Russo
Effects of moving the centers in an RBF network
C Panchapakesan, M Palaniswami, D Ralph and C Manzie
An ART-based construction of RBF networks
SJ Lee and CL Hou
Robust support vector regression networks for function approximation with outliers
CC Chuang, SF Su, JT Jeng and CC Hsiao
The growing hierarchical self-organizing map: Exploratory analysis of high-dimensional data
A Rauber, D Merkl and M Dittenbach
On the discrete-time dynamics of the basic Hebbian neural-network node
PJ Zufiria
Stability of fully asynchronous discrete-time discrete-state dynamic networks
JM Bahi and S Contassot-Vivier
Fuzzy kernel perceptron
JH Chen and CS Chen
Statistical analysis of the parameters of a neuro-genetic algorithm
PA Castillo-Valdivieso, JJ Merelo, A Prieto, I Rojas and G Romero
Hybrid intelligent systems for time series prediction using neural networks, fuzzy logic, and fractal theory
O Castillo and P Melin
Robust adaptive neural control for a class of perturbed strict feedback nonlinear systems
SS Ge and J Wang
Adaptive output feedback control of uncertain nonlinear systems using single-hidden-layer neural networks
N Hovakimyan, F Nardi, A Calise and N Kim
Predictive modular neural networks for unsupervised segmentation of switching time series: The data allocation problem
A Kehagias and V Petridis
Face recognition by independent component analysis
MS Bartlett, JR Movellan and TJ Sejnowski
Gaussian activation functions using Markov chains
HC Card and DK McNeill
Recursive least-squares backpropagation algorithm for stop-and-go decision-directed blind equalization
S Abrar, A Zerguine and M Bettayeb
A finite-element mesh generator based on growing neural networks
DG Triantafyllidis and DP Labridis
Silicon synaptic adaptation mechanisms for homeostasis and contrast gain control
SC Liu and BA Minch
All fiber-optic neural network using coupled SOA based ring lasers
MT Hill, EEE Frietman, H de Waardt and GD Khoe
Deterministic bit-stream digital neurons
D Braendler, T Hendtlass and P O'Donoghue
Chaotic simulated annealing with decaying chaotic noise
YY He
Robust CDMA multiuser detection using a neural-network approach
TC Chuah, BS Sharif and OR Hinton
Generalized neural trees for pattern classification
GL Foresti and C Micheloni
On the dynamical modeling with neural fuzzy networks
SF Su and FYP Yang
A decentralized control of interconnected systems using neural networks
SN Huang, KK Tan and TH Lee
Region growing with pulse-coupled neural networks: An alternative to seeded region growing
RD Stewart, I Fermin and M Opper

https://doi.org/10.1017/S0269888903000663 Published online by Cambridge University Press

IEEE Transactions on Pattern Analysis and Machine Intelligence

Vol. 24 No. 11
Articles
Spatio-temporal alignment of sequences
Y Caspi and M Irani
Lexicon-driven segmentation and recognition of handwritten character strings for Japanese address reading
CL Liu, M Koga and H Fujisawa
Automatic recognition of handwritten numerical strings: A recognition and verification strategy
LS Oliveira, R Sabourin, F Bortolozzi and CY Suen
Recognizing mathematical expressions using tree transformation
R Zanibbi, D Blostein and JR Cordy
A frequency domain technique for range data registration
L Lucchese, G Doretto and GM Cortelazzo
Relative fuzzy connectedness and object definition: Theory, algorithms, and applications in image segmentation
JK Udupa, PK Saha and RA Lotufo
Matching and retrieval of distorted and occluded shapes using dynamic programming
EGM Petrakis, A Diplaros and E Milios
Approximate Bayes factors for image segmentation: The Pseudolikelihood Information Criterion (PLIC)
DC Stanford and AE Raftery
On the use of SDF-type filters for distortion parameter estimation
N Muller and BM Herbst
Direct recovery of planar-parallax from multiple frames
M Irani, P Anandan and M Cohen
Matching free trees, maximal cliques, and monotone game dynamics
M Pelillo
Support vector machines for texture classification
KI Kim, K Jung, SH Park and HJ Kim

Vol. 24 No. 12
Articles
On the dependence of handwritten word recognizers on lexicons
HH Xue and V Govindaraju
Flux maximizing geometric flows
A Vasilevskiy and K Siddiqi
Identifying faces in a 2D line drawing representing a manifold object
JZ Liu, YT Lee and WK Cham
Three-dimensional topology preserving reduction on the 4-subfields
CM Ma, SY Wan and JD Lee
Efficient dilation, erosion, opening, and closing algorithms
J Gil and R Kimmel
Exact two-image structure from motion
J Oliensis
Feature space trajectory methods for active computer vision
MA Sipe and D Casasent
Discriminant wavelet faces and nearest feature classifiers for face recognition
JT Chien and CC Wu
Performance evaluation of some clustering algorithms and validity indices
U Maulik and S Bandyopadhyay
Stereo correspondence with compact windows via minimum ratio cycle
O Veksler
Substitution deciphering based on HMMs with applications to compressed document processing
DS Lee
Input feature selection by mutual information based on Parzen window
N Kwak and CH Choi
A rotation invariant rule-based thinning algorithm for character recognition
M Ahmed and R Ward

Vol. 25 No. 1
Articles
Transformation-invariant clustering using the EM algorithm
BJ Frey and N Jojic
Contour line and geographic feature extraction from USGS color topographical paper maps
A Khotanzad and E Zink
Suboptimal minimum cluster volume cover-based method for measuring fractal dimension
CR Tolle, TR McJunkin and DJ Gorsich
A class of discrete multiresolution random fields and its application to image segmentation
R Wilson and CT Li
Statistical edge detection: Learning and evaluating edge cues
S Konishi, AL Yuille, JM Coughlan and SC Zhu
Multilevel classification of milling tool wear with confidence estimation
RK Fish, M Ostendorf, GD Bernard and DA Castanon
Representation and self-similarity of shapes
D Geiger, TL Liu and RV Kohn
When is the shape of a scene unique given its light-field: A fundamental theorem of 3D vision?
S Baker, T Sim and T Kanade
Sum versus vote fusion in multiple classifier systems
J Kittler and FM Alkoot
On aligning curves
TB Sebastian, PN Klein and BB Kimia
Polling an image for circles by random lines
YC Cheng and YS Liu
Adaptive local thresholding by verification-based multithreshold probing with application to vessel detection in retinal images
XY Jiang and D Mojon

International Journal of Computer Vision

Vol. 50 No. 3
Special issue on variational and level set methods in computer vision
Guest editorial
N Paragios
Orthonormal vector sets regularization with PDEs and applications
D Tschumperle and R Deriche
A self-referencing level-set method for image reconstruction from sparse Fourier samples
JC Ye
A multiphase level set framework for image segmentation using the Mumford and Shah model
LA Vese and TF Chan
Diffusion snakes: Introducing statistical shape knowledge into the Mumford-Shah functional
D Cremers, F Tischhauser, J Weickert and C Schnorr
Using prior shapes in geometric active contours in a variational framework
YM Chen, HD Tagare, S Thiruvenkadam, F Huang, D Wilson, KS Gopinath, RW Briggs and EA Geiser
Variational methods for multimodal image matching
G Hermosillo, C Chefd'Hotel and O Faugeras
A variational approach for the segmentation of the left ventricle in cardiac image analysis
N Paragios
Vol. 51 No. 1
Articles
Geometry and texture from thousands of images
JP Mellor
Tracking while zooming using affine transfer and multifocal tensors
E Hayman, T Thorhallsson and D Murray
Self-consistency and MDL: A paradigm for evaluating point-correspondence algorithms, and its application to detecting changes in surface elevation
YG Leclerc, QT Luong and P Fua
Vol. 51 No. 2
Articles
Dynamic textures
G Doretto, A Chiuso, YN Wu and S Soatto
Understanding the behavior of SFM algorithms: A geometric approach
T Xiang and LF Cheong
Polyhedral object localization in an image by referencing to a single model view
R Chung and HS Wong
Vol. 51 No. 3
Articles
Uncalibrated motion capture exploiting articulated structure constraints
D Liebowitz and S Carlsson
M(2)Tracker: A multi-view approach to segmenting and tracking people in a cluttered scene
A Mittal and LS Davis
Satellite image deblurring using complex wavelet packets
A Jalobeanu, L Blanc-Feraud and J Zerubia
Velocity-guided tracking of deformable contours in three dimensional space
R Zaritsky, N Peterfreund and N Shimkin

International Journal of Inteligent Systems

Vol. 17 No. 10
Articles
Handling fuzzy information in extended possibility-based fuzzy relational databases
ZM Ma and F Mili
Direct fuzzy model-reference adaptive control
I Skrjanc, S Blazic and D Matko
A strategy of matching blocks at multi-levels
SW Jang and HI Choi
Fuzzy reasoning based on generalized fuzzy If-Then rules
Y Xu, J Liu, D Ruan and WJ Li
Vol. 17 No. 11
Articles
Dynamics and control in component-based agent models
FMT Brazier, CM Jonker and J Treur
The induced fuzzy integral aggregation operator
RR Yager
Comparing a genetic fuzzy and a neurofuzzy classifier for credit scoring
F Hoffmann, B Baesens, J Martens, F Put and J Vanthienen
Implicit predicates for handling disjunctive fuzzy information in fuzzy databases
JD Yang
Vol. 17 No. 12
Articles
Orthogonal relations for reasoning about posets
AD Kshemkalyani and R Kamath
A parallel approach to the Eulerian cycle problem
T Tambouratzis
A new universal approximation result for fuzzy systems, which reflects CNF-DNF duality
I Perfilieva and V Kreinovich
Generating indistinguishability operators from prototypes
E Hernandez and J Recasens
On the dynamics of default reasoning
G Antoniou
Vol. 18 No. 1
Special issue on the Dempster-Shafer theory of evidence
An introduction
LP Liu
Analyzing linear regression models with hints and the Dempster-Shafer theory
PA Monney
Implementing belief function computations
R Haenni and N Lehmann
A conceptual framework and belief-function approach to assessing overall information quality
M Bovee, RP Srivastava and B Mak
The conjunction fallacy: Explanations of the Linda problem by the theory of hints
HW Brachinger and PA Monney
Probabilistic argumentation systems: A new perspective on the Dempster-Shafer theory
R Haenni and N Lehmann
General framework for multidimensional models
R Jirousek and J Vejnarova
Supporting knowledge elicitation and consensus building for Dempster-Shafer decision models
KM Osei-Bryson

https://doi.org/10.1017/S0269888903000663 Published online by Cambridge University Press

International Journal of Software Engineering and Knowledge Engineering

Vol. 12 No. 4
Articles
A hierarchical measurement framework for the evaluation of automated business processes
R Aiello, A Esposito and G Nota
An object-based approach to managing domain specific thesauri: Semiautomatic thesaurus construction and query-based browsing
JH Choi, JD Yang and DG Lee
A survey of case studies of the use of knowledge management in software engineering
T Dingsoyr and R Conradi
Relational deductive object-oriented modeling (RDOOM) approach for finding, representing and integrating application-specific concepts
T Niemi, M Junkkari and K Jarvelin
Component contract-based interface specification technique using Z
JH Lee, CJ Yoo and OB Chang

Vol. 12 No. 5
Articles
Image and video coding and indexing – Guest editor's introduction
M Tucci
A multimedia model based on structured media and sub-elements for complex multimedia authoring and presentation
T Tran-Thuong and C Roisin
Heat : hierarchical entropy approach for texture indexing in image databases
R Distasi, M Nappi and S Vitulano
A methodology for modeling multimedia databases
G Costagliola, R Francese, A Musto and G Polese
ProActNet: Modeling processes through activity networks
SC Chou
A synthesis of evaluation criteria for software specifications and specification techniques
AA Khwaja and JE Urban

Journal of Intelligent & Robotic Systems

Vol. 35 No. 2
Articles
Occlusion culling algorithms: A comprehensive survey
I Pantazopoulos and S Tzafestas
Motion smoothing using wavelets
CC Hsieh
Development of a sensor fusion strategy for robotic application based on geometric optimization
GC Nandi and D Mitra
Alternative solution for a robotic stereotactic system
V Modrak, J Pasko and S Pavlenko
Planar cable-direct-driven robots: Design for wrench exertion
RL Williams and P Gallina
Vol. 35 No. 3
Articles
Segment-based map building using enhanced adaptive fuzzy clustering algorithm for mobile robot applications
YL Ip, AB Rad, KM Chow and YK Wong
Haptic direct-drive robot control scheme in virtual reality
MG Her, KS Hsu, TS Lan and M Karkoub
The brain-like sensorimotor control system
T Koshizen, Y Ueda and H Tsujino
Evolving programs and solutions using genetic programming with application to learning and adaptive control
KL Ng and R Johansson
The influence of gravity on trajectory planning for climbing robots with non-rigid legs
T Akinfiev and M Armada
An exception handling of rule-based reasoning using case-based reasoning
MR Lee

Journal of Intelligent Manufacturing

Vol. 13 No. 6
Special issue: CIM workflow
Editorial
CO Kim and SY Nof
Learning process in a class of computer integrated manufacturing systems with parametric uncertainties
Z Bubnicki
Management of complexity in enterprise integration projects by the PERA methodology
H Li and TJ Williams
Autonomy versus efficiency in multi-agent management of extended enterprises
A Villa
A workflow model based on parallelism for distributed organizations
JA Ceroni and SY Nof
Contract-collaboration network method for modeling manufacturing resource control workflows
CO Kim, J Jun, SS Kim and JK Baek
Forecasting the size of a collection in workflow models
AL Sweet
Distributed manufacturing execution systems: A workflow perspective
CY Huang
A shared process model for independent and synchronized e-business transactions
N Park
Time-out protocol for task allocation in multi-agent systems
P Anussornnitisarn, J Peralta and SY Nof

Journal of Symbolic Computation

Vol. 34 No. 3
Articles
Computing rational forms of integer matrices
M Giesbrecht and A Storjohann
Potential good reduction of elliptic curves
M Kida
Involutive bases in the Weyl algebra
M Hausdorf, WM Seiler and R Steinwandt
Algorithmic computation of flattenings and of modular deformations
B Martin
Efficient collection in infinite polycyclic groups
V Gebhardt
The calculation of radical ideals in positive characteristic
G Kemper

https://doi.org/10.1017/S0269888903000663 Published online by Cambridge University Press

Vol. 34 No. 4
Articles
Editorial: The integration of automated reasoning and computer algebra systems
S Linton and R Sebastiani
Incorporating decision procedures in implicit induction
A Armando, M Rusinowitch and S Stratulat
Equality in computer algebra and beyond
JH Davenport
A constructive algebraic hierarchy in Coq
H Geuvers, R Pollack, F Wedljk and J Zwanenburg
Comparing approaches to the exploration of the domain of residue classes
A Meier, M Pollet and V Sorge
Vol. 34 No. 5
Articles
Computing modular invariants of p-groups
RJ Shank and DL Wehlau
MultInt, a MAPLE package for multiple integration by the WZ method
A Tefera
Linear differential operators for polynomial equations
O Cormier, MF Singer, BM Trager and F Ulmer
Valuations and filtrations
E Mosteig and M Sweedler
Thomas' family of Thue equations over imaginary quadratic fields
C Heuberger, A Petho and RF Tichy
Computing the primary decomposition of zero-dimensional ideals
C Monico
An algorithm for isolating the real solutions of semi-algebraic systems
BC Xia and L Yang
Vol. 34 No. 6
Articles
Relax, but don't be too lazy
J Van der Hoeven
Real solving for positive dimensional systems
P Aubry, F Rouillier and MS El Din
Decomposing monomial representations of solvable groups
M Puschel
Taylor and Lyubeznik resolutions via Grobner bases
WM Seiler

Knowledge-Based Systems

Vol. 16 No. 1
Articles
Knowledge-based requirement engineering for one-of-a-kind complex systems
S Ratchev, E Urwin, D Muller, KS Pawar and I Moulek
Internet-based intensive product design platform for product design
SQ Zhou, KS Chin and PKDV Yarlagadda
An architecture for cooperative information systems
E Shakshuki, H Ghenniwa and M Kamel
Risk, gap and strength: key concepts in knowledge management
I McBriar, C Smith, G Bain, P Unsworth, S Magraw and JL Gordon
Knowledge-based association rule mining using AND-OR taxonomies
DK Subramanian, VS Ananthanarayana and MN Murty
Rule-based schema evolution in object-oriented databases
R Alhajj and F Polat
R-5 model for case-based reasoning
G Finnie and ZH Sun
Vol. 16 No. 2
Articles
Design and implementation of an integrated knowledge system
HCW Lau, CWY Wong, IK Hui and KF Pun
The BORM methodology: a third-generation fully object-oriented methodology
R Knott, V Merunka and J Polak
Continuous and incremental data mining association rules using frame metadata model
J Fong, HK Wong and SM Huang
Modelling dynamic behaviour of business organisations – extension of DEMO from a semiotic perspective
KC Liu, L Sun, J Barjis and JLG Dietz
Merging requirements from a set of ranked agents
L Cholvy and A Hunter

Kybernetes

Vol. 31 Nos. 7–8
Articles
Charles Muses – in memoriam – Preface
J Rose and BH Rudall
Charles Muses – in memoriam – 1919–2000
Selected papers contributed to Kybernetes by Charles Muses
Simplifying complexity – The greatest present challenge to management and government
C Muses
The unique reach of cybernetics in our fin-de-siecle
C Muses
Recollections of Norbert Wiener, Warren McCulloch and Stafford Beer
C Muses
Bibliography of his work
On Charles Muses
R Vallee
Unfinished business
AM Andrew
Editor's note on the Muse's/Masani dialogue
The march of self-reference
F Geyer
Postmodernism, cybernetics and fuzzy set theory
CV Negoita
Would dynamic systems involving human factors be necessarily of fractal nature?
G Jumarie
Virtual clothing in hybrid cellular automata
A Tarakanov and A Adamatzky
Entropic properties of international systems
D Tsaganea
Aspects of a systemic philosophy of knowledge: from social facts to data, information and knowledge
JA Johannessen, J Olaisen and B Olsen
Using Bezier curves in approximate reasoning
E Roventa and T Spircu
Approximation of multiple integrals by length of alpha-dense curves
A Benabidallah, Y Cherruault and G Mora
Internet commentary
AM Andrew
Vol. 31 Nos. 9–10
Special double issue: systems and cybernetics: new theories and applications
Part I – Preface
BH Rudall

https://doi.org/10.1017/S0269888903000663 Published online by Cambridge University Press

Special double issue: systems and cybernetics: new theories and applications – Part I – Our heartfelt appreciation
Y Lin
Creative idea generation via interpretative approach to analogical reasoning
K Badie
CLCR optimal input design for IS and IU plants
C Banyasz and L Keviczky
Universe as a self-observable, self-ethical, life-embedding mathematical system
M Bounias
A synergetics approach to disruptive innovation
G Broekstra
Uncertain variables and their applications for control systems
Z Bubnicki
Control synthesis of a class of DEDS
F Capkovic
Incentives: mechanisms for the consistency of the Colombian educational system
M Castillo, G Duque and F Beltran
Modelling, prototyping, and verifying concurrent and distributed applications using object-oriented Petri nets
M Ceska, V Janousek and T Vojnar
Fuzzy algorithms of problem solving
OG Chorayan and GO Chorayan
Towards autonomous application interfaces
M Courant and S Le Peutrec
Can the system idea help promote critical thinking and intellectual autonomy in pedagogy?
DA Mejia
A systemic look at educational development programs: two perspectives on a recent Colombian experience
A Espinosa and MC Jackson
The bridge to humanity's future: text of a multimedia address
WR Fey and ACW Lam
What is "engineering systems thinking"?
M Frank
The "Roundtable" for school learning and planning groups: planting a seed for systemic renewal
SF Gabriele
Epidemiologic modelling of HIV and CD4 cellular/molecular population dynamics
T Habtemariam, B Tameru, D Nganwa, L Ayanwale and A Ahmed
Application of systems analysis in modelling the risk of bovine spongiform encephalopathy (BSE)
T Habtemariam, B Tameru, D Nganwa, L Ayanwale, A Ahmed, D Oryang, H AbdelRahman, G Gray, J Cohen and S Kreindel
Tools for creation of multimodels
M Hruby, R Koci, P Peringer and Z Rabova
Optimal control and approximation of variational inequalities
H Kamil and J Anna
Thorough numerical entropy analysis of some substitutive sequences by lumping
K Karamanos and I Kotsireas
Mathematical bios
L Kauffman and H Sabelli
On the reachable robustness limits for time delay control systems
L Keviczky and C Banyasz
"Physics" approach to general systems theory
J Korn
A systems approach to self-organization in the dreaming brain
S Krippner and A Combs
Asymptotic models and methods in complex systems dynamics (General approach)
LK Kuzmina
Relonics: balascopy-based systems-specific technology
VI Kvitash
The cruel blow to the biomedical paradigm not based on systems sciences and cybernetics
VI Kvitash
Categorical prediction of acute chest pain outcome by relonics
VI Kvitash

New Generation Computing

Vol. 21 No. 1
Special issue on chance discovery
Preface
Y Ohsawa and A Abe
Metacognitive and computational aspects of chance discovery
R Oehlmann
Chance discovery and scenario analysis
P McBurney and S Parsons
An information management system with the facility to support long-term creative thinking
H Shibata and K Hori
PAI: Automatic indexing for extracting asserted keywords from a document
N Matsumura, Y Ohsawa and M Ishizuka
Web information visualization method employing immune network model for finding topic stream from document-set sequence
Y Takama and K Hirota
The role of abduction in chance discovery
A Abe
Creative communication for chance discovery in shopping
H Shoji and K Hori
