Volumes 123-128
eISSN: 1096-0287; ISSN: 0033-5894

Editors
Nicholas Lancaster, Desert Research Institute
Lewis A. Owen, North Carolina State University

Associate Editors
Lesleigh Anderson, U.S. Geological Survey
Pat Bartlein, University of Oregon
Louisa Bradtmiller, Macalester College
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Jason Dortch, University of Kentucky
Mary Edwards, University of Southampton and University of Alaska
Tyler Faith, Natural History Museum of Utah and University of Utah
Jaime Urrutia Fucugauchi, National University of Mexico and Instituto de Investigacion y Estudios Avanzados Chicxulub
Kathleen R. Johnson, University of California, Irvine
Terri Lacourse, University of Victoria
Pete Langdon, University of Southampton
Thomas Lowell, University of Cincinnati
Curtis W. Marean, Arizona State University
Jim O'Connor, U.S. Geological Survey
Wyatt Oswald, Emerson College
Yeong Bae Seong, Korea University
James (Jamie) Shulmeister, University of Canterbury, Christchurch
Ximena Villagran, Museu de Arqueologia e Etnologia, Universidade de São Paulo
Xiaoping Yang, Zhejiang University

Editorial Board
Zhisheng An, Institute of Earth Environment, Chinese Academy of Sciences
Gail Ashley, Rutgers University
Julie Brigham-Grette, University of Massachusetts
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Yehouda Enzel, Hebrew University of Jerusalem
David Fink, Australian Nuclear Science and Technology Organisation
Sheri Fritz, University of Nebraska – Lincoln
Alan R. Gillespie, University of Washington
Lisa Graumlich, University of Washington
Vance T. Holliday, University of Arizona
Richard G. Klein, Stanford University
Melanie Leng, British Geological Survey, University of Nottingham
Danial R. Muhs, U.S. Geological Survey
Colin V. Murray-Wallace, University of Wollongong
Jay Quade, Department of Geosciences, Univeristy of Arizona
Maria Socorro Lozano-Garcia, Universidad Nacional Autónoma de México
Cathy L. Whitlock, Montana State University
Yurena Yanes, University of Cincinnati
Liping Zhou, Peking University

Aims & Scope

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its 50-year history in advancing the understanding of Earth and human history through interdisciplinary study of the last 2.6 million years.

Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Quaternary Research Center

The QRC is a community of scholars collaborating and fostering interdisciplinary environmental research at the University of Washington through strategic investments in seed grants, expeditions, seminars, workshops, and the publication of *Quaternary Research*.

Volume 126, July 2025

RESEARCH ARTICLES

1 A new paleoclimate perspective shows that arid regions will be drier under global warming conditions
Yu Li, Simin Peng, Zhansen Zhang and Junjie Duan

14 Holocene environmental changes in the highlands of Yemen revealed by Ostracod (Crustacea) stratigraphy
Munef Mohammed, Dietmar Keyser, Peter Frenzel, Ali Siraji, Abdullah Al haiani, Mohammed Yafoz, Fadhl Hussain, Abdulkareem Abood and Abdullah Meyad

27 Pleistocene periglacial paleohydrology reconstituted from sandstone morphologies in the Paris Basin, France
Médard Thiry and Anthony Milnes

42 Late Pleistocene to Holocene mammal faunal change on a small Landbridge Island in Bass Strait, South-Eastern Australia, and its implications for future reintroductions
M.C. McDowell, R. Sim, A. Sculthorpe, B.W. Brook and C.N. Johnson

55 A multidisciplinary approach to resolve the taxonomy of the historically extinct sea mink (*Neogale macrodon*) (Maine, USA)
Paula Work, Robert Lewis and Bruce Bourque

71 Geological dating of the earliest Minusinsk Depression rock art, the Maydashy site, Southern Siberia
Dmitriy G. Malikov, Lydia V. Zotkina, Roman V. Davydov, Ekaterina L. Malikova, Elena A. Miklashevich, Aleksey V. Petrozhitskiy, Olesya V. Ershova and Anna A. Cherezova

85 New exposures of Lava Creek ash more closely constrain the age of the Sacagawea Ridge glaciation, Wind River Mountains, Wyoming (USA)
Dennis Dahms, Markus Egli, William C. McIntosh, Nels Iverson and Nelia W. Dunbar

Photo Caption: View southwards from tufa towers on the shore of Mono Lake in east-central California, USA. This hypersaline alkaline lake has a productive ecosystem based on the endemic brine shrimp (*Artemia monica*) and alkali flies (*Ephydra hians*). The name "Mono" derives from "Monachi," a Yokut term for the tribes that lived on both sides of the Sierra Nevada, and the region has an archaeological record extending back into the Early Holocene. Recent freshwater diversions severely lowered lake levels starting in AD 1941. Litigation in 1994 allowed the water to steadily rise. Levels are still far short of early 20th century heights, however, partially because of many years of drought in the American West. Mono Lake Basin has a geomorphic, volcanic, glacial and lacustrine record extending beyond the early Quaternary. It has been the focus of much research over the years, including many prominent papers published in Quaternary Research on glaciation, lacustrine sedimentology, geochemistry, palynology, archeology, and climate change that exemplify the interdisciplinary emphasis of the journal (see Bursik and Gillespie, 1993, 39, 24–35; Benson et al., 1998, 49, 1–10; Davis, 1999, 52, 243–249; Madsen et al., 2002, 57, 382–390; Zimmerman et al., 2011, 76, 264–271; Bacon et al., 2018, 90, 276–302).
