Figures

1.1 Applying the CIRCle Framework for assessing rules relevant to cumulative environmental problems *page* 5
1.2 Major case study locations 18
2.1 The CIRCle Framework: Integrated legal functions for responding to cumulative environmental problems 53
3.1 Laws relevant to regulating cumulative environmental problems 72
4.1 Clearly and transparently conceptualizing a matter of concern to facilitate responding to cumulative environmental harm requires identifying its key elements and the spatial boundaries and cumulative threshold conditions that correspond to those elements in a way that facilitates adaptation over time 78
4.2 Integration of legal mechanisms for conceptualization with other CIRCle Framework functions, each necessary for regulating cumulative environmental problems 80
5.1 Information needed to analyze and respond to cumulative environmental problems using formal rules 106
5.2 Integration of legal mechanisms for information with other CIRCle Framework functions, each necessary for regulating cumulative environmental problems 108
6.1 Integration of legal mechanisms for intervention with other CIRCle Framework functions, each necessary for regulating cumulative environmental problems 133
6.2 Four regulatory intervention strategies to ensure acceptable cumulative effects – reducing harm, offsetting harm, restoring, and coping 134

6.3 Four regulatory intervention approaches to change behavior or use direct state action – sticks, carrots, sermons, and state rescue 142
7.1 Coordination for responding to cumulative environmental problems: potential actors and interactions 181
7.2 Integration of legal mechanisms for coordination with other CIRCle Framework functions, each necessary for regulating cumulative environmental problems 182
8.1 Conceptualization for responding to cumulative environmental problems: links and key dimensions 210
8.2 Elements of SGMA involved in conceptualizing what matters and who matters in groundwater sustainability, and links to other CIRCle Framework functions of information, regulatory intervention, and coordination 225
9.1 Qualitative model of cumulative impacts on coral, as assessed by the Reef SEA, omitting greenhouse gas emissions contributing to climate change 244
10.1 Coordination for protecting and restoring Alpine grasslands in South Tyrol: key government actors and mechanisms for interaction 299
11.1 Applying the CIRCle Framework: integrated regulatory functions needed to address cumulative environmental problems 315
11.2 A "menu" of regulatory modes for intervening to address a cumulative environmental problem 321
