DATA AVAILABILITY STATEMENT

The editors have granted an exception to the data policy for this manuscript. In this case, replication code and data are available to reproduce its figures and tables, but there are substantively small differences between the replication and the printed results. This exception was granted because the authors affirmed that these differences are attributable to randomness in the sampling procedure that generates draws from Bayesian posterior distributions that do not change the conclusions of the manuscript. The research documentation and data that support the findings of this study are openly available at the Harvard Dataverse at https://doi.org/10.7910/DVN/JQTVYT. ■

EXPLORE THE CAMBRIDGE STUDIES IN

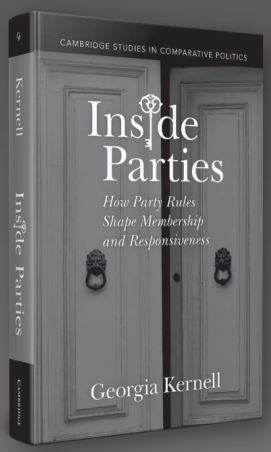

Comparative Politics

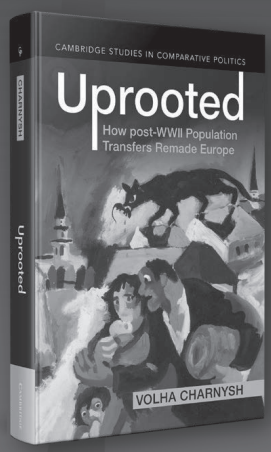

Edited by Kathleen Thelen

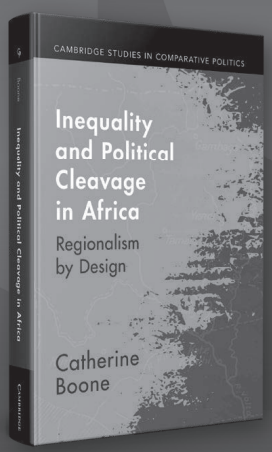

This series publishes comparative research that seeks to explain important cross-national domestic political phenomena. The series is based on a broad conception of comparative politics and will promote critical dialogue among different approaches.
