Infection Control & Hospital Epidemiology

Volume 47 2026 Number 2

# CONTENTS

## Commentary

**119** Commentary: navigating practice decisions when guidelines offer "no recommendation"
*Joshua K. Schaffzin, Kathleen McMullen, Erin Kyle, Valerie Deloney, William A. Rutala, Erica S. Shenoy, David J. Weber and for the Multisociety Guidance for Sterilization and High-Level Disinfection Writing Group*

## Original Articles

**124** Incidence of hospital-onset bacteremia and fungemia in solid organ malignancy, hematologic malignancy, and hematopoietic cell transplant patients
*Sara Kurd-Misto, Justine Ross, Samantha Bastow, Kalvin Yu and Sanjeet Dadwal*

**131** Reducing mediastinitis following pediatric cardiovascular surgeries: a quality improvement initiative
*Caitlin Naureckas Li, Amanda Bonebrake, Erica Mansavage, Amy Moravec, Lauren Weisert, Inga Uremovich, David Winlaw and Catherine Collins*

**139** Investigation and control of an outbreak of methicillin-susceptible *Staphylococcus aureus* skin and soft tissue infections in a neonatal intensive care unit
*Gisel Rivera-Valenzuela, Liana Senaldi, Priyanka Tiwari, Vivien Yap, Jean-Marie Cannon, Lisa Saiman, David P. Calfee, Jamie Marino, Rebecca Marrero Rólon, Kara Mitchell, Marie-Claire Rowlinson, Wolfgang Haas, Krithivasan Sankaranarayanan, Lars F. Westblade and Karen P. Acker*

**145** Estimating the impact of patient-level risk factors and time-varying hospital unit on healthcare-associated *Clostridioides difficile* infection using cross-classified multilevel models
*Jessica Lynn Webster, Claudine T. Jurkovitz, Brisa N. Sánchez, Stephen Eppes and Neal D. Goldstein*

**153** Mixed-methods assessment of barriers to *Candidozyma* auris prevention among frontline healthcare providers in long-term acute care hospitals
*Sarah E. Sansom, Mckenzi King, Mary Carl Froilan, Christine Lucky, Lahari Thotapalli, Laura Rusie, Rachel Medernach, Ronda Cochran and Mary K. Hayden*

**161** *Mycobacterium chelonae* outbreak investigation at a quaternary pediatric hospital following the opening of a LEED-certified critical care tower: where does water sustainability intersect with infection control?
*Andrea L. Ankrum, Silvia M. Caceres, Michael Torsell, Elaine Epperson, Vinicius Calado Nogueira de Moura, Jennifer J. Gilick, Michael Strong, Qingyun Liu, Matthew J. Strand, Rachel N. Wilsey, Jennifer R. Honda, Jane E. Gross and Felicia A. Scaggs-Huang*

**170** Artificial intelligence enhances genomic surveillance in healthcare outbreak investigations
*Alexander Sundermann, Jieshi Chen, Melissa Saul, Kathleen Shutt, Marissa Griffith, Graham Snyder, Lora Lee Pless, Artur Dubrawski and Lee Harrison*

**175** Summary of CDC consultations related to nontraditional therapies and settings, 2016–2023
*Kevin B. Spicer, Elizabeth M. Beshearse, Joseph F. Perz and Kiran M. Perkins*

**Cover image:** ***A Victim of Outside Forces,*** **2021**

https://doi.org/10.1017/ice.2025.10270 Published online by Cambridge University Press

**180** Interventions to optimize duration of antibiotic therapy and encourage oral transition for uncomplicated gram-negative blood stream infections across a health system
*Jared Olson, Adam Hersh, John Veillette, C. Dustin Waters, Brandon J Webb, Nick Tinker, Stephanie May, Michelle Matheu, Nora Fino, Rachel Foster, Mary Hutton, Erin Stahl, Jena Rhodes, Edward Stenehjem, Andrew Pavia, Payal Patel, Allan Seibert and Whitney Buckel*

**189** Real learning in a virtual world: a pilot study of the impact of virtual reality training on IPC knowledge and confidence
*Michelle S. Jerry, Vianelly García, Andrea S. Greenfield, Stefanie A. Lane, Hang Lee, Anjali Nemorin, Eileen F. Searle, Chloe V. Green and Erica S. Shenoy*

## Concise Communications

**195** Comparison of cefazolin administered as a continuous or intermittent infusion for prophylaxis of surgical site infections in adult patients undergoing cardiac or neurologic surgery
*Richard H. Drew, Nicholas A. Turner, Elizabeth Keil and Jessica Seidelman*

**199** Assessment of healthcare providers' knowledge and decision-making patterns in peripheral intravenous catheter management in acute care settings
*Heather L. Young, Carolyn Valdez, Diana Mancini, Sarah Gardiner, Kelly Medero, Rosine Angbanzan and Timothy C. Jenkins*

**202** Routine genomic surveillance in a military healthcare facility detected a community-based Group A *Streptococcus* outbreak associated with grappling sports
*Germán G. Vargas-Cuebas, William Stribling, Melissa J. Martin, Shannon Gettings, Rhonda Wells, Maureen Sevilla, Kathryn Polaskey, Lan Preston, Yoon I. Kwak, Patrick T. Mc Gann, Francois Lebreton and Jason W. Bennett*

**206** Using secure artificial intelligence agents integrated within the electronic medical record for the evaluation of blood culture appropriateness—Northern California, 2025
*Guillermo Rodriguez-Nava, Timothy Keyes, Nerissa Ambers, Eugenia Miranti, Erika Paola Viana-Cardenas, Wajeeha Tariq, Mindy Marie Sampson and Jorge Luis Salinas*

**210** Are SEP-1 and blood culture stewardship at odds? Retrospective review of SEP-1 failures pre- and during a blood culture bottle shortage
*Jonathan H. Ryder, Kelly A. Cawcutt, Cynthia Japp and Trevor C. Van Schooneveld*

**214** Antibiotic prescribing during outpatient telemedicine visits among commercially insured patients and Medicare Part D beneficiaries, 2021
*Guillermo V. Sanchez, Destani Bizune, Christine Kim, Lauri Hicks, Adam L. Hersh and Sarah Kabbani*

**219** Facilitators and barriers for the use of ultraviolet-C disinfection for patient room cleaning at VA hospitals: a qualitative analysis
*Kimberly C Dukes, Stacey M. Hockett Sherlock, Cassie Cunningham Goedken, AM Racila, Julia Friberg Walhof, Daniel Suh, Michihiko Goto, Bernardino Guerrero, Trina Zabarsky and Eli N Perencevich*

## Research Brief

**223** Antibiotic-exposure guided prevalence screening for vancomycinresistant Enterococcus: better value for hospitals
*Victoria Williams, Jonah Chevrier, Marion Elligsen, Philip W. Lam, Robert Kozak, Jeff E. Powis and Jerome A. Leis*

https://doi.org/10.1017/ice.2025.10270 Published online by Cambridge University Press

## Letters to the Editor

**225** Repeat immune-gamma release assay testing among new healthcare worker hires at low-risk for tuberculosis
*Ashish Sethi and David Bamberger*

**226** "Sustained reductions in the incidence of multidrug-resistant organisms: a 24-year experience"
*John Ahern, Cindy Noyes, Lindsay Smith and W. Kemper Alston*

https://doi.org/10.1017/ice.2025.10270 Published online by Cambridge University Press

***Infection Control & Hospital Epidemiology*** **(ISSN 0899-823X)** is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA. Printed by Sheridan, a CJK Group Company.

**Editorial Office**
Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org. Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

**Advertising**
Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

**Permissions**
Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (http://www.copyright.com, email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: www.cambridge.org/about-us/rights-permissions.

**Subscriptions**
The individual subscription prices for 2026 are: Print & Online: $411; Online Only: $288. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

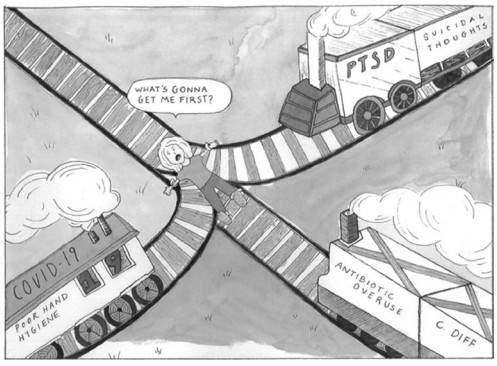

**Postmaster:** Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

## About the cover:

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers

## 2026

**Title:** *A Victim of Outside Forces,* 2021
**Artist:** Lois Bence-Ehlke, RN, BS
**Medium:** pen and ink sketch

**Mrs. Bence-Ehlke spoke to ICHE about her artwork.**
**What was the inspiration for this artwork?**
I am a member of the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. At a meeting in 2021, the group leader encouraged us to think of ways we could use art to highlight the importance of infection prevention in healthcare settings. Not too long after that, I was admitted to a hospital with sepsis. This was relatively early in the COVID-19 pandemic. I saw that the staff were tired and that they had more to do than time to do it. I wondered if I would get the help I needed and worried about getting another infection before I was well enough to go home.

I thought of the idea for this cartoon and sketched it out while I was in my hospital bed. I wanted to make people think about what patients experience while they are in the hospital or receiving medical care in other settings. They are dealing not only with the physical and mental health conditions that initially brought them in but also with many outside forces that may worsen their existing problems or create new ones. These threats include poor hand hygiene by healthcare personnel, overuse of antibiotics, and infections like *C. difficile* and respiratory viruses that can be spread by other patients, healthcare personnel, and the health-care environment. Patients have little to no control over these forces and may not even be aware of these threats. Even if they are aware of them, many patients are not comfortable raising their concerns to their doctors, nurses, or other care providers. They are simply left to wonder "which of these things is going to get me first?"

**What is your personal connection to the content of *ICHE*?**
I had a long career as a registered nurse. I began my career as a psychiatry nurse. I was then hired to be the very first infection prevention nurse in a small community hospital after an outbreak of *Staphylococcus aureus* infections occurred in the hospital's newborn nursery. I spent 20 years in infection prevention. During that time, I saw firsthand the many challenges one encounters when trying to implement changes that will make healthcare safer. I also witnessed increasing recognition that healthcare-associated infections are preventable and tremendous growth in our ability to prevent many of these infections. Unfortunately, we still have a long way to go.

---

**Cover image: *A Victim of Outside Forces,* 2021**

https://doi.org/10.1017/ice.2025.10270 Published online by Cambridge University Press

In addition to my professional connections to ICHE, I also have personal connections. My first husband developed pneumonia as a complication of leukemia and its treatment. I currently have friends who are unable to live their lives in the way that they want due to recurrent *C. difficile* infections they developed because of antibiotic therapy that may have been unnecessary.

**Given the scope of the journal, why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?**
This sketch shows, from the patient's perspective, the importance of identifying and eliminating the infection-related threats we all currently experience when we receive health care.

*Lois Bence-Ehlke lives in Wisconsin with her two miniature schnauzers. She is a member of the Patient and Family Advisory Council and the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. She developed the concept and initial sketch for this comic. It was later enhanced by the PEER coordinator, Sydney Hoel.* *The project was supported by the NIH National Center for Advancing Translational Sciences (NCATS), grant UL1TR002373. The content is solely the responsibility of the artist and does not represent the opinion of the NIH or the University of Wisconsin.*
