SYNTACTIC CHAINS

KENNETH J. SAFIR

Kenneth Safir refines and extends the framework created by Chomsky's theory of Government and Binding, with particular emphasis on the theory of indexing and syntactic chains. He ranges widely across a number of key constructions in syntactic theory and considers data from an impressive number of European languages.

SEMANTICS AND SYNTAX

JIM MILLER

A challenging and perhaps controversial framework for handling syntax, semantics, and morphology. Jim Miller argues that semantics and syntactic structure is far more complex than many analysts realize, and he states that semantic structure should be based on the notions of location and movement.

Cambridge Studies in Linguistics 41
6 x 9/262 pp./26265-8/$39.50

FUNCTIONAL SYNTAX AND UNIVERSAL GRAMMAR

WILLIAM A. FOLEY and
ROBERT D. VAN VALIN, Jr.

An integration of the study of linguistic form with the study of language use and meaning. This book shifts attention from formal theories of the structure of language, and develops a functional theory that considers the needs of human communication that all languages must satisfy. Includes examples from a wide range of languages.

Cambridge Studies in Linguistics 38

METRICAL PHONOLOGY AND PHONOLOGICAL STRUCTURE

German and English

HEINZ J. GIEGERICH

The author explores the theoretical foundations of "metrical phonology" and shows that the current model can be significantly simplified. He then applies the simplified model to a wide range of German and English data, thereby illustrating the striking similarities between German and English phonological structure.

Cambridge Studies in Linguistics 43

PHONOLOGY

An Introduction to Basic Concepts

ROGER LASS

Roger Lass discusses important aspects of the phenomenology of sound in relation to the particular phonological theories to which they are most appropriate, and in doing so surveys a wide range of competing theories, analytical strategies, and notational systems.

Cambridge Textbooks in Linguistics
6 x 9/362 pp./23728-9/$49.50 (cloth)

NATURAL LANGUAGE PARSING

Psychological, Computational, and Theoretical Perspectives

DAVID R. DOWTY, LAURI KARTTUNEN, and ARNOLD M. ZWICKY, Editors

These original essays by leading researchers give a stimulating interdisciplinary overview of recent developments in parsing. The papers represent work from experimental psychology, theoretical linguistics and artificial intelligence, and demonstrate that each discipline has something to contribute to the other.

Studies in Natural Language Processing
6 x 9/432 pp./26203-8/$49.50

TEACHING TALK

Strategies for Production and Assessment

GILLIAN BROWN, ANNE ANDERSON, RICHARD SHILLCOCK, and GEORGE YULE

Success at school and beyond depends largely on being able to make yourself understood. The authors examine the way adolescents express themselves and concentrate on the discrepancies in language use between academically successful and unsuccessful pupils. They clearly explain the most important findings of a research project on adolescent language and suggest ways that teachers can help students.

SIGN LANGUAGE

The Study of Deaf People and Their Language

JIM KYLE, BENCIE WOLL, with GLORIA PULLEN and FRANK MADDIX

The authors discuss the rich language development of the deaf, the history of sign language use, its social aspects, the language acquisition of deaf children, and sign language learning from a psychological perspective. They conclude with an examination of how sign language research may be applied to education.

6 x 9 / many illustrations / 26075-2 / $49.50

LANGUAGE DEVELOPMENT IN THE PRESCHOOL YEARS

GORDON WELLS

A detailed account of the common trends in language development that were found in a large study of children aged one to five. Wells specifies the ages at which linguistic categories emerged and the frequencies with which they were used at successive ages. He considers possible explanations for the developmental sequence identified, including environmental factors and the influence of adults.

GRAMMATICAL THEORY IN WESTERN EUROPE 1500-1700

The Trends in Vernacular Grammar I

G. A. PADLEY

The author examines the early grammar of the five main European languages—English, French, German, Italian, and Spanish. He traces the links and tensions between the vernacular and the underlying Latin tradition, and shows the distortions which the Latin tradition caused. He also gives the larger pedagogical and cultural context of grammar development.

SYNTACTIC THEORY IN THE HIGH MIDDLE AGES

Modistic Models of Sentence Structure

MICHAEL A. COVINGTON

Professor Covington offers an original critical exegesis of the theories of syntactic structure formulated by the Modistae, the group of grammarians and logicians who flourished in Paris between 1270 and 1310. He reviews some of the concepts of the medieval theory that have survived, and introduces insights from modern grammatical theories where appropriate.

Cambridge Studies in Linguistics 39

INTRODUCTION TO THE GRAMMAR OF ENGLISH

RODNEY HUDDLESTON

This thorough and precise account of all the major areas of English grammar is written for students without any knowledge of linguistics and unfamiliar with "traditional" grammar. Concentrating on Standard English, it serves as a much needed foundation for more advanced work in theoretical linguistics.

Cambridge Textbooks in Linguistics
6 x 9/483 pp./39 diagrams/22893-X / $59.50 (cloth) / 29704-4 / $17.95 (paper)

LANGUAGE AND SOCIETY IN THE GERMAN SPEAKING COUNTRIES

A Sociolinguistic Perspective

MICHAEL C. CLYNE

German is the only national language spoken on both sides of the Iron Curtain, as well as in four other countries of varying historical and cultural traditions. The author explores the dilemmas concerning nationhood or ethnicity that are language-related or language-marked.

5 1/2 x 8 1/2/205 pp./4 tables, 2 maps/25759-X / $32.50 (cloth) / 27697-7 / $9.95 (paper)

LANGUAGE IN THE BRITISH ISLES

PETER TRUDGILL, Editor

Thirty-three essays illuminate the variety and diversity of languages spoken in the British Isles. They provide up-to-date information on all the languages and linguistic varieties, and describe the linguistic characteristics and sociolinguistic situations of each particular language, dialect or accent.

6 x 9/587 pp./90 tables, 13 diagrams, 23 maps / 24057-3 / $69.50 (cloth) / 28409-0/$19.95 (paper)

SCANDINAVIAN LANGUAGE CONTACTS

P. STURE URELAND, and IAIN CLARKSON, Editors

This authoritative collection is the first book in English to examine all language contacts in Scandinavia, including those with non-Scandinavian languages. The essays focus on how each language varies in its development and social use because of geographical, sociological, and linguistic factors.

6 x 9/340 pp./11 tables, 18 diagrams, 19 maps/25685-2/$59.50

A new study of names and naming

WHAT'S IN A NAME?

AN ESSAY IN THE PSYCHOLOGY OF REFERENCE

John Carroll, IBM WATSON RESEARCH CENTER

WHAT'S IN A NAME? is a comprehensive examination of naming behavior, the psycholinguistic activity by which we connect the world of entities and the world of symbols.

Carroll draws extensively on both laboratory research and investigations of real-world naming activities (e.g., creating computer file names), analyzing the structures and processes of naming in an effort to shed light on the laws of one of the most fundamental generative tasks of the human mind.

Pulling together the empirical strands of laboratory and field work, Carroll suggests a concise theory of how people name things. He analyzes the practical implications for organizing routine tasks of everyday life, and explores the larger meaning of naming for the study of cognitive psychology and linguistic creativity.

COGNITIVE CONSTRAINTS ON COMMUNICATION
Processes and Representations

edited by **Lucia Vaina,** *M.I.T. and Boston University, Massachusetts,* and **Jaakko Hintikka,** *Florida State University*

SYNTHESE LANGUAGE LIBRARY 18

1985, 445 pp.

paper $19.95 ISBN 90-277-1949-7
cloth $54.00 ISBN 90-277-1456-8

A D. Reidel Publication

Central to contemporary cognitive science is the notion that mental processes such as communication involve computations defined over internal representations. But how do different communicative patterns (dialogue, poetry etc.) reflect cognitive structures? This volume brings together insights on this question from linguistics, semiotics, logic, artificial intelligence, and psycho-analysis.

THE GAME OF LANGUAGE
Studies in Game-Theoretical Semantics and its Applications

by **Jaakko Hintikka,** in collaboration with **Jack Kulas,** *Florida State University*

SYNTHESE LANGUAGE LIBRARY 22

1985, 356 pp.

paper $19.95 ISBN 90-277-1950-0
cloth $34.50 ISBN 90-277-1687-0

A D. Reidel Publication

Jaakko Hintikka has collected here his most recent work on game-theoretical semantics and its applications. The work comprises both previously published and unpublished papers. Taken together, the included essays present a general survey of the state of this important approach to linguistic and logical semantics, as well as providing samples of its applications.

DIALOGUE GAMES
An Approach to Discourse Analysis

by **Lauri Carlson,** *The Academy of Finland*

SYNTHESE LANGUAGE LIBRARY 17

1985, 340 pp.

paper $19.95 ISBN 90-277-1951-9
cloth $49.50 ISBN 90-277-1455-X

A D. Reidel Publication

This essay constitutes another approach to the fields of inquiry variously known as discourse analysis, discourse grammar, functional syntax, or text linguistics. An attempt is made to develop a fairly abstract unified theoretical framework for the description of discourse which actually helps explain concrete facts of the discourse grammar of a natural language.

INTRODUCTION TO MONTAGUE SEMANTICS

SYNTHESE LANGUAGE LIBRARY 11

1980, 324 pp.

paper $14.95 ISBN 90-277-1142-9
cloth $39.00 ISBN 90-277-1141-0

A D. Reidel Publication

"The authors provide a systematic development, proceeding gently but rigorously from propositional and predicate logic through the lambda-calculus, type theory and quantified tense and modal logic, to Montague's full intensional logic, with lucid explanations and good exercises. From that point, it is a relatively easy step to understand Montague's treatment of English, and by the end of the book the student is in an excellent position to understand, evaluate, and add to the rapidly growing body of research stemming from Montague's work."

Now available in paperback:

THE LOGICAL STRUCTURE OF LINGUISTIC THEORY

Noam Chomsky

In this classic of modern linguistics, Chomsky laid the foundations for virtually all of his subsequent linguistic work. This paperback edition supplies a much-needed index of subjects, names, symbols, and morphemes. "It is remarkable that *The Logical Structure of Linguistic Theory* retains so much current relevance after all these years; something that can be said for few other linguistic publications since, and a tribute to the rigor, breadth and insight of this book." — Frank Heny, *Synthese*

$17.50 598 pages

GRAMMATICAL THEORY

Its Limits and Its Possibilities

Frederick J. Newmeyer

Newmeyer persuasively defends the controversial theory of transformational generative grammar. "A very lucid, thoughtful, and informative discussion. . . . The treatment of controversial issues is judicious and enlightening, and a remarkable range of relevant material is introduced to help clarify them." — Noam Chomsky

$10.00 208 pages

ANAPHORA AND SEMANTIC INTERPRETATION

Tanya Reinhart

Reinhart, whose highly regarded theories of anaphora have influenced much recent research in this area, has in this book two major goals: to analyze sentence-level anaphora in a comprehensive way and to examine the broader issue of the relations between the structural properties of sentences and their semantic interpretation within the hypotheses of the autonomy of syntax and of interpretive semantics.

$10.95 224 pages

ARGUMENTS FOR A NON-TRANSFORMATIONAL GRAMMAR

Richard A. Hudson

One of the first serious challengers to Chomsky's transformational theories of syntax was Richard A. Hudson. In this book he outlines the "daughter-dependency theory," which derives from systemic grammar and generates a *single* syntactic structure for each sentence. "Potentially epochal." — Paul Schachter, *Language*

New Volumes in the North-Holland Linguistic Series

Volume 51

The Interpretation of English Noun Sequences on the Computer

By ROSEMARY LEONARD

1984. xii + 436 pages. US $55.50/Dfl. 150.00. ISBN 0-444-87658-8

This book postulates rules by which noun sequences may be interpreted. It reports and evaluates the results of computer simulation of a native speaker's interpretation of 2,000 noun sequences, selected from approximately 300,000 words of English fiction written between 1700 and the present day.

In the past, interpretive studies have generally been made by intuition or from material encountered by chance. Dr. Leonard's systematic study goes a long way towards filling the gap described by Winograd several years ago: the interpretation by computer of a phrase where there is no observable syntactic link.

Neurologically, it is interesting to see how far interpretation is possible with binary versus simultaneous means and to what extent the brain needs a picture of the world.

CONTENTS: **Chapters: 1.** Introduction. **2.** The Dictionary. **3.** The Noun Sequence Interpretation Program. **4.** Evaluation of the Program and Order of Analysis. **5.** The Performance and Interaction of Features. **6.** What Has Been Achieved in the Composition and Operation of the Program. Appendix I: Samples of Data. Appendix II: Semantic Features. Appendix III: Index of Procedures. Appendix IV: Samples of Interpretations. Bibliography. Index of Authors.

Volume 52

Aspects of Text Structure

An Investigation of the Lexical Organisation of Text

By MARTIN PHILLIPS

1985. xii + 322 pages. US $51.75/Dfl. 140.00. ISBN 0-444-87701-0

This volume develops a theoretical position for the analysis of text, derives a corresponding methodology and describes an investigation of scientific text undertaken along these lines. The theoretical position is of interest in that it focuses upon the substantial nature of language rather than on conventionally recognised levels of linguistic analysis. The methodology is novel since the statistical technique of cluster analysis is used to investigate lexical patterning. This leads to a notion of the lexical macrostructure of text.

CONTENTS: Preface. **Parts: 1. A Theoretical Framework for Text Analysis.** *Chapters: 1.* Meaning, Substance and Aboutness. *2.* Linguistics in the Study of Text. **2. Methodological Consequences.** *3.* Procedures and Categories for Text Analysis. *4.* Investigative Techniques for Text Analysis. *5.* Descriptive Techniques for Text Analysis. **3. Exploration of Text.** *6.* Applying the Methodology. *7.* Term Meaning. *8.* Terms and Text Structure. *9.* Text Structure and Text Typology. **4. Aboutness Reviewed.** *10.* Text, Image and Reality. *Appendices:* 1. Corpus Statistics. 2. Selected Lemmata. 3. ELEN Dendrograms. 4. Lexical Networks in the Science Corpus. 5. Nuclear Node Statistics. 6. Significant Chapter Linkages. 7. Macrostructure of the Science Texts. 8. Percentage of Non-collocating Nodes. Bibliography. Subject Index. Author Index.

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 onward, may be purchased separately.

A list of publications in print and a price list are available from the LSA Secretariat, 1325 18th St. NW, Suite 211, Washington, DC 20036-6501. Reprint editions and back copies may be ordered from Kraus Reprint Corporation, Route 100, Millwood, New York 10546, or Kraus-Thompson Organization, FL-9491 Nendeln, Liechtenstein, Europe. Prices for specific issues and/or volumes may be obtained from these addresses.
