arq

Innovative in conception, unique in breadth and generously illustrated, this pace-setting quarterly publication from Cambridge University Press links, on a global scale, the worlds of architectural practice and research. **arq** regularly includes extensive peer-reviewed sections on design, history, theory, construction, environmental design, information technology and practice – as well as structures, urbanism and documents. These are supplemented by letters, reports, reviews, a directory of specialist research centers and consultancies and an annual index. Each issue opens with a leader and closes with insight, a personal end-piece. In its ten year history, **arq** has published work from all over the world: from Chile to Sweden and from Japan to the Netherlands – with a strong representation from the United Kingdom and United States. **arq**, like architecture itself, is all-embracing and written by and for both practitioners and academics. It provides an outlet for all those who wish to disseminate their work to an international audience.
