Subject Index

Volume 16, Pages 1–621

A
absent pericardium, at risk for endocarditis 182
acute intestinal malabsorption, pulmonary hypertensive crises, intravenous sildenafil as an effective treatment 84
acute myocardial infarction, heavy alcohol intake, in adolescent, with normal coronary arteries 190
acute rheumatic fever, QT dispersion 141
adults, tetralogy of Fallot, surgical repair, pulmonary regurgitation assessment 606
agenesis of right lung, left pulmonary arterial sling, severe stenosis of long tracheal segment 89
alpha-fetoprotein extreme levels, benign intrapericardial teratoma, in newborn 76
Amplatzer duct occluder, modified and angled, transcatheter closure of large patent arterial ducts, in infants, initial clinical experience 378
anomalous connection, right superior caval vein, morphologically left atrium 184
anomalous systemic arterial supply, unusual form, to left lung 305
aortic dissection, in Turner's syndrome
clinical and epidemiological description 430
a "perfect storm" 428
aortopulmonary collateral arteries, treatment options, setting of tetralogy of Fallot, pulmonary atresia 212
application of simplified system of criterions, audit to improve paediatric cardiologic and paediatric cardiac surgical care, evidence from regional approach in Hungary 128
artefactual atrial flutter 195
arterial duct, persistently patent 522
arterial switch, neo-aortic valvar function 481
at risk for endocarditis, absent pericardium 182
athlete's heart, prepubertal male swimmers 61
atresia of, common pulmonary vein 398
atrial septal defects, volume of right ventricle, in children, transesophageal 3-dimensional versus cross-sectional echocardiographic assessment 135
atrioventricular septal defect, intact septal structures, left atrioventricular valvar insufficiency 92
atrioventricular valves, surgical repair of, live three-dimensional echocardiography, paediatric intraoperative epicardial, as guide 34

B
benign intrapericardial teratoma, in newborn, extreme levels of alpha-fetoprotein 76
beyond survival: outcomes that really matter to patients 125
Blalock-Taussig shunt, modified, technique for construction, patient selection criterion 463
bosentan treatment, in children, intracardiac communication and severe pulmonary arterial hypertension 313
bosentan, pulmonary arterial hypertension treatment, congenital cardiac disease 268
bronchopulmonary foregut malformation complex 229
B-type natiuretic peptide (BNP), as marker, paediatric heart failure 314

C
Cantrell's syndrome 95
cardiac defects in children, types of, with Down's syndrome 197
cardiac resynchronization therapy, congestive cardiac failure, in children, chronic cardiac pacing dependence 187
cardiac transplantation, rescue for failing staged palliation, hypoplastic left heart syndrome, in patients 556
cardiologic and neurologic implications, left ventricular hypertrabeculation, noncompaction 405
cardiovascular magnetic resonance, non-invasive tissue characterization, heartache in adolescence 604
cardiovascular magnetic resonance, without radiation, Kawasaki disease, giant aneurysms of coronary arteries 511
children
with cardiac disease, oral anticoagulation management, using computerised system to support decision-making 256
congenital cardiac disease, access to surgery, determining factors, in Guatemala, Central America 385
with congenital cardiac malformations, health and well-being, their families, following open-heart surgery 157
mechanical valves inserted, medium-term follow-up 579
quality of life, development of new measure, congenital cardiac disease 165
reduced pulmonary function, Fontan circulation, exercise capacity 261
children and adolescents
exercise performance, after Ross procedure 40
head-up tilt test, common patterns of response 537
implantable loop recorder use 572
children and young adults, heart failure, molecular mechanisms to medical and surgical strategies 200
children in outpatient setting, transesophageal echocardiography, safety and efficacy of sedation, propofol 152
children with Kabuki syndrome, congenital cardiac malformations 30
chronic cardiac pacing, congestive cardiac failure, in children, cardiac resynchronization therapy 187
clinical and echocardiographic features, Ebstein's malformation, in Sudanese patients 147

https://doi.org/10.1017/S1047951106001430 Published online by Cambridge University Press

clinical and epidemiological description, aortic dissection, in Turner's syndrome 430
coarctation of aorta, intra-atrial thrombus, in neonate 392
common arterial trunk, ischaemic left ventricular dysfunction, surgical repair, coronary arterial anomalies correction 179
comparison of, magnetic resonance angiography and conventional angiography, diagnosis of tetralogy of Fallot 281
computerised system, to support decision-making, oral anticoagulation management, in children with cardiac disease 256
congenital aortic valvar stenosis, real time three-dimensional echocardiographic imaging, operative anatomy correlations 490
congenital cardiac disease
in children, access to surgery, determining factors, in Guatemala, Central America 385
in children, development of new measure, for quality of life 165
cyanotic, late signs 193
families with, quality of life, severity of disease and social disadvantage, impact of 67
psychological symptoms, in patients after surgery 540
pulmonary arterial hypertension, bosentan 268
congenital cardiac malformations
children, health and well-being, their families, following open-heart surgery 157
spectrum, in children, Kabuki syndrome 30
congenital cardiac surgical patients, prioritization, using fuzzy reasoning, problem of waiting list, solution 289
congestive cardiac failure, in children, chronic cardiac pacing dependence, cardiac resynchronization therapy 187
coronary arterial anomalies correction, common arterial trunk, ischaemic left ventricular dysfunction, surgical repair 179
coronary arterial lesions
evaluation, with Kawasaki disease, magnetic resonance coronary angiography 563
Kawasaki disease, pregnancy and delivery, in patients, nationwide survey in Japan 173
current options, long-term results for interventional treatment, pulmonary valvar stenosis 418
cyanotic congenital cardiac disease, late signs 193

D
deficient atrial septation, in selected patients, interventional closure, current treatment of choice 3
development of new measure, for quality of life, in children, with congenital cardiac disease 165
diagnosis following aortic rupture, in infant, treated aortic interruption, post-mortem magnetic resonance imaging 81
diagnosis, management, follow-up, systemic venous drainage, single left superior caval vein to left atrium 590
discrete subaortic stenosis, time of resection, parvovirus myocarditis, incidental detection 596
disposition of specialised conduction system, diverse cardiac morphology seen in hearts, with isomerism of atrial appendages 437
diverse cardiac morphology, in hearts, isomerism of atrial appendages, disposition of specialised conduction system 437
Down's syndrome, cardiac defects in children, types of 197

E
Ebstein's malformation, in Sudanese patients, clinical and echocardiographic features 147
echocardiographic analysis, right ventricular restrictive physiology subtypes, tetralogy of Fallot, surgically treated patients 549
echocardiographic assessment, transesophageal 3-dimensional versus cross-sectional, volume of right ventricle, in children, atrial septal defects 135
echocardiographic imaging, real time three-dimensional, congenital aortic valvar stenosis, operative anatomy correlations 490
ECMO support, lifethreatening arrhythmia, in infancy, successful radiofrequency treatment 316
elective balloon atrial septostomy, in patients, tricuspid atresia, assessment need, Yorkshire Heart Centre 318
endocaditis, at risk for, absent pericardium 182
endomyocardial fibrosis, hydropneumopericardium 310
epoprostenol treatment, children, pulmonary arterial hypertension 317
evidence from regional approach in Hungary, paediatric cardiologic and paediatric cardiac surgical care, audit to improve, application of simplified system of criterions 128
exercise performance, in children and adolescents, after Ross procedure 40
extracardiac total cavopulmonary connections, without routine fenestration, report on consecutive patients 54

F
fenestration, not routine, extracardiac total cavopulmonary connections, report on consecutive patients 54
fetal echocardiography, in high-risk mothers, The Birmingham Women's Hospital experience 320
fibromuscular dysplasia as substrate, systemic and pulmonary hypertension, setting of Moya-Moya disease 495
first choice treatment, pulmonary arterial stenosis, current option 329
Fontan circulation
facilitation, pulmonary arterial stent, temporary implantation 401
reduced pulmonary function, in children, exercise capacity 261
Fontan procedure, in small children, lactate concentration measurement relevance, in serum 275
foregut malformation complex, bronchopulmonary 229
fuzzy reasoning, congenital cardiac surgical patients, prioritization, problem of waiting list, solution 289

G
giant aneurysms of coronary arteries, Kawasaki disease, using cardiovascular magnetic resonance, without radiation 511
giant coronary arterial aneurysms, thrombosis, Kawasaki disease, in infant 510
Guatemalan children, access to surgery, congenital cardiac disease 385

H
Hall of Fame, Aldo R. Castañeda 221
head-up tilt test, common patterns of response, in children and adolescents 537
health and well-being, children and their families, congenital cardiac malformations, following open-heart surgery 157
heart failure, in children and young adults, molecular mechanisms to medical and surgical strategies 200
heart transplantation, systemic right ventricle failure, following atrial inversion procedure (Senning/Mustard), transposition 317

https://doi.org/10.1017/S1047951106001430 Published online by Cambridge University Press

heartache in adolescence, non-invasive tissue characterization, cardiovascular magnetic resonance 604
heavy alcohol intake, in adolescent, with normal coronary arteries, acute myocardial infarction 190
horseshoe lung, pulmonary arterial sling, meandering right pulmonary vein, relationship, scimitar syndrome 300
hydropneumopericardium, endomyocardial fibrosis 310
hypertrabeculation, left ventricular, cardiologic and neurologic implications, noncompaction 405
hypoplastic left heart syndrome
cardiac transplantation, rescue for failing staged palliation, in patients 556
nomenclature, definition, classification 339
right aortic arch, management 504
and spinal muscular atrophy, in infant 78

I
iatrogenic thrombosis, tendinous cords of, tricuspid valve 87
Implantable Cardioverter Defibrillator (ICD) implantation, in patients, repaired Tetralogy of Fallot and pulmonary stenosis 312
implantable loop recorder use, in children and adolescents 572
index, paediatric cardiac intensive care, evaluating results 369
infants
hypoplastic left heart syndrome and spinal muscular atrophy 78
transcatheter closure of large patent arterial ducts, initial clinical experience, modified and angled Amplatzer duct occluder 378
initial clinical experience, transcatheter closure of large patent arterial ducts, in infants, modified and angled Amplatzer duct occluder 378
intact septal structures, atrioventricular septal defect, left atrioventricular valvar insufficiency 92
intact ventricular septum and pulmonary atresia
"wall-to-wall" heart, in patients 18
in patients, tissue Doppler characteristics, changes 395
interventional closure, current treatment of choice, deficient atrial septation, in selected patients 3
intra-atrial thrombus, in neonate, coarctation of aorta 392
intraoperative ultrasound, experience, paediatric cardiac surgery 455
intra-peritoneal pacemaker generator, migrating, life threatening complication 602
intravascular ultrasound, feasibility and safety, coronary atheroma burden, in children, after heart transplantation 318
intravenous sildenafil, as effective treatment, pulmonary hypertensive crises, during acute intestinal malabsorption 84
ischaemic left ventricular dysfunction, common arterial trunk, surgical repair, coronary arterial anomalies correction 179
isomerism of atrial appendages, diverse cardiac morphology in hearts, disposition of specialised conduction system 437

K
Kabuki syndrome, in children, with congenital cardiac malformations 30
Kawasaki disease
coronary arterial lesions, magnetic resonance coronary angiography 563
giant aneurysms of coronary arteries, using cardiovascular magnetic resonance, without radiation 511
giant coronary arterial aneurysms, thrombosis, in infant 510
in Japan, coronary arterial lesions, pregnancy and delivery, in patients, nationwide survey in Japan 173

L
lactate concentration measurement relevance, in serum, Fontan procedure, in small children 275
large pulmonary arteriovenous fistula, neonatal transcatheter closure 593
late signs, cyanotic congenital cardiac disease 193
left anterior interventricular coronary artery, right coronary artery, anomalous origin, tetralogy of Fallot, setting of 501
left atrioventricular valvar insufficiency, atrioventricular septal defect, intact septal structures 92
left lung, anomalous systemic arterial supply, unusual form 305
left pulmonary arterial sling, agenesis of right lung, severe stenosis of long tracheal segment 89
left ventricular hypertrabeculation, cardiologic and neurologic implications, noncompaction 405
LEOPARD syndrome, sudden cardiac death predictability 599
life threatening complication, intra-peritoneal pacemaker generator migrating 602
live three-dimensional echocardiography, paediatric intraoperative epicardial, as guide, surgical repair of, atrioventricular valves 34

M
magnetic resonance angiography and conventional angiography, comparison of, diagnosis of tetralogy of Fallot 281
male swimmers, prepubertal, athlete's heart 61
management of, hypoplastic left heart syndrome, right aortic arch 504
meandering pulmonary vein, Scimitar syndrome, familial variant 308
meandering right pulmonary vein, horseshoe lung, pulmonary arterial sling, relationship, scimitar syndrome 300
mechanical valves inserted, children, medium-term follow-up 579
modified Blalock-Taussig shunt, technique for construction, patient selection criterion 463
morphologically left atrium, right superior caval vein, anomalous connection 184
Moya-Moya disease, setting of, systemic and pulmonary hypertension, fibromuscular dysplasia as substrate 495
Mustard's operation, terminal arrhythmia, in patients 498

N
nationwide survey, pregnancy and delivery, in patients, coronary arterial lesions, Kawasaki disease in Japan 173
neo-aortic valvar function, after arterial switch 481
neonatal cardiac malformations, life-threatening 312
neonatal death, due to transposition, premature closure of oval foramen 586
neonatal transcatheter closure, large pulmonary arteriovenous fistula 593
newborns, alpha-fetoprotein extreme levels, benign intrapericardial teratoma 76
non-invasive tissue characterization, cardiovascular magnetic resonance, heartache in adolescence 604
normal coronary arteries, in adolescent, heavy alcohol intake, acute myocardial infarction 190
nuchal translucency, mystery of 11

https://doi.org/10.1017/S1047951106001430 Published online by Cambridge University Press

O
obese and overweight children, benefits from intervention, opposed to screening of 474
omega-3 fatty acids, paediatric cardiac surgical patients, pharmacological preconditioning 315
open-heart surgery, congenital cardiac malformations, health and well-being of children, their families 157
operative anatomy correlations, real time three-dimensional echocardiographic imaging, congenital aortic valvar stenosis 490
oral anticoagulation management, in children, with cardiac disease, using computerised system to support decision-making 256
oval foramen, premature closure of, neonatal death, due to transposition 586
overweight and obese children, benefits from intervention, opposed to screening of 474

P
pacemaker generator, migrating intra-peritoneal, life threatening complication 602
paediatric cardiac intensive care, evaluating results, index 369
paediatric cardiac surgery
intraoperative ultrasound, experience 455
paediatric cardiac surgery, perioperative red cell salvage 314
paediatric cardiologic and paediatric cardiac surgical care, audit to improve, application of simplified system of criterions, evidence from regional approach in Hungary 128
paediatric cardiology
fuzzy future 252
stem cells and their potential relevance 117
paediatric intraoperative epicardial echocardiography, live three-dimensional, as guide, surgical repair of, atrioventricular valves 34
parvovirus myocarditis, incidental detection, time of resection, discrete subaortic stenosis 596
pediatric cardiothoracic surgery, quantitative analysis of procalcitonin 48
post-mortem magnetic resonance imaging, diagnosis following aortic rupture, in infant, treated aortic interruption 81
pregnancy and delivery, in patients, coronary arterial lesions, Kawasaki disease in Japan, nationwide survey 173
premature closure of oval foramen, neonatal death, due to transposition 586
prepubertal male swimmers, athlete's heart 61
problem of waiting list, solution, congenital cardiac surgical patients, prioritization, using fuzzy reasoning 289
procalcitonin, quantitative analysis of, after pediatric cardiothoracic surgery 48
psychological symptoms, congenital cardiac disease, in patients after surgery 540
pulmonary arterial hypertension, bosentan, congenital cardiac disease 268
pulmonary arterial sling, horseshoe lung, meandering right pulmonary vein, relationship, scimitar syndrome 300
pulmonary arterial stenosis, current option, first choice treatment 329
pulmonary arterial stent, temporary implantation, Fontan circulation, facilitation 401
pulmonary atresia, tetralogy of Fallot, setting of, aortopulmonary collateral arteries, treatment options 212
pulmonary atresia and intact ventricular septum
"wall-to-wall" heart, in patients 18
in patients, tissue Doppler characteristics, changes 395
pulmonary hypertensive crises, during acute intestinal malabsorption, intravenous sildenafil, as effective treatment 84
pulmonary regurgitation assessment, tetralogy of Fallot, surgical repair, in adults 606
pulmonary valvar stenosis, current options, long-term results for interventional treatment 418
pulmonary valve replacement, following, right ventricle, unusual appearance 403
pulmonary vein, common, atresia 398
pulmonary venous obstruction, after repair, totally anomalous pulmonary venous connection, transcatheter implantation of stent 507

Q
QT dispersion, acute rheumatic fever 141
quality of life
for children, development of new measure, congenital cardiac disease 165
in families with congenital cardiac disease, impact of severity of disease and social disadvantage 67
quantitative analysis of procalcitonin, after pediatric cardiothoracic surgery 48

R
radiofrequency catheter ablation, symptomatic neonatal rhabdomyoma 97
real time three-dimensional echocardiographic imaging, operative anatomy correlations, congenital aortic valvar stenosis 490
reduced pulmonary function, in children, with Fontan circulation, exercise capacity 261
report on consecutive patients, extracardiac total cavopulmonary connections, without routine fenestration 54
rescue for failing staged palliation, hypoplastic left heart syndrome, cardiac transplantation, in patients 556
resorbable implants 107
right aortic arch, hypoplastic left heart syndrome, management 504
right coronary artery, anomalous origin, from left anterior interventricular coronary artery, tetralogy of Fallot, setting of 501
right superior caval vein, anomalous connection, morphologically left atrium 184
right ventricle volume, in children, with atrial septal defects, transesophageal 3-dimensional versus cross-sectional echocardiographic assessment 135
right ventricle, unusual appearance, following pulmonary valve replacement 403
right ventricular restrictive physiology subtypes, tetralogy of Fallot, surgically treated patients, echocardiographic analysis 549
Ross procedure, exercise performance, in children and adolescents 40

S
safety and efficacy of sedation with propofol, transesophageal echocardiography, in children in outpatient setting 152
scimitar syndrome
familial variant, meandering pulmonary vein 308
meandering right pulmonary vein, horseshoe lung, pulmonary arterial sling, relationship 300
sedation with propofol, safety and efficacy, transesophageal echocardiography, in children in outpatient setting 152

https://doi.org/10.1017/S1047951106001430 Published online by Cambridge University Press

selected patients, current treatment of choice, interventional closure, for deficient atrial septation 3
serum, lactate concentration measurement relevance, Fontan procedure, in small children 275
severe coronary ostial stenosis, arterial switch operation, transthoracic Doppler echocardiography 320
severe stenosis of long tracheal segment, agenesis of right lung, left pulmonary arterial sling 89
severity of disease and social disadvantage, impact of, families with congenital cardiac disease, quality of life 67
single left superior caval vein to left atrium, systemic venous drainage, diagnosis, management, follow-up 590
specialised conduction system, disposition of, diverse cardiac morphology in hearts, with isomerism of atrial appendages 437
spinal muscular atrophy and hypoplastic left heart syndrome, in infant 78
stem cells, their potential relevance, paediatric cardiology 117
Sudanese patients, Ebstein's malformation, clinical and echocardiographic features 147
sudden cardiac death predictability, LEOPARD syndrome 599
surgical repair of, atrioventricular valves, live three-dimensional echocardiography, paediatric intraoperative epicardial, as guide 34
surgical repair, common arterial trunk, ischaemic left ventricular dysfunction, coronary arterial anomalies correction 179
surgically treated patients, right ventricular restrictive physiology subtypes, tetralogy of Fallot, echocardiographic analysis 549
symptomatic neonatal rhabdomyoma, radiofrequency catheter ablation 97
systemic and pulmonary hypertension, Moya-Moya disease, setting of, fibromuscular dysplasia as substrate 495
systemic venous drainage, single left superior caval vein to left atrium, diagnosis, management, follow-up 590

T

tendinous cords of, tricuspid valve, iatrogenic thrombosis 87
terminal arrhythmia, in patients, Mustard's operation 498
tetralogy of Fallot
  diagnosis, magnetic resonance angiography and conventional angiography, comparison 281
  left anterior interventricular coronary artery, right coronary artery, anomalous origin 501
  pulmonary atresia, aortopulmonary collateral arteries, treatment options 212
  surgical repair, pulmonary regurgitation assessment, in adults 606
  surgically treated patients, right ventricular restrictive physiology subtypes, echocardiographic analysis 549
thrombosis, giant coronary arterial aneurysms, Kawasaki disease, in infant 510
tissue Doppler characteristics, changes, pulmonary atresia and intact ventricular septum, in patients 395
totally anomalous pulmonary venous connection, transcatheter implantation of stent, pulmonary venous obstruction, after repair 507
transcatheter closure of large patent arterial ducts, in infants, initial clinical experience, Amplatzer duct occluder, modified and angled 378
transcatheter implantation of stent, pulmonary venous obstruction, after repair, totally anomalous pulmonary venous connection 507
transesophageal 3-dimensional versus cross-sectional echocardiographic assessment, volume of right ventricle, in children, atrial septal defects 135
transesophageal echocardiography, in children in outpatient setting, safety and efficacy of sedation, with propofol 152
treated aortic interruption, in infant, diagnosis following aortic rupture, post-mortem magnetic resonance imaging 81
treatment options, aortopulmonary collateral arteries, tetralogy of Fallot, setting of, pulmonary atresia 212
tricuspid valve, tendinous cords of, iatrogenic thrombosis 87
Turner's syndrome, aortic dissection
  a "perfect storm" 428
  clinical and epidemiological description 430
types, cardiac defects in children, Down's syndrome 197

V

ventricle-pulmonary artery communications, transcatheter closure, cavopulmonary shunt or Fontan procedure 319
ventricular noncompaction, hypertrabeculation, cardiologic and neurologic implications 405

W

"wall-to-wall" heart, in patient, pulmonary atresia and intact ventricular septum 18

https://doi.org/10.1017/S1047951106001430 Published online by Cambridge University Press
