Figures

2.1 Evolution of (a) patenting and (b) scientific publication concentration by few economies *page* 51
2.2 Innovation is more concentrated than other economic activities 52
2.3 Share of patenting and scientific publishing in innovation-dense areas, by selected countries 57
2.4 Population density does not ensure high innovation density 61
2.5 Diverging growth paths 67
4.1 Trend in U.S. International Trade Commission (USITC) filings on "Unfair Imports": Increases in IPR-related litigation in the United States 116
7.1 Average years of schooling by gender, 2014 and 2018: Mexico, Brazil, and India 182
7.2 Percentage of female graduates by STEM career categories, 2017 183
7.3 Number of researchers by gender in Mexico and Brazil, 1996–2000 and 2011–2015 (thousands of researchers) 184
7.4 India: Evolution of USPTO patents granted (total and those having at least one woman inventor), 1997–2010 187
7.5 Mexico: Evolution of USPTO patents granted (total and those having at least one woman inventor), 1980–2015 188
7.6 Brazil: Evolution of USPTO patents granted (total and those having at least one woman inventor), 1997–2013 189
7.7 Distribution of women in patent assignee type and by technological field in Mexico, Brazil, and India (by percent) 192
7A.1 GDI of Mexico, Brazil, and China vis-à-vis different country groups 218
