FIGURES

1.1 The Spilhaus Projection or World Ocean Map (1979) 2
1.2 Exclusive economic zones (EEZs) typically extend 200 nautical miles (370 kilometers) from coastlines, granting coastal states jurisdictional control over activities like resource exploitation and pollution prevention 14
1.3 Illustration of various maritime zones and spatial layers of judicial control established by the Law of the Sea 15
2.1 Coastal and pier-connected, sheltered offshore drill sites in the Amase oil mining area, Japan (1900) 43
2.2 Beach and pier-based offshore drill sites in Summerland, California (1902) 44
2.3 Indo-Burmah Petroleum Company's drilling operations in the bed of the Irrawaddy River, Lanywa, Upper Burma (circa 1932) 47
2.4 A closer view of several offshore oil derricks erected on piers, with the dike wall visible to the left, Lanywa, Upper Burma (1931) 48
2.5 The Dai-1 Hakuryū, a jack-up rig, the first offshore oil platform constructed in Japan 52
2.6 Seabed-fixed platforms, installed on offshore oil fields discovered by the Dai-1 Hakuryū off Akita Prefecture, Japan, facilitated oil extraction and pipeline transport to the coast 53
3.1 A seadrome as envisioned by Edward R. Armstrong circa 1927 79
3.2 Types of offshore oil and gas platforms 86
3.3 A nighttime rocket launch from Sea Launch's floating platform in the Central Pacific 104
3.4 The nighttime illumination of offshore oil derricks in Lake Maracaibo, 1937 106
3.5 Gas flare from the BP Ula oil platform in the North Sea, April 1, 2012 108
3.6 Satellite image of nighttime illumination over a section of the South China Sea, 2012 111
3.7 OpenStreetMap-annotated image of a section of the South China Sea 112
4.1 Different IPCC projections for global mean sea level rise until 2100 118
4.2 The Global Center on Adaptation's floating office building in Rotterdam, Netherlands, exemplifies adaptation to sea level rise and related problems 123
4.3 This image from Oceanix shows how a "sustainable floating city" located at Busan's waterfront could look like during nighttime 124

4.4 Aerial view of Tange Lab's "Plan for Tokyo 1960," an amphibious regional development proposal 145
4.5 Depiction of one and a half loops of Tange Lab's "Plan for Tokyo, 1960" model 146
4.6 Tange Lab's biological analogy of efficient urban growth following the linear growth of an animal's spine 149
5.1 The SHORAN radionavigation system enabled very precise position fixing for ships and aircraft 200
5.2 The Decca radionavigation tool strongly facilitated position fixing at sea 201
5.3 Marisat 1 and Marisat 2 above the Atlantic and Pacific oceans, the first communication satellites with a focus on the ocean 206
5.4 Overview of Magnavox's Transit receiver equipment complexity, 1968–1976 214
5.5 The Magnavox MX 4102 Transit receiver from 1982 or later served position fixing at sea 215
6.1 One of the two *Triton City* models held by the Lyndon B. Johnson Presidential Library, showcasing a *Triton City* module – a floating truncated tetrahedron 232
6.2 Buckminster Fuller presenting a second *Triton City* model to Charles M. Haar from the US Department of Housing and Urban Development 233
7.1 The 1:20-scale floating platform model (without models of industrial or commercial sites on top) tested in Hawaiian waters during the early 1970s 289
7.2 Floating industrial combine Aquapolis hosting the Japanese exhibition at the 1975 International Ocean Exposition in Okinawa 290
7.3 Marine terminal of the Louisiana Offshore Oil Port (LOOP), opened in 1981 296
7.4 Neft Daşları (Oil Rocks) in the Caspian Sea, a town for oil extraction built by the USSR on platforms 297
7.5 Side view drawing of a module designed for the "Hawaii Floating City Project." 299
8.1 Yellowtail/Japanese amberjack (*Seriola quinqueradiata*), painting by Kawahara Keiga, 1823–1829 328
8.2 Red sea bream (*Pagrus major*), painting by Ogawa Haritsu, eighteenth century 329
8.3 Mariculture off Dongshan, Fujian, China, in a bay of the South China Sea 334
8.4 SalMar's Ocean Farm 1, a huge salmon farm 335
8.5 Ado Pond (*Adoike*) in Kagawa Prefecture, Japan, used for yellowtail farming 351
8.6 Harada Teruo weighing a yellowtail, an assistant taking notes, and several net-cages 354
9.1 Photographs of the marine ecosystem that developed on the hull of an oil platform, dry-docked in Singapore in 1997 371
9.2 A dense colonization of bay barnacles (*Amphibalanus improvisus*) on the hull of a boat during dry-dock maintenance 375
9.3 *Tubastraea coccinea*, a species of sun coral also known as the orange cup coral, displaying fully extended tentacles 376
