Goodb

The CURITY™ Infection Control System, featuring the ULTRAMER™ Catheter, reduces the incidence of UTI by 75%.*

If you're 'an infection control nurse, dealing with UTI is one of your biggest problems.

But there is a way to make it a much smaller problem- 75% smaller, to be exact.

It's the CURITY Infection Control System from Kendall, and clinical studies have proven that it actually reduces the incidence of UTI by 75%. No other product on the market even comes close.

*Data on file.

Why is the CURITY Infection Control System so effective? Because it systematically combats UTI at the four most likely sites of infection.

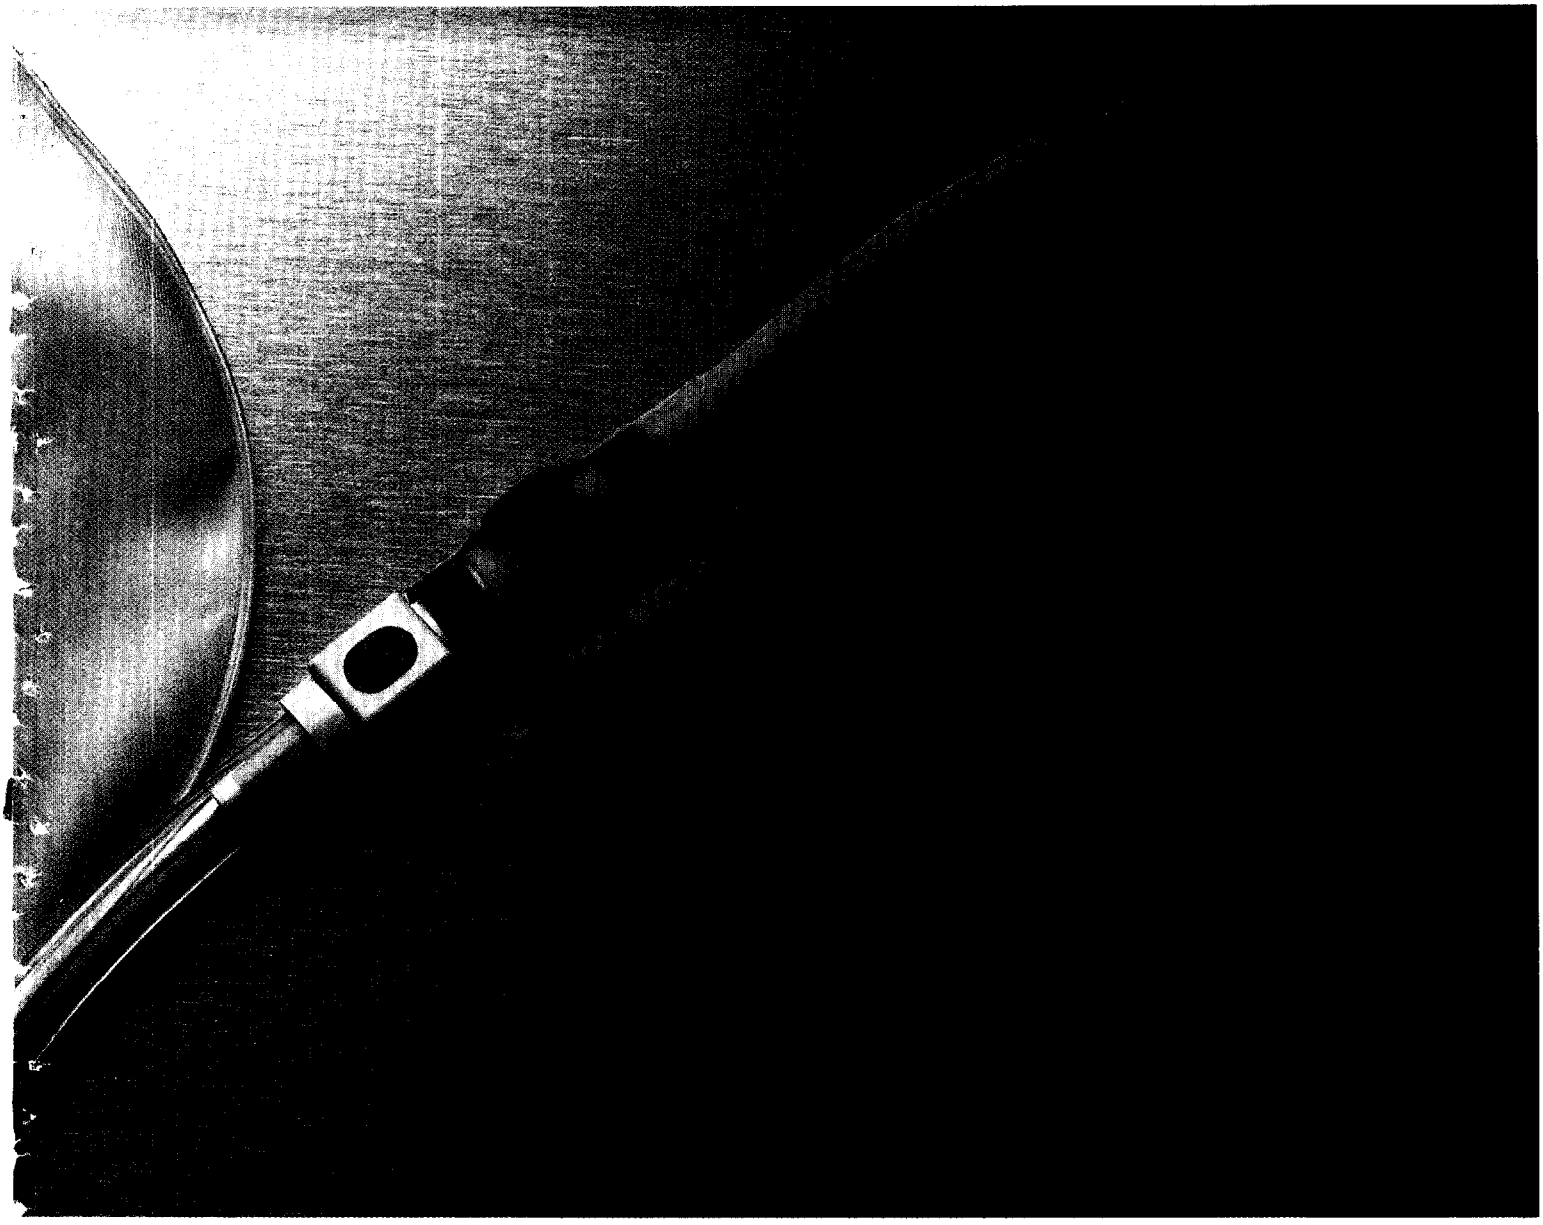

At the Catheter/Mead Junction, the System's unique ULTRAMER Catheter maintains a high degree of lubricity, while indwelling, thus minimizing irritation.

At the Catheter/Tubing Junction, the Tamper Discouraging Seal guards against improper sampling.

At the Tubing/Drainage Bag Junction, the MONO-FLO™ Anti-Reflux Device prevents urine backwash from the bag back into the tube.

At the Drainage Port, the PVP-I drainspout

https://doi.org/10.1086/645985 Published online by Cambridge University Press

ye, UTI.

prevents bacteria from entering the bag, thus preserving a sterile environment.

What's more, the CURITY Infection Control system has also been carefully designed to encourage proper, safe usage. And no nursing intervention is necessary to make the system work-it is pre-assembled.

To learn more about the Kendall commitment to infection control, just return the coupon. Because the sooner you say hello to the CURITY Infection Control System, the sooner you can say goodbye to UTI.

Anyone Can Call Themselves An Infection Control Company. One Company Is.

One company whose history of quality products and services to its customers reflects a dedication to the science of infection control. That company is SURG**IKOS.**

Our history of commitment is founded on more than innovative products. We have always believed in our responsibility to provide health care professionals with quality educational programs -the cornerstone of progress, **ASEPSIS*** The Infection Control **Forum, Programmed Instruction in Asepsis, and other educational programs are just some of the reasons why SURGIKOS is the infection control company.**

From the SURGIKOS Art Collection. Artist Debbie Kuhn's interpretation of protecting patients from nosocomial infections. This original art was featured in ASEPSIS* The Infection Control Forum, Volume 2, Number 6, November-December, 1966.
