INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

Journal of Glaciology publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

GLACIOLOGY

CONTENTS Vol 63 No 239 2017

387 **Jessica A. Badgeley, Erin C. Pettit, Christina G. Carr, Slawek Tulaczyk, Jill A. Mikucki, W. Berry Lyons, MIDGE Science Team**
An englacial hydrologic system of brine within a cold glacier: Blood Falls, McMurdo Dry Valleys, Antarctica

401 **Jessica M.D. Lundin, C. Max Stevens, Robert Arthern, Christo Buizert, Anais Orsi, Stefan R.M. Ligtenberg, Sebastian B. Simonsen, Evan Cummings, Richard Essery, Will Leahy, Paul Harris, Michiel M. Helsen, Edwin D. Waddington**
Firn Model Intercomparison Experiment (FirnMICE)

423 **Kenneth D. Mankoff, Jason D. Gulley, Slawek M. Tulaczyk, Matthew D. Covington, Xiaofeng Liu, Yunxiang Chen, Douglas I. Benn, Piotr S. Głowacki**
Roughness of a subglacial conduit under Hansbreen, Svalbard

436 **Wesley Van Wychen, Jamie Davis, Luke Copland, David O. Burgess, Laurence Gray, Martin Sharp, Julian A. Dowdeswell, Toby J. Benham**
Variability in ice motion and dynamic discharge from Devon Ice Cap, Nunavut, Canada

450 **Laura I. Thomson, Luke Copland**
Multi-decadal reduction in glacier velocities and mechanisms driving deceleration at polythermal White Glacier, Arctic Canada

464 **Conrad Koziol, Neil Arnold, Allen Pope, William Colgan**
Quantifying supraglacial meltwater pathways in the Paakitsoq region, West Greenland

477 **Simon Horton, Bruce Jamieson**
Spectral measurements of surface hoar crystals

487 **Guillaume Jouvet, Julien Seguinot, Susan Ivy-Ochs, Martin Funk**
Modelling the diversion of erratic boulders by the Valais Glacier during the last glacial maximum

499 **Daniele Peano, Florence Colleoni, Aurélien Quiquet, Simona Masina**
Ice flux evolution in fast flowing areas of the Greenland ice sheet over the 20th and 21st centuries

514 **Luisa Von Albedyll, Thomas Opel, Diedrich Fritzsche, Silke Merchel, Thomas Laepple, Georg Rugel**
^{10}Be in the Akademii Nauk ice core – first results for CE 1590–1950 and implications for future chronology validation

523 **Sheng Wang, Tandong Yao, Lide Tian, Jianchen Pu**
Glacier mass variation and its effect on surface runoff in the Beida River catchment during 1957–2013

535 **Xin Wang, Kaiguo Chai, Shiyin Liu, Junfeng Wei, Zongli Jiang, Qionghuan Liu**
Changes of glaciers and glacial lakes implying corridor-barrier effects and climate change in the Hengduan Shan, southeastern Tibetan Plateau

543 **Michael McCarthy, Hamish Pritchard, Ian Willis, Edward King**
Ground-penetrating radar measurements of debris thickness on Lirung Glacier, Nepal

556 **Eythor Gudlaugsson, Angelika Humbert, Karin Andreassen, Caroline C. Clason, Thomas Kleiner, Sebastian Beyer**
Eurasian ice-sheet dynamics and sensitivity to subglacial hydrology

Letters

565 **Adrian McCallum**
Assessing mass balance with the cone penetration test

568 **Olga Erokhina, Irina Rogozhina, Matthias Prange, Pepijn Bakker, Jorge Bernales, André Paul, Michael Schulz**
Dependence of slope lapse rate over the Greenland ice sheet on background climate
