The BULLETIN, the JOURNAL and the REVIEW OF SYMBOLIC LOGIC are the official organs of the Association for Symbolic Logic, an international organization for furthering research in logic and the exchange of ideas among mathematicians, computer scientists, linguists, and others interested in this field.

The JOURNAL invites submission of original scholarly work in mathematical logic and its applications.

Editors

Philip Welch (Coordinating Editor)
School of Mathematics, University of Bristol, Clifton, Bristol, BS8 1TW, UK
(P.Welch@bristol.ac.uk);

Matthias Aschenbrenner

Manuscripts should be submitted using the ASL's online system at http://asljournals.org where instructions directed specifically at using the system can also be found.
Authors should keep a complete copy of their submission and all electronic files from which it was created. They should also consult the more general guidelines for the submission of manuscripts at http://www.aslonline.org/journals-journal-guide.html. These instructions include the Association's standards about previous publication and plagiarism as well as information about copyrights and electronic copies of published papers.
No print offprints will be supplied but authors will receive a link to a freely accessible electronic pdf of their published article. Print offprints may be purchased if required.

TABLE OF CONTENTS

A correct polynomial translation of S4 into intuitionistic logic
Rajeev Goré and Jimmy Thomson 439
Existence of modeling limits for sequences of sparse structures
Jaroslav Nešetřil and Patrice Ossona De Mendez 452
A tail cone version of the Halpern–Läuchli theorem at a large cardinal
Jing Zhang 473
Being low along a sequence and elsewhere
Wolfgang Merkle and Liang Yu 497
A separation result for countable unions of Borel rectangles
Dominique Lecomte 517
Kripke completeness of strictly positive modal logics over meet-semilattices with operators
Stanislav Kikot, Agi Kurucz, Yoshihito Tanaka, Frank Wolter, and Michael Zakharyaschev 533
Minimum models of second-order set theories
Kameryn J. Williams 589
Destructibility of the tree property at $\aleph_{\omega+1}$
Yair Hayut and Menachem Magidor 621
A new dp-minimal expansion of the integers
Eran Alouf and Christian D'elbée 632
A theory of pairs for non-valuational structures
Elitzur Bar-Yehuda, Assaf Hasson, and Ya'acov Peterzil 664
The Harrington–Shelah model with large continuum
Thomas Gilton and John Krueger 684
Definably simple stable groups with finitary groups of automorphisms
Ulla Karhumäki 704
ITP, ISP, and SCH
Sherwood Hachtman and Dima Sinapova 713
On a metric generalization of the *tt*-degrees and effective dimension theory
Takayuki Kihara 726
Independence in generic incidence structures
Gabriel Conant and Alex Kruckman 750
G_δ sets in σ-ideals generated by compact sets
Maya Saran 781
Algebraic new foundations
Paul K. Gorbow 798
Spaces of types in positive model theory
Levon Haykazyan 833
Axiomatization of provable *n*-provability
Evgeny Kolmakov and Lev Beklemishev 849
Markov's principle and subsystems of intuitionistic analysis
Joan Rand Moschovakis 870
