19TH INTERNATIONAL DESIGN CONFERENCE

18-21 MAY 2026, CAVTAT - DUBROVNIK - CROATIA

Editors

Mario Štorga, University of Zagreb FSB, Croatia
Stanko Škec, University of Zagreb FSB, Croatia
Tomislav Martinec, University of Zagreb FSB, Croatia
Dorian Marjanović, University of Zagreb FSB, Croatia
Neven Pavković, University of Zagreb FSB, Croatia

Programme Committee

P. John Clarkson, University of Cambridge, United Kingdom
Tim C. McAloone, Technical University of Denmark, Denmark
Julie Stal-Le Cardinal, CentraleSupélec, France
Sandro Wartzack, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
Stanko Škec, University of Zagreb FSB, Croatia
Mario Štorga, University of Zagreb FSB, Croatia

Scientific Advisory Board

Abi Akle, Audrey, ESTIA, France
Achiche, Sofiane, Polytechnique Montreal, Canada
Aflatoony, Leila, Georgia Institute of Technology, United States of America
Ahmed-Kristensen, Saeema, University of Exeter, United Kingdom
Ahrens, Florian, Technische Universität Chemnitz, Germany
Ahumada-Tello, Eduardo, Autonomous University of Baja California, Mexico
Akaki, Mayu, Ritsumeikan University, Japan
Akhtar, Md Haseen, IIT Hyderabad, India
Albers, Albert, KIT Karlsruhe Institut of Technology, Germany
Arrouf, Abdelmalek, LEMPAU, University of Batna1, Algeria
Bartz, Marcel, TU Dortmund, Germany
Basan, Robert, University of Rijeka, Faculty of Engineering, Croatia
Bauer, Tom, Arts et Métiers, France
Baxter, Weston, Imperial College London, United Kingdom
Becattini, Niccolo, Politecnico di Milano, Italy
Bencetić, Sanja, University of Zagreb Faculty of Architecture, School of Design, Croatia
Berglund, Anders, Mälardalen University, Sweden
Bertoni, Alessandro, Blekinge Institute of Technology, Sweden
Bertoni, Marco, Blekinge Institute of Technology, Sweden
Bjelland, Øystein, Norwegian University of Science and Technology, Norway
Bojčetić, Nenad, University of Zagreb FSB, Croatia
Bordegoni, Monica, Politecnico di Milano, Italy

https://doi.org/10.1017/pds.2025.10356 Published online by Cambridge University Press

Borg, Jonathan, University of Malta, Malta
Borgianni, Yuri, Free University of Bozen|Bolzano, Italy
Boujut, Jean-François, Grenoble INP, France
Brahma, Arindam, Chalmers University of Technology, Sweden
Brisco, Ross, University of Strathclyde, United Kingdom
Burgess, Jon, Arts University Bournemouth, United Kingdom
Bursac, Nikola, Hamburg University of Technology, Germany
Burvill, Colin Reginald, The University of Melbourne, Australia
Bylund, Nicklas, N/A, United States of America
Cagan, Jonathan, Carnegie Mellon University, United States of America
Caldwell, Nicholas, University of Suffolk, United Kingdom
Calvo, Rafael A., Imperial College London, United Kingdom
Campean, Felician, University of Bradford, United Kingdom
Cantamessa, Marco, Politecnico di Torino, Italy
Carulli, Marina, Politecnico di Milano, Italy
Caruso, Giandomenico, Politecnico di Milano, Italy
Casakin, Hernan, Ariel University, Israel
Cascini, Gaetano, Politecnico di Milano, Italy
Cash, Philip, Northumbria University, United Kingdom
Chandra, Sushil, BML Munjal University, India
Chantzaras, Christos, Frankfurt University of Applied Sciences, Germany
Chiarello, Filippo, Università di Pisa, Italy
Childs, Peter R. N., Imperial College London, United Kingdom
Chulvi, Vicente, Universitat Jaume I, Spain
Clarkson, P. John, University of Cambridge, United Kingdom
Cluzel, François, CentraleSupélec, France
Colombo, Samuele, University of Strathclyde, United Kingdom
Conrad, Jan, Hochschule Kaiserslautern, Germany
Coskun, Aykut, Koç University, Turkiye
Coutellier, Daniel, INSA Hauts-de-France, France
Čok, Vanja, University of Ljubljana, Faculty of Mechanical Engineering, Slovenia
Čular, Ivan, University of Zagreb FSB, Croatia
D'Amico, Enrique, National University of La Plata, Argentina
de Paula, Istefani, Universidade Federal do Rio Grande do Sul, Brazil
Deininger, Michael, University of Cincinnati, United States of America of America
Dekoninck, Elies Ann, University of Bath, United Kingdom
Del Curto, Barbara, Politecnico di Milano, Italy
Del Giorgio Solfa, Federico, National University of La Plata, Argentina
Demke, Niels, Helmut-Schmidt-Universität/Universität der Bundeswehr Hamburg, Germany
Demoly, Frédéric, Université de Technologie de Belfort-Montbéliard, France
Demšar, Ivan, University of Ljubljana, Faculty of Mechanical Engineering, Slovenia
Devadula, Suman, MIT World Peace University, India
Eckert, Claudia, The Open University, United Kingdom
Edel, Fabian, Fraunhofer IAO, Germany
Eifler, Tobias, Technical University of Denmark, Denmark
Eikevåg, Sindre Wold, Norwegian University of Science and Technology, Norway
Eisenbart, Boris, Swinburne University of Technology, Australia
Ellman, Asko Uolevi, Tampere University, Finland
Elverum, Christer W., Norwegian University of Science and Technology, Norway
Eppinger, Steven, Massachusetts Institute of Technology, United States of America
Erbe, Torsten, ASML BV, Netherlands
Erden, Zühal, Atilim University, Turkiye
Eriksson, Vikki, Aalto University, Finland
Eriksson, Yvonne, Mälardalen university, Sweden
Eynard, Benoit, Université de Technologie de Compiègne, France
Fain, Nuša, Carleton University, Canada
Fantoni, Gualtiero, Università di Pisa, Italy

https://doi.org/10.1017/pds.2025.10356 Published online by Cambridge University Press

Fargnoli, Mario, Sapienza Uiversity of Rome, Italy
Farrugia, Philip, University of Malta, Malta
Favi, Claudio, Researcher and Lecturer, Italy
Fayyad, Nadine, University of Petra, Jordan
Fazelpour, Mohammad, University of Maryland, United States of America
Finger - CMU, Susan, Carnegie Mellon University, United States of America
Fortin, Clement, Skolkovo Institute of Science and Technology, Russia
Gaha, Raoudha, Université de Technologie de Compiègne, France
García-García, Carlos, Universitat Jaume I, Spain
Gembarski, Paul Christoph, Leibniz Universität Hannover, Germany
Georgiev, Georgi V., University of Oulu, Finland
Gerhard, Detlef, Ruhr-University Bochum, Germany
Gericke, Kilian, University of Rostock, Germany
Gero, John, Drexel University, United States of America
Gidel, Thierry, Université de technologie de Compiègne, France
Giordano, Vito, Università di Pisa, Italy
Giunta, Lorenzo, University of Bath, United Kingdom
Göbel, Jens Christian, Rheinland-Pfälzische Technische Universität, Germany
Göhlich, Dietmar, TU Berlin, Germany
Goker, Mehmet, N/A, United States of America
Gomes, Giovana Monteiro, Technical University of Denmark, Denmark
Gonçalves, Milene, Delft University of Technology, Netherlands
Gong, Zhengya, University of Oulu, Finland
Gooch, Shayne, University of Canterbury, New Zealand
Gooding, Luke, Stockholm Environment Institute - York, United Kingdom
Gopsill, James, University of Bristol, United Kingdom
Götz, Stefan, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
Goucher-Lambert, Kosa, University of California Berkeley, United States of America
Goudswaard, Mark, University of Bristol, United Kingdom
Graziosi, Serena, Politecnico di Milano, Italy
Gruhier, Elise, Arts et Métiers, France
Guagliano, Mario, Politecnico di Milano, Italy
Guérineau, Julia, École de technologie supérieure, Canada
Guerra, Andrea Luigi, Université de Technologie de Compiègne, France
Günay, Aslı, University of Twente, Netherlands
Gupta, Ravi Kumar, National Institute of Technical Teachers Training and Research Bhopal, India
Guzzo, Daniel, Technical University of Denmark, Denmark
Hackenberg, Georg, University of Applied Sciences Upper Austria, Austria
Han, Ji, The University of Exeter, United Kingdom
Hane Hagström, Malin, Chalmers University of Technology, Sweden
Hashemi Farzaneh, Helena, MTU Aero Engines, Germany
Hicks, Ben, University of Bristol, United Kingdom
Hirz, Mario, Graz University of Technology, Austria
Hoftijzer, Jan Willem, Delft University of Technology, Netherlands
Holder, Daniel, University of Stuttgart, Germany
Holliman, Alexander 'Freddie', University of Strathclyde, United Kingdom
Howell, Bryan, BYU, United States of America
Huang, Tao, East Tennessee State University, United States of America
Hurst, Ada, University of Waterloo, Canada
Husung, Stephan, Technische Universität Ilmenau, Germany
I. Hallstedt, Sophie, Chalmers University of Technology, Sweden
Ilies, Horea, University of Connecticut, United States of America
Inkermann, David, Technische Universität Clausthal, Germany
Ion, William, University of Strathclyde, United Kingdom
Isaksson, Ola, Chalmers University of Technology, Sweden
Jablokow, Kathryn, Manhattan University, United States of America

19TH INTERNATIONAL DESIGN CONFERENCE

18-21 MAY 2026, CAVTAT - DUBROVNIK - CROATIA

TABLE OF CONTENTS

Structuring the design space while exploring it: a cognitive perspective on design space exploration pp. 1 - 10
Abi Akle A.

Toward design for complexity: an integrated framework for iterative co-evolution across complex socio-technical systems pp. 11 - 21
Alrizqi M., Summers J., Kramer J.

Worlding the sense of place: narrative design approach to reimagining regional resources pp. 23 - 32
Hayama Y., Kilinc Y.

Assumption-making in ill-structured problems: a reflexive thematic analysis pp. 33 - 42
Kashyap K., Singh V.

Measure it to manage it – quantitative review of product family complexity metrics pp. 43 - 52
Kehrhahn L., Meyer M., Meßerschmidt O. J., Gumpinger T.

Assessing the effects of product family design strategies on resource consumption and costs: an extended axiomatic design approach pp. 53 - 62
Kehrhahn L., Meyer M., Meßerschmidt O. J.

Future Archeologies Canvas: a visual tool for facilitating speculative ideation and revealing limits of futures perception pp. 63 - 72
Lecuna A., Maciejko M.

Mapping design research methods: foundations for a design research quality hub pp. 73 - 82
Neumann N., Pinquié R., Ribeiro Assis G. B.

Artificial co-intelligence in multi-domain platform development: what is now and what is next? pp. 83 - 92
Panarotto M., Cascini G.

Guidelines for dual impact research methodology: a framework for industry-academia collaboration pp. 93 - 102
Pereira Pessoa M. V., Gibson I.

TRL-based mapping of biomimetic projects: identification of development patterns and their influencing factors pp. 103 - 112
Saury A., Fayemi P-E., Houette T., Cousin J-M., Fortin J., Dujany A.

Room for critique: spatial and sensory design of constructive feedback environments pp. 113 - 122
Thoring K., McTeague C., Thannheimer F.

Foresight prototyping: developing an evaluation framework and strategy for future-oriented design pp. 123 - 132
Wang J., Zhu L., Li J.

Employee-centred process analysis for VR integration in product development pp. 133 - 142
Abughalia A., Stechert C.

Boundary objects in co-designing AI systems: a case study of supporting cross-functional collaboration pp. 143 - 152
Aranda-Muñoz Á., Yamamoto Y., Sandström K.

The seven parameters of organizational change pp. 153 - 162
Bertrand O., Calamel L., Gardoni M., Stal-Le Cardinal J.

How to develop a venture clienting strategy? pp. 163 - 172
Chitsazzadeh M., Koldewey C., Dumitrescu R.

https://doi.org/10.1017/pds.2025.10356 Published online by Cambridge University Press

Design tools as catalysts for shared problem framing in West African entrepreneurial contexts pp. 173 - 182
Dola K. S., Boujut J-F., Lecomte C.

12 roles for the organisational design of data-driven product management pp. 183 - 192
Fichtler T., Petzke L., Skupin S., Grigoryan K., Koldewey C., Dumitrescu R.

Assessing induction programme as a service: reflections on assessing organisational services through service design lens pp. 193 - 201
Ganwani S., Ratkal S., Konar K., Mahamuni R.

Empowering designer-artisan partnership through capability-based co-design pp. 203 - 213
Hu J., Hur E., Jia X.

Exploring the preparation of CAD models in collaborative design sessions for mass personalised products: a case study on a custom dental abutment pp. 215 - 224
Huić I., Kosec P., Martinec T., Škec S.

Identifying the right BOM setup in engineer-to-order companies: a focus identification model pp. 225 - 235
Kourtis G. K., Andersen J. D., Mortensen J. H., Hvam L., Mortensen N. H.

Co-creation with end-users to respond to the B2B industry: a case study pp. 237 - 245
Lee-Remond S.

Identifying challenges and limitations of interface modeling in multi-brand product engineering processes pp. 247 - 256
Mitschang O., Roth D., Kreimeyer M.

Co-designing responses to stakeholder misalignments in a complex infrastructure project: a design science approach pp. 257 - 266
Mowlaei Z., Trauernicht N., Braaksma J.

From models to impact: a human-AI approach for effective support of collaborative teams in agile product development pp. 267 - 276
Ognevoj R., Musawi A., Bugueno M., Busch M., Batora M., Ritzer K., Bursac N., Paetzold-Byhain K.

From scenarios to negotiation games: staging the co-evolution of problem and solution spaces pp. 277 - 286
Pedersen S.

The static vs. dynamism paradox in value-driven design: a descriptive study of value management challenges in complex system design pp. 287 - 296
Persehais A., Gidel T., Fayemi P-E.

Teamflow in product development teams: designing resilient engineering environments pp. 297 - 306
Ritzer K., Krueger N., Musawi A., Ohlmann N., Koenig L., Krause A., Förster F., Bursac N.

Design for mission-driven technology maturation pp. 307 - 316
Sommer A. F., Pisanu A.

Agile alignment in production system development processes pp. 317 - 326
Trolle J., Rosio C.

Rethinking daily stand-ups: AI analysis to identify improvement potentials in agile development teams pp. 327 - 336
van der Kamp C., Musawi A., Bursac N., Ritzer K.

Towards an intelligent design support framework balancing risks and user experience: a case study in pharmaceutical packaging pp. 337 - 346
Bianco A., Farrugia P., Pizzuto M. A.

Be yourself – be an engineer: personal strengths and value in an interconnected engineering ecosystem pp. 347 - 356
Eckert C., Hallstedt S. I.

Leveraging extreme-scale simulation data: a workflow framework for multidisciplinary simulator integration pp. 357 - 366
Graessler I., Doehner N.

https://doi.org/10.1017/pds.2025.10356 Published online by Cambridge University Press

Development of perpetual innovative products: overcoming uncertainties by testing pp. 367 - 376
Hemmerich J., Tahera K., Deeg F., Koch D., Lanza G., Matthiesen S., Grauberger P.

Navigating knowledge silos and system distrust in cross-sectoral R&D pp. 377 - 386
Karamova A., Fortin C., Nikolaev A.

Decisive design: how spatial arrangements shape group decision-making pp. 387 - 396
Klöckner H. W., McTeague C., Liu S., Dreyer S., Thoring K.

Inventory of design, engineering and analysis tool environments (IDEATE) pp. 397 - 406
Morris N., Raines J., Hicks B., Gopsill J., Sanusi M., Robinson T., Price M.

Touch experience framework for a data-informed design of textile surfaces pp. 407 - 416
Quattelbaum B., Gunarathna M., Stylidis K.

Designing a knowledge audit for human-AI knowledge augmentation: a study in a consulting firm pp. 417 - 426
Su Y., Mirafzal M. R., Stal-Le Cardinal J.

Knowledge representation in product design: a literature review pp. 427 - 436
Wang Y., Jiang P., Han J.

Capability-based engineering transformation – the periodic table of engineering capabilities pp. 437 - 446
Wyrwich F., Hanke F., Trienens M., Hovemann A., Dumitrescu R.

A computational framework for design-by-analogy using semantic-network representations pp. 447 - 456
Zuo H., Yin Y., Wang B., Wu Q., Chen L., Cai Z., Jing Q., Hazeri K., Zhan B., Haydon Rowe S., Vohra S., Childs P., Liu R.

Computational design tools for occupational therapists: a framework for integrating assistive technology design, customization, and prescription pp. 457 - 466
Aflatoony L., Kolarić S.

Designing a decision tool to decide between two support methods for culture-sensitive creative problem-solving pp. 467 - 475
Bastian A., Fehrenbacher J., Albers A.

Designing for well-being: a wearable prototype supporting emotional regulation through immersive multisensory interaction pp. 477 - 486
Bordegoni M., Carulli M., Zamuner G., Arici R., Chiarion A., Sartorio G.

A lean experimental approach for proof-of-concept investigation pp. 487 - 496
Breuning C., Kreimeyer M.

Evaluating design automation from user input to production – insights from the bike connector tool pp. 497 - 506
Bürkli J., Ritter S., Beutler P., Hofmann U., Stocker G., Ferchow J., Meboldt M.

Evaluating TRIZ with and without LLM support: an experimental study on engineering problem-solving pp. 507 - 516
Čok V., Motte D., Hmina K., El Hassani I., Demšar I., Tavčar J., Vukašinović N.

A design tool to support the specification of mixed reality prototypes pp. 517 - 526
Cox C., Snider C., Kukreja A., Ormerod I., Ballantyne R., McClenaghan A., Gopsill J., Hicks B.

Decide-Adapt-Reuse: a decision framework to reuse or adapt metamodels for new clinch joint designs pp. 527 - 536
Einwag J-M., Wartzack S. J., Goetz S.

Comparing human, LLM, and LLM-QFD approaches to technical requirement extraction pp. 537 - 546
Fain N., Vukašinović N., Čok V.

From minimum viable product via size levels to modular product family – case study on air filtration units pp. 547 - 556
Ganze N., Jakschik S., Paetzold-Byhain K.

Set-based design approach for renewable energy integration in social housing: design space mapping with a morphological chart pp. 557 - 566
Gartzia S., Abi Akle A., Hamwi M., Lizarralde I.

https://doi.org/10.1017/pds.2025.10356 Published online by Cambridge University Press

Proposing a PLM architecture framework for consistency in the engineering of machine tools pp. 567 - 576
Gesmann L., Kallus V., Rapp S., Albers A.

Compatibility-optimized selection of solution principles using mixed-integer linear programming pp. 577 - 586
Haddad M-S., Seibel A.

Integrating manufacturing constraints in existing generative design workflows: wall thickness and cooling channel considerations pp. 587 - 596
Hentschel R., Soika J., Pastor F. R., Rosnitschek T., Günther D., Volk W., Zimmermann M., Tremmel S.

Virtual reality-supported empathy in design: experimental evidence on problem framing and ideation pp. 597 - 606
Hu X., Casakin H., Georgiev G. V.

Rethinking design methods in the age of AI – consequences for practice, education, and research pp. 607 - 616
Inkermann D.

Dual-advocate reflection cards: supporting multifaceted and critical reflection on the design process pp. 617 - 626
Ito A., Taoka Y., Saito S.

Utilizing form-finding in mechanical engineering design using basic structural FEA pp. 627 - 636
Jungreitmayr F.

Expert-based evaluation of digital twin transfer potential for space systems applications pp. 637 - 646
Kessler L., Gadzo E., Koch A.

Towards a methodical framework for the design of functional surfaces in circular automotive engineering pp. 647 - 656
Kizgin U. V., Püllmann D., Stein A., Nolte B., Thomas M., Vietor T.

Visualizing and structuring complex bills of materials: a framework for enhanced engineering operations in custom manufacturing pp. 657 - 666
Kourtis G. K., Hvam L., Fernandez Correa M. F., Johnsen S.

Structure-based similarity searches to improve the reuse of assemblies and functional units in plant engineering – use cases and implementation verification with a large language model as a search tool pp. 667 - 676
Krüger L., Paetzold-Byhain K.

A product-oriented visualization method supporting communication and planning in engineering reviews pp. 677 - 686
Kull P., Sievers T., Schlegel M., Förster F., Albers A., Bursac N.

A systematic review of myopia compensation techniques in HMDs pp. 687 - 696
Li J., Stechert C.

Developing and validating a user-centric information structure for design methods pp. 697 - 706
Mayookh M., Srinivasan V.

Designing digital twins: a graph-based schema to enable systematic cost-benefit analysis pp. 707 - 716
McClenaghan A., Gopsill J., Hicks B.

Why cost estimation matters for design decisions in the early phases of product development and what practitioners expect from artificial intelligence pp. 717 - 726
Michelberger C., Klöpfer K., Huber M. F.

Enabling the coding of affordances based on the UX grammar pp. 727 - 736
Monti T., Yannou B., Montagna F.

Designing for subjective well-being: a VDL canvas and insight cards for exploring positive user experiences pp. 737 - 746
Nam H., Kim C.

Utilising 2D tracking to understand individual difference and personalisation in ergometer rowing pp. 747 - 756
Ormerod I., Bellamy M., Braschi A., Fraser M., Snider C.

https://doi.org/10.1017/pds.2025.10356 Published online by Cambridge University Press

A key indicator for integral vs differential design of battery packs in battery electric vehicles under structural dynamic loads pp. 757 - 766

Thermal process monitoring for part certification in material extrusion additive manufacturing pp. 2071 - 2080
Sasson S. H., Elverum C. W., Eikevåg S. W.

Systematic identification of components suitable for additive manufacturing to enhance product circularity and reduce environmental impacts pp. 2081 - 2090
Scherer N., König K., Duve M., Vielhaber M., Heieck F.

A concept for AI supported knowledge extraction in design for additive manufacturing pp. 2091 - 2100
Schmitt P., Zorn S., Gericke K.

Evaluation of electrical contacting approaches for additively manufactured conductive polymer composites pp. 2101 - 2110
Schulze L., Nowka M., Hilbig K., Vietor T.

Investigation of TPMS superposition to enhance heat transfer surface area and overhang surface reduction in compact heat exchanger design pp. 2111 - 2120
Seidler A., Holtzhausen S., Paetzold-Byhain K.

Investigation into the rolling resistance of novel 3D printed e-scooter tyres pp. 2121 - 2131
Stilwell G., White R., Sharp H., McIntosh R., Everett M., Gooch S.

Designing for compliance at the microscale: DfAM lessons from a 2PP-printed bellows structure for sensing and actuation pp. 2133 - 2140
Stubberud V., Nysæter S., Steinert M., Johnsen H. J. D.

Circular design meets environmental sensing: a comparative study pp. 2141 - 2150
Thomson R., Birnie S., Millar R.

From Earth gravity to microgravity: benchmarking additively manufactured particle-damped structures in the Einstein-Elevator pp. 2151 - 2160
Yu W., Oel M., Lotz C., Meyer I., Niedermeyer J., Maalaoui M., Mesecke L., Lachmayer R.

Design and evaluation of an AI-based application to enhance creativity in design thinking workshops pp. 2161 - 2171
Akaki M., Katayama K., Nishioka R.

Handling AI-generated knowledge artifacts in generative product engineering pp. 2173 - 2182
Becker M., Mollahassani D., Schleifer S., Goetz S., Wartzack S. J., Göbel J. C.

Challenges hindering the application of GenAI methods in engineering design and the product development process: a meta-analysis pp. 2183 - 2192
Berger E., Henke J., Mehlstäubl J., Paetzold-Byhain K.

From geometry to function: towards context-aware generative AI for engineering design pp. 2193 - 2202
Berger E., Herrmann K., Pusch F., Kriesell T., Gembarski P., Mehlstäubl J., Lachmayer R., Paetzold-Byhain K.

Comparison of evolutionary, reinforcement and active learning for simulation-based design space exploration pp. 2203 - 2212
Bleisinger O., Keil M. V., Eigner M.

An LLM model to guide and enrich the understanding of stakeholder value and development of product requirements pp. 2213 - 2222
Cagan J., Sha V.

From online reviews to Kano model: a large language model method and case study pp. 2223 - 2232
Chiarello F., Giordano V., Marconcini G.

Object detection in technical drawings for data-driven design: the case of patents pp. 2233 - 2242
Consoloni M., Marino G., Meini D., Socci L., Giordano V., Fantoni G.

A data-driven approach to studying dominant designs through patent images pp. 2243 - 2252
Consoloni M., Meini D., Marino G., Socci L., Giordano V., Fantoni G.

LLM-based voice chatbot surveys as an alternative to post-experience questionnaires: probe-controlled, ultra-short field interviews pp. 2253 - 2262
Ding F., Taoka Y., Nakatani M.

AI applications in requirements engineering: a systematic mapping study pp. 2263 - 2272
Dogru M. S., Penkert J., Mahr F., Düser T.

Generating vehicle designs using probabilistic programs and reinforcement learning pp. 2273 - 2282
Elenius D., Ghiglino A., Agarwal K., Samplawski C., Roy A., Jha S., Alonso J. J., Cobb A.

Reinforcement learning for the design of mechanisms using available bars and pins pp. 2283 - 2292
Escande M., Shea K., Stankovic T.

How would engineers use LLMs for assembly search if they could? – An empirical study for fostering generative AI-driven design reuse in the future pp. 2293 - 2302
Fastabend J., Agovic I., Roth D., Neumann R., Hammer C., Kreimeyer M.

On using LLM reasoning to support reflection in design thinking pp. 2303 - 2312
Giota V., Karageorgos A., Koronis G., Lallas E.

Engineering design through dialogue: a method for analysing speech-based human-AI conversation pp. 2313 - 2322
Gunn K., Brisco R., Holliman A. F., Yang E., Macfie R.

Entity matching for recurring engineering components: a bottom-up enabler for reference architecture reconstruction pp. 2323 - 2332
Hanke F., Feld M., von Heißen O., Tagscherer K., Wyrwich F., Trienens M., Hovemann A., Dumitrescu R.

In search for working principles using large language models: an experimental study pp. 2333 - 2341
Hanspach F., Gericke K., Dietrich U., Eisenbart B.

Still no smart service? A review of technical barriers to smart service adoption in the GenAI era pp. 2343 - 2352
Heuwinkel T., Weller J., Gabriel S., Kürpick C., Dumitrescu R.

Can large language models understand engineering design patents? An exploratory study pp. 2353 - 2362
Jiang P., Wang Y. and Han J.

Contextualizing sensor data: integrating user voice in data-driven design pp. 2363 - 2372
Johnson K., Ahmed-Kristensen S.

AI-based scenario management for SMEs: the need for modular, explainable and reusable foresight pipelines pp. 2373 - 2382
Knepler J., Seidenberg T., Grigoryan K., Asmar L., Dumitrescu R.

A structural framework for generative engineering and design assistance systems development pp. 2383 - 2392
Köring T., Gerhard D.

Evaluating large language models for technology-oriented searches in engineering design pp. 2393 - 2402
Koutsouvelis V., Silipigni F., Becattini N.

Automatic feature recognition from imperfect models using a novel workflow of data surrogation pp. 2403 - 2412
Kukreja A., Cox C., Gopsill J., Paetzold-Byhain K., Snider C.

Interactive visualisation of collaborative dynamics: a VLM-based approach for behavior and affect analysis pp. 2413 - 2422
Liu S., McTeague C., Klöckner H. W., Dreyer S., Thoring K.

How are professional practices adopting generative AI? The case of an engineering design and product development team pp. 2423 - 2432
Luke T., Mesa D., Tan L., Kuys J., Kocsis A.

Evaluating large language models for automated design structure matrix extraction from unstructured documents: an empirical study pp. 2433 - 2442
Majumder A., Parasuram S., Bhattacharya K., Chakrabarti A.

Automatic assessment of rust level on screws using convolutional neural networks pp. 2443 - 2452
Mandolini M., Manuguerra L., Dimanche S., Formentini G.
