APSR EXTERNAL REVIEWERS, 2000–2001

The peer review process on which scientific publication relies depends on the intellectual contributions and generosity of those scholars who contribute their time to read and evaluate the work of others. The Editor and the Editorial Board thank the following scholars, who served as manuscript reviewers from August 15, 2000, through August 17, 2001, as well as all those (2,126) who have participated in the process during the two terms of our service.
