BEING HUMAN IN THE DIGITAL WORLD

Being Human in the Digital World is a collection of essays by prominent scholars from various disciplines exploring the impact of digitization on culture, politics, health, work, and relationships. The volume raises important questions about the future of human existence in a world where machine readability and algorithmic prediction are increasingly prevalent and offers new conceptual frameworks and vocabularies to help readers understand and challenge emerging paradigms of what it means to be human. *Being Human in the Digital World* is an invaluable resource for readers interested in the cultural, economic, political, philosophical, and social conditions that are necessary for a good digital life. This title is also available as Open Access on Cambridge Core.

Beate Roessler is a professor of philosophy at the University of Amsterdam. She is the author of *The Value of Privacy* (2004) and *Autonomy: An Essay on the Life Well-Lived* (2021). She is a member of the American Academy of Arts and Sciences.

Valerie Steeves is a professor in the Department of Criminology of the Faculty of Social Sciences at the University of Ottawa. She is the principal investigator of the eQuality Project, a multimillion-dollar project funded by the Social Sciences and Humanities Research Council of Canada researching young people's experiences online.
