EXPERT IGNORANCE

Today, a transnational constellation of 'rule of law' experts advise on 'good' legal systems to countries in the Global South. Yet these experts often claim that the 'rule of law' is nearly impossible to define, and they frequently point to the limits of their own expertise. In this innovative book, Deval Desai identifies this form of expertise as 'expert ignorance'. Adopting an interdisciplinary approach, Desai draws on insights from legal theory, sociology, development studies, and performance studies to explore how this paradoxical form of expertise works in practice. With a range of illustrative cases that span both global and local perspectives, this book considers the impact of expert ignorance on the rule of law and on expert governance more broadly. Contributing to the study of transnational law, governance, and expertise, Desai demonstrates the enduring power of proclaiming what one does not know. This title is available as Open Access on Cambridge Core.

DEVAL DESAI is Lecturer in International Economic Law at the University of Edinburgh. He is a Fellow of the Royal Society of Arts and the Young Academy of Scotland, and was an inaugural International Rule of Law Fellow at the Bingham Centre.

CAMBRIDGE STUDIES IN TRANSNATIONAL LAW

Transnational Law establishes itself as a unique area of legal research, practice, and education, domestically and internationally. As a label for the norms governing border-crossing commercial exchange, it has long been considered as central to a globalizing legal profession. Today, as a conceptual framework that captures the interaction of law with a host of human sciences, from anthropology to geography, from sociology to political science, Transnational Law illustrates the inescapable openness of law and legal norms. Implicated in fundamental societal transformations, law is both driver and driven. Transnational Law as such functions as a methodological perspective through which to identify and conceptualize the emergence, contestation and diffusion of law through newly emerging constellations of actors, norms and processes. Established in 2017, the series will publish monographs in a range of doctrinal areas as well as on the intersection between law, legal theory, and the humanities.
