FORTHCOMING

Introduction to the Principles of Language

PAUL A. GAENG, University of Virginia

A systematic account of sound, grammatical, and semantic systems of the world's chief language groups, incorporating contributions of the important theorists. Striving for an even-handed viewpoint, the author emphasizes each topic equally, giving, for example, attention to both the scientific structuralist approach and the more abstract transformational approach. Contributions of the early American linguists are placed in perspective with contemporary theorists. Examples are drawn from diverse languages. As a summary of data, past and present, the book attempts no appraisal of ongoing controversies. *Paper. Spring, 1971.*

English Stress: Its Form, Its Growth, and Its Role in Verse

MORRIS HALLE, Massachusetts Institute of Technology

SAMUEL JAY KEYSER, Brandeis University

A new volume in the Studies in Language Series. For students without a background in linguistics, this is a presentation of the development and functioning of the English stress system. Based on generative transformational grammar, the book is a scientific account of three interrelated topics: the stress system of the general American dialect, the evolution of this system from Old English, and utilization of the system by English poets writing metrical verse. This elementary yet rigorous treatment of the nature, history, and utilization of English stress provides undergraduate and graduate students with a challenging book that will prepare them to read much of the important new literature in linguistics. *Winter, 1970.*

From Deep to Surface Structure: An Introduction to Transformational Syntax

MARINA K. BURT

This extensively class-tested workbook is intended for introductory courses in linguistics. It presents generally accepted transformational grammar rules, with a pictorial illustration of each, and gives a step-by-step demonstration of the application of each rule to the deep structure phrase marker, and the way other transformational rules can be applied. The workbook thereby helps beginning students to gain facility in following a syntactic argument and leads him toward constructing such arguments himself. Problems with answers; solved problems. Introduction by Noam Chomsky, Morris Halle, and John R. Ross. *Paper. Winter, 1970.*

SCHOENHOF's has been serving the greater Boston academic community since 1856 as an importer-exporter of books and dictionaries in and on almost all languages of the world. We offer special services in various areas of general and historical linguistics and are pleased to announce that a sampling of our linguistics listings will be available in early 1971.

HRW TEXTS EXPLORE EVERY ASPECT OF LANGUAGE...

OLD ENGLISH: An Introduction
Robert J. Kispert, University of Illinois

Utilizing a comprehensive approach to the language of Anglo-Saxon England, this elementary grammar presents a solid foundation in Old English and related aspects of historical philology along with reading selections chosen to illuminate Anglo-Saxon life and times.

January 1971 256 pages $8.95 (tent.)

PHONOLOGICAL THEORY: Evolution and Current Practice
Valerie Becker Makkai, University of Chicago

Four major sections deal respectively with the development of Bloomfieldian phonology, prosodic analysis, distinctive features and transformational-generative phonology, and the Copenhagen school and stratificational phonology. Each of the sections begins with a brief introduction that traces the development of the theory, characterizing each of the articles in terms of its relationship to previous scholarship and its original contributions to the theory.

In preparation 736 pages $11.95 (tent.)

A SURVEY OF MODERN ENGLISH GRAMMARS
Jeanne H. Herndon, Dominican College of San Rafael, California

Designed to provide students with a broad grasp of fundamental grammatical principles, this simplified handbook treats traditional, structural, and transformational approaches to the problems of analyzing English grammar.

1970 224 pages $4.95 paper

INTRODUCTORY TRANSFORMATIONAL GRAMMAR
Mark Lester, University of Hawaii

The student with no previous formal experience with linguistic theory will have no difficulty using this introduction to the major syntactic rules of English. Professor Lester has also brought together a collection of *Readings in Applied Transformational Grammar* which provide the beginning linguistics student or prospective English teacher with the background he needs to understand the impact that transformational grammar is having on the English curriculum.

March 1971 384 pages $6.95 (tent.)
Readings:
1970 320 pages $5.95 paper

WORKBOOK IN COMPARATIVE RECONSTRUCTION
William G. Cowan, Brown University

Problems and solutions make up the greater part of this workbook in historical phonology. There are 36 problems or exercises in historical phonology; 17 in comparative reconstruction; 7 in internal reconstruction; and 12 in sound change.

January 1971 128 pages $4.25 paper (tent.)

STUDIES IN LINGUISTIC SEMANTICS
Charles J. Fillmore, Ohio State University, and
D. Terence Langendoen, Brooklyn College

A collection of research papers on semantic theory and the description of English by Barbara Hall Partee, Richard Garner, Edward L. Keenan, D. Terence Langendoen and Harris B. Savin, George Lakoff, Arnold M. Zwicky, Sandra Annear Thompson, James D. McCawley, Robin Lakoff, Bruce Fraser, Paul M. Postal, and Charles J. Fillmore.

April 1971 352 pages $8.95 (tent.)

New

An Introduction to Romance Linguistics

Its Schools and Scholars
Iorgu Iordan *and* **John Orr**
Revised with a supplement: **Thirty Years On**
by **Rebecca Posner**

Iorgu Iordan's work, revised and translated by John Orr in 1937, is a classic. In this new edition the full original text is reproduced plus a new 190-page appraisal of thirteen schools of linguistic thought in the past three decades. During this period the Romance field has lost its neat contours; younger scholars have been drawn to diachronic methods and have moved along theoretical paths previously eschewed by Romance linguists.

1970 LC: 71-122932 594 pages $14.00

Conversational Tahitian

D. T. Tryon

The only general introduction in English to the Tahitian language, this book is designed not only for the language specialist but quite as much for the traveler to Polynesia. Grammars published earlier have been written in French or have had a notably religious flavor; none of them is suitable for learning Tahitian as it is spoken in contemporary everyday life. This book furnishes a clear presentation—based on modern linguistic techniques but expressed in non-technical terms—of the lingua franca of French Polynesia, one of the major languages of the Southern Pacific. In addition it affords entertaining glimpses of Polynesian culture and customs.

1970 LC: 74-84786 300 pages $7.00

A Tagalog Reference Grammar

Paul Schachter *and* **Fe T. Otanes**

The *Tagalog Reference Grammar* represents by far the fullest study of the structure of Tagalog—the most widely spoken language of the Philippines—attempted to date. It is also perhaps the fullest study, written within the transformational-generative framework, of the structure of any language. As such, it will be of interest not only to students of Tagalog but also to linguists in general.

1970 LC: 73-122946 400 pages paper, $7.50

Now available in paperback

Graded Readings and Exercises in Old Icelandic

Kenneth G. Chapman

"The grammatical treatment, which is strictly descriptive, is well planned and the reading passages are well chosen. The exercises for each lesson are very useful. . . . All in all, a welcome introduction to a course in Old Icelandic."—*Scandinavian Studies*

The Indo-European and Semitic Languages

An Exploration of Structural Similarities Related to Accent, Chiefly in Greek, Sanskrit, and Hebrew

By Saul Levin

Professor Levin's methods and results are radically different from the few scholarly attempts previously made to connect the Semitic and Indo-European languages. Hundreds of examples from a Semitic language(mainly Hebrew) and an Indo-European language(usually Greek and Sanskrit) are used to illustrate a similar pattern of sounds conveying a similar meaning. Thus Hebrew seems to share with Greek and Sanskrit a common origin.

Albany, New York 12201

CENTER FOR APPLIED LINGUISTICS

Field Techniques in an Urban Language Study, by Roger W. Shuy, Walter A. Wolfram and William K. Riley.

A report of the methodology employed in a survey of Detroit speech conducted in 1966–67. A descriptive, rather than theoretical work, in order to provide a practical base for large-scale urban language study.

1968 128 pages $3.00

A Sociolinguistic Description of Detroit Negro Speech, by Walter A. Wolfram.

A descriptive study of the correlation of linguistic variables with the social variables of status, sex, age, racial isolation, and style in the speech of Detroit Negroes.

1969 237 pages $5.00

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts o papers presented at LSA Annual Meetings, 1965 through 1969, may also be purchased separately.

A list of publications in print is available from the Secretary of the Society. Current prices for LANGUAGE are as follows: Complete volume 43, $8.00; volume 45 onward, $16.00; single numbers currently in print from volumes 39–44, $3.00; volume 45 onward, $6.00. Reprint editions of volumes 1–38 of LANGUAGE, Monographs 1–21, and Dissertations 1–52 are available from Kraus Reprint Corporation, 16 East 46th Street, New York, N.Y. 10017, and a price list can be obtained from that address.
