You will be contacted shortly by CCC- Rightslink who are acting on our behalf to collect the Article Processing Charges (APCs). Please follow their instructions in order to avoid any delay in the publication of your article.

Terms and Conditions for authors to Journals published by Cambridge University Press.

By completing, signing and returning the Open Access form (Form OA.14.1) you have agreed to abide by the following Terms and Conditions. Please retain this document for future reference.

A. The Journal's policy is to acquire copyright in all articles. There are two reasons for this:
(a) ownership of copyright by one central organisation tends to ensure maximum international protection against unauthorised use; *(b)* it also ensures that requests by third parties to reprint or reproduce an article, or part of it, are handled efficiently and in accordance with a general policy that is sensitive both to any relevant changes in international copyright legislation and to the general desirability of encouraging the dissemination of knowledge.

B. Two 'moral rights' were conferred on authors by the UK Copyright Act in 1988. In the UK an author's 'right of paternity', the right to be properly credited whenever the work is published (or performed or broadcast), requires that this right is asserted in writing.

C. It is understood that in some cases copyright will be held by the author's employer. If so, Cambridge University Press requires exclusive permission to deal with requests from third parties.

D. Permission to include material not in your copyright. If your article, including any supplementary materials, includes textual or illustrative material not in your copyright and not covered by fair use / fair dealing, permission must be obtained from the relevant copyright owner (usually the publisher or via the publisher) for the non-exclusive right to reproduce the material worldwide in all forms and media, including electronic publication. Please note that illustrative material (such as photographs/drawings) are not included in fair use/fair dealing provisions, even if acknowledged, and permission should be sought for their use in your article. The relevant permission correspondence should be attached to your copyright transfer form.

E. Cambridge University Press acts in accordance with the UK Bribery Act 2010 and the Data Protection Act 1998. Please refer to the Press's relevant policies, (http://www.cambridge.org/policy/privacy/), (http://www.cambridge.org/policy/abc_policy/) which may be revised from time to time.

Re-use of your article.

Notwithstanding the assignment of copyright in your article, you retain the following **non-transferable** rights, (subject to appropriate permission having been cleared for any third-party material):

Definitions[36]:

Author's Original (AO), Any version of the article that is considered by you to be of sufficient quality to be submitted for formal peer review by a second party. You accept full responsibility for the article. Content and layout as set out by you.

Submitted Manuscript Under Review (SMUR), Any version of the article that is under formal review managed by Cambridge University Press (or the Society that owns the Journal). Cambridge University Press (or the Society that owns the Journal) recognizes its responsibility to provide objective expert review and feedback to you, and, ultimately, to pass judgment on the fitness of the article for publication with an "accept" or "reject" decision. Content and layout follow Cambridge University Press's submission requirements.

Accepted Manuscript (AM), The version of the article that has been accepted for publication in the Journal. Cambridge University Press takes permanent responsibility for the article. Content and layout follow Cambridge University Press's submission requirements. This version may have been revised following peer review but may be subject to further editorial input by Cambridge University Press.

Version of Record (VoR), A fixed version of the article that has been made available by Cambridge University Press (or the Society that owns the Journal) by formally and exclusively declaring the article "published". This includes any "early release" article that is formally identified as being published even before the compilation of a volume issue and assignment of associated metadata, as long as it is citable via some permanent identifier(s). This does not include any "early release" article that has not yet been "fixed" by processes that are still to be applied, such as copy-editing, proof corrections, layout, and typesetting. The VoR includes any corrected or enhanced VoR.

Open Access Publication

1.1. In consideration of payment of the Open Access fee specified by Cambridge University Press, the contribution will be published in the Journal within an Open Access environment, freely accessible to those who wish to browse, read, print, save, copy, display or further disseminate the contribution including the posting of the contribution on a free website or in an institutional repository, or to alter, transform or build up the contribution to create a derivative work, provided all such uses include an attribution of the contribution to its author with full details of its title and place of original publication including copyright line, and a link to the URL of Cambridge University Press's website for the journal of original publication. Cambridge University Press will license such uses under the following Creative Commons licence: **Attribution** ('CC-BY') currently available at <http://creativecommons.org/licenses>. But if you wish to publish your article using a different Licence, we also offer **Attribution – Non-Commercial – Share Alike** ('CC-BY-NC-SA') and **Attribution – Non-Commercial – No Derivatives** ('CC-BY-NC-ND')

1.2. You retain the right to re-use the contribution or an adapted version of it in any volume of which you are editor or author, whether or not for commercial gain, and permission will automatically be given to the publisher of such a volume subject to normal acknowledgement.

1.3. For the absence of doubt, prohibited uses will include:

• Reproduction of the contribution in a potentially defamatory context or any other context which may reasonably be deemed inappropriate to the reproduction of a scholarly article bearing the imprint of a respectable academic publisher.

• Reproduction in any context which breaches the Author's right of paternity under the UK Copyrights Designs and Patents Act (1988).
