PLASTICS

EDITOR-IN-CHIEF:
Prof. Steve Fletcher *University of Portsmouth UK*

Cambridge Prisms is a series of journals dedicated to addressing real-world challenges. *Plastics* is one of the titles in the series.

Cambridge Prisms: Plastics is the first international journal covering science and policy topics that underpin the nexus between plastics, human and environmental health, environmental justice, and human rights. It will offer researchers, analysts and policymakers a unique insight into the interplay between plastics, people and nature by providing a platform for the publication and discussion of high-quality interdisciplinary research. The journal publishes on topics that directly explore the urgent and major societal challenges posed by plastics and examine possible solutions.

THE SCOPE COVERS, BUT IS NOT LIMITED TO:

- Drivers
- Pathways and Fate
- Impact
- Lifestyle Solutions and Tools
- Methods and Measurements

Much of the existing literature discusses the pathways, fate or impact of plastics on health and the environment; the drivers and lifecycle solutions have not yet been widely researched and this is a key focus for the journal.
